

There will be mini laptops for \$ 120

The company is planning to launch new Eee PC models that cost less than \$ 200 and will typically be around \$ 120, said Jerry Shen, president of Asus.

The company is planning to launch new Eee PC models that cost less than \$ 200 and will typically be around \$ 120, said Jerry Shen, president of Asus. However, 'super cheap' Eee PC products will only be available in the market in 2009.

With plans to take up 30% of the laptop market share, Asus is focusing on the Eee PC models that are 'affordable' compared to other big players like HP, Dell or Sony, targeting those with revenue. average entry in society. Low-cost versions of the Eee PC produced by Asus have 10-inch screens instead of 7 to 9-inch screens.

In fact, in the first half of 2008, Asus sold 2.5 million products and expects to sell at least 6 million products by the end of the year. At the same time, the company did not hide its ambition to make up 30% of the laptop market from now until 2009 with the cheap Eee PC 'trump card'.
