

# These are secret areas on the plane that visitors are not allowed to sneak to

For safety reasons and to secure the process in aviation, passengers are generally not allowed to enter these spaces.

On the plane there are secret areas designed to serve the operation and life of the crew. For safety reasons and to secure the process in aviation, passengers are generally not allowed to enter these spaces.

However, to satisfy the curiosity of passengers, the News has compiled images of secret areas on the plane that are rarely seen, not even thought it exists, by the astronauts themselves. union share.

The cockpit is one of the most popular areas on the plane but what they see is just images on the internet, ads, movies . only. In fact, passengers are not allowed to enter the flight cab.

You probably do not know, for safety reasons, when the aircraft is in autopilot mode, pilots are allowed to read newspapers but not read books or novels in the cockpit.

This is the passenger's pet compartment, sometimes with wild animals such as tigers, lions . This area is strictly controlled on temperature.

Many people don't think about having a plane with a bedroom for the crew. Although the area is quite limited, this area is still full of amenities.

Usually, there will be a secret staircase easy to reach this area. The crew's cabin is equipped with both an electronic lock and temperature control buttons. Pilot and flight attendant sleeping areas are usually separated.
