Theme for Chrome from Technome

There are 4 main categories (Abstract, Games, Music and Animes n 'Toons) with 15 themes spread across this genre.

Now, let's start testing new Google Chrome themes by visiting the Google Chrome Themes Gallery address to find and download the appropriate themes for your device.

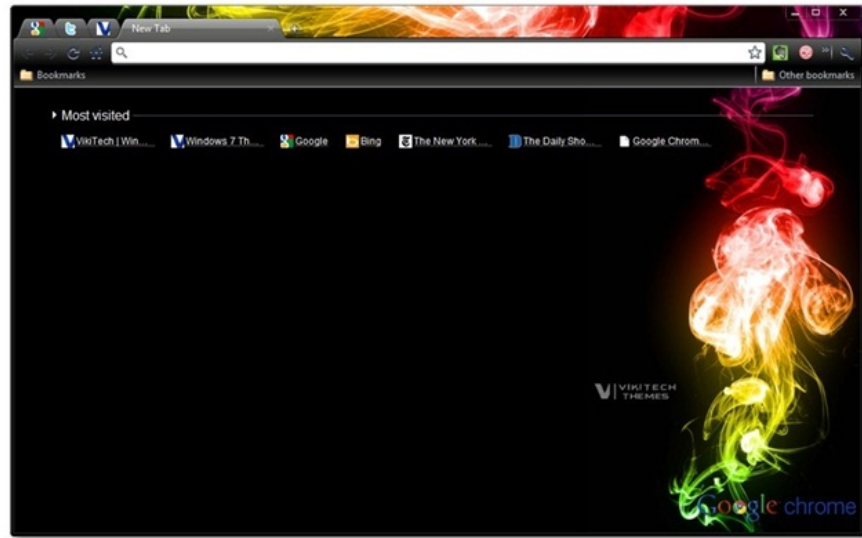

This genre gives us the opportunity to be creative, because unlike the Windows 7 themes that we use for a long time on some components like wallpapers, sounds and icons, here we do work on a single image and try to convert it into Google Chrome Frame. Abstract art is here. We start the *Abstract Art* genre with the new item ' *The Dark Art* '. Dark theme with amazing light art and fancy color effects. The theme focuses on images with overflowing dark backgrounds and an attractive color combination that brings some daring, pretty cool backgrounds. Try them, I'm sure it will draw attention to you.

Dark Art Abstract theme towards people who like bright colors on dark backgrounds.

Pure fibers with bright light on the dark background look great.

The theme Ethereal V.2 Chrome relates to Ethereal, instead of many bright smoke columns with different colors and focus on the midpoint. The V.2 Ethereal is less bright and focuses primarily on the right side of the browser.

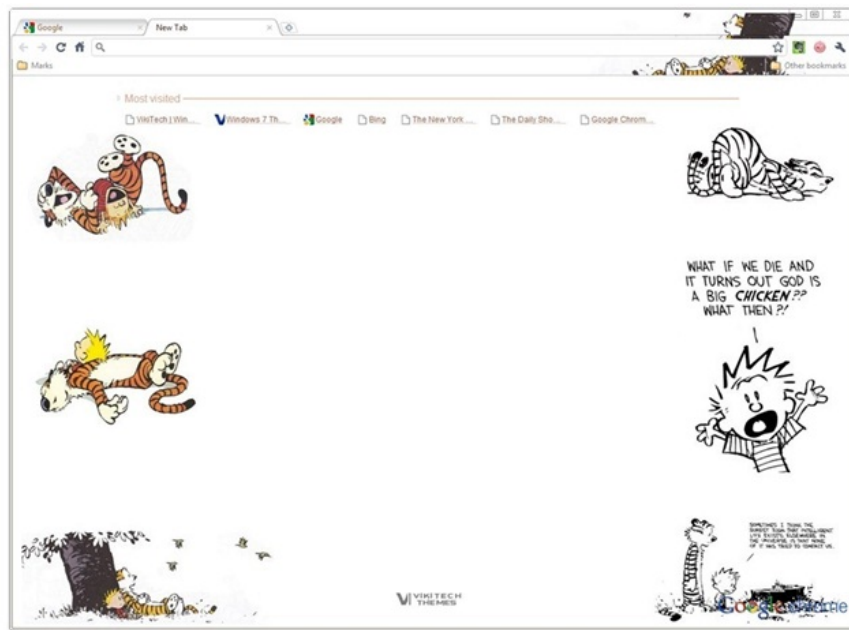

The theme of Colored Spikes with subtle light curves brings a feeling of floating in the music.

