

The Toshiba Tecra M10 is extremely durable with absolute shock resistance

Prominent with security capabilities, the Tecra M10 is the first laptop to be equipped with a series of technologies named Toshiba's fourth generation EasyGuard.

Prominent with its security capabilities, the Tecra M10 is the first laptop to be equipped with a series of technologies named Toshiba's fourth-generation EasyGuard .

It has a comprehensive three-dimensional sensor, shockproof system for hard drive, SmartFace face detection function and FingerPrint fingerprint security. TPM security chip (True Platform Module) also helps encrypt all data stored on the hard drive when activated. Information and archives become confidential before any illegal unlocking process.

The M10 is integrated with eSATA, IEEE 1394 and Serial (COM) communication ports, supporting control data transfer between previous computers and I / O devices (powerful microphones such as controlling WAN routers, Industrial hardware programming system control panel, set up specifications such as telephone exchange or connection to repair and upgrade mobile phone software). Users do not have to worry when transferring USB to COM, the compatibility is not high, because the Tecra M10 perfectly supports that function with 100% COM port compatible.

In addition, the device also has a USB Sleep's Charge feature, which ensures that charging still works when the device is completely turned off.

The keyboard is designed with fluid spill resistant ability, eliminating concerns about the risk of accidentally spilling water or coffee . Especially, Scan Business function combined with Card Reader Software allows

camera to scan data on business cards encoded and quickly saved partner information.

If you do not want to use the Windows Vista Business license operating system, the owner can easily transfer directly to Windows XP Pro legally via the included DVD.

Buyer Tecra M10 stamped guarantee of Digiworld distributor is supported to upgrade free RAM to 2 GB and donated VND 800,000 voucher.

Configuring Tecra M10

1. Intel Centrino technology
2. Intel Core 2 Duo T5870 (2 x 2.0Ghz, 2 MB L2 Cache, FSB 800MHz)
3. 1 GB DDR2 Bus 800 MHz
