

# The venom of these 5 animals is like precious medicine in medicine

The venom is only a chemical in nature, in nature, they can be a deadly thing, but in terms of medicine, they can become precious drugs.

For a long time, venomous animals, especially those that possess strong venom, can be deadly to humans in just a few minutes are often described as hideous creatures and deserve to be destroyed. However, the venom is only a chemical in nature, in nature, they can be a deadly thing, but in terms of medicine, they can completely become precious drugs.

The venom of the 5 animals below can save your life in many situations.

## Spider venom

### Black widow spider

It's hard to convince most people that spiders are harmless, but generally these spiders have been 'misunderstood' for thousands of years. Spider venom has been shown to reduce pain, fight cancer, muscular dystrophy and many other diseases, especially the venom of black widows.

Research published in PNAS has shown that venom from deadly funnel network spiders in Australia can prevent brain damage from stroke. While other research conducted by the University of Queensland shows that some components of tarantula spider venom can be used as a non-addictive alternative to opioid analgesics, for people who must use chronic pain medication.

### **Snail venom**

### Cone snail

Most snails are harmless, but cone snails are the exception. They are one of the most unique animals in the world. Cones usually live in coral reefs in the Indo-Pacific region. Even a very small amount of their venom can make an adult man lose his life in just a few minutes.

However, this venom is believed to be hundreds of times stronger than morphine. Scientists are still trying to find the best way to exploit and prepare for use in medicine.

## Snake venom

### Poison snake

Speaking of venom, it is impossible not to mention snakes. The venom of snakes is probably the symbol of animal venom in general, both dangerous and medicinal. Snake venom can be used to treat heart attacks, blood disorders, high blood pressure, mild heart attacks, dissolve blood clots, prevent brain damage and many other uses. In many cases, using snake venom is the best way to save the lives of people who are bitten by snakes, in

line with the phrase 'get poison poisonous'.

## **Scorpion venom**

### Scorpion

Scientists have been striving to study the role of natural venom in general in treating cancer, and scorpion venom is one of the keys they are looking for. Scorpion venom is thought to help shrink and slow tumor growth.

## **Bee venom**

## Bees

Most people don't realize that bees are quite potent venom, which can even be lethal in some cases. Of course no one wants to be stung by a bee, but the venom of this poison has been shown to benefit the immune system if used properly. In addition, bee venom therapy (BVT) is also gaining popularity and is being used to treat a variety of diseases and conditions, including arthritis, Lyme disease, eczema, asthma, tumors and Many other uses.