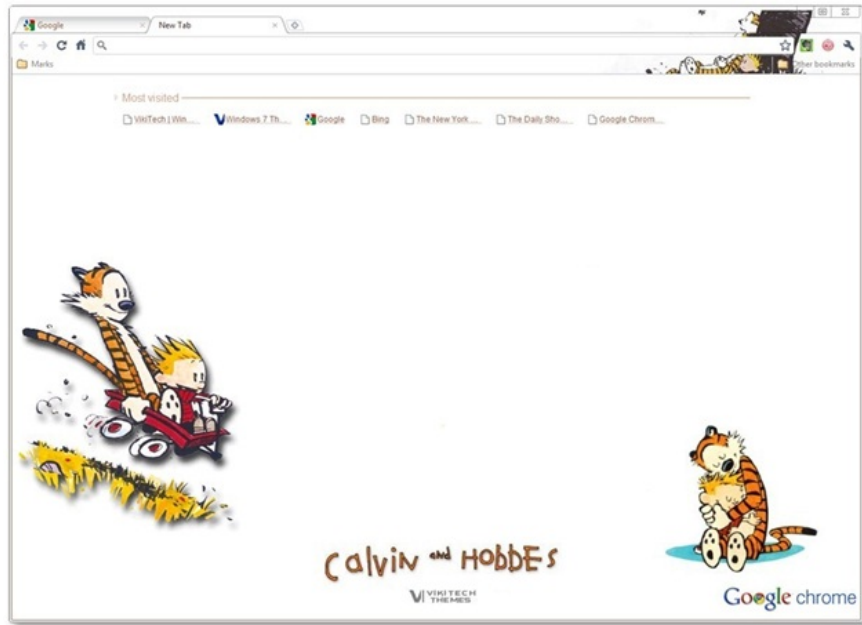

Animes and Toons themes: This is a rather fun genre, geared towards comic characters. The main characters here are: Calvin and Hobbes.

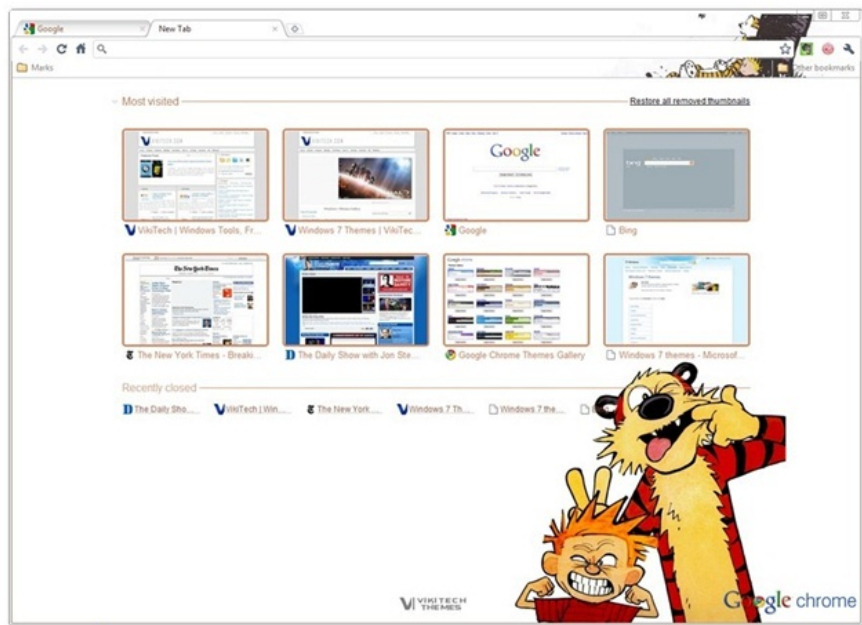

These are quite famous characters from the beginning of 1985 to the end of 1990. If you are a comic fan, you probably heard about these two characters.
