

# The world's first 1TB microSD memory card costs \$ 449

This is the world's first microSD memory card using advanced NAND 3D QLC technology with capacities up to 1 TB.

Micron recently introduced its latest microSD memory card called Micron C200 1TB microSDXC UHS-I. This is the world's first microSD memory card using advanced NAND 3D QLC technology with capacities up to 1 TB. In addition, the memory card has the ability to install applications and games with fast download speeds thanks to the support of A2 App Performance Class.

In order to bring more choices to users, Micron created different versions for this memory card with capacities ranging from 128 GB to 1 TB.

1TB microSD memory card can store up to hundreds of mobile applications, 40 hours of 4K HDR video and thousands of 40MP photos. Read speed of the card is up to 100 MB / sec, maximum recording of 95 MB / sec, 4K HDR recording / playback capability supports UHS-1 Speed Class 3 and Video Speed Class 30.

The 1TB microSD C200 memory card is expected to be marketed by Micron in the second quarter of this year, for \$ 449. If you are not satisfied with your current microSD memory card and want to increase the memory capacity for smartphones or tablets, the microSD C200 1TB memory card will make you satisfied.
