

There was WinRAR final 5.61, invite download and experience

Recently, WinRAR version 5.61 has been officially released with many advanced features, users can download and experience.

WinRAR is a software that supports large file and folder compression and decompression, saving hard drive space, sharing data easily with online tools, used by many Windows users. Recently, WinRAR version 5.61 has been officially released with many advanced features, users can download and experience.

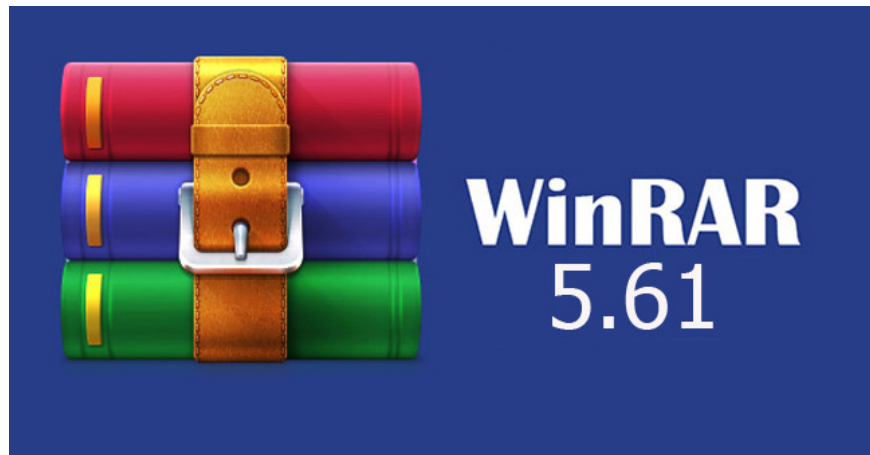

WinRAR supports most popular formats such as CAB, ARJ, ACE, UUE, LZH, TAR, GZ, BZ2, JAR, ISO, 7Z, Z.

Operating system supporting WinRAR includes:

1. Windows 98
2. Windows 98 SE
3. Windows ME
4. Windows 2000

1. Windows NT
2. Windows XP
3. Windows Vista
4. Windows 7

1. Windows 8
2. Windows 8.1
3. Windows 10.

Some new features in WinRAR 5.61

1. "Delete archive", extracting option can delete the entire collection as soon as the user starts extracting from the non-original RAR file, the entire file and the first existing file will be successfully extracted.
2. The "Archive" page of the File Explorer properties does not display the compression ratio bar with the encrypted name. With compressed files without a password, WinRAR does not calculate the exact compression rate and it was only 0% previously.
3. Fixes:
 1. When opening the encrypted RAR5 file, WinRAR displays the "The specified password is incorrect" message if entering the wrong password with Ctrl + P.
 2. Memory access is faulty, potential security risks due to memory management errors in the password dialog have been corrected.
 3. WinRAR may cause the menu bar of some other applications to be jerked at startup.
 4. When searching in CAB, WinRAR 'Find' command incorporates "String to find" ignoring "File names to find" and deleting the entire archive file.
 5. Do not set the license window title when using the 'License' command of the SFX module.
 6. WinRAR ignores the "Up one level" command if the boot folder in WinRAR installation has a backslash.
