

# Things are expected to appear on iOS 12 in the near future

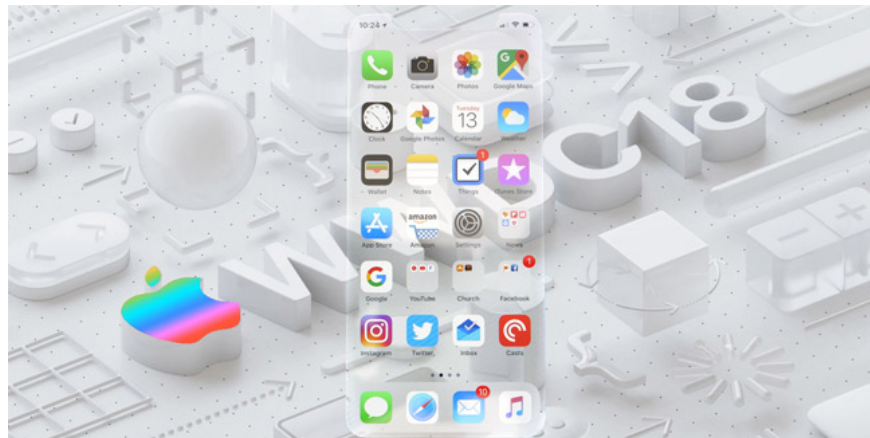

This is what many people expect to appear on iOS 12 update in the near future!

In order to better apply the user experience, Apple has continuously released iOS updates and, most recently, iOS 11.4 beta 2, users have been able to download and experience from today. However, with what iOS 11.3 has done, it still seems to not satisfy the iFan when incidents and errors continue to occur on this update. So with iOS 12, users are expecting what will appear on the update version to be released in the near future?

1. Common errors after iOS 11.3 update
2. 7 "yellow" notes for those who haven't upgraded to iOS 11.3
3. How to downgrade iOS 11.3 to iOS 11.2.6

## Notice and release date

The most reasonable time for Apple to announce iOS 12 version if nothing changes will certainly be WWDC as usual. This year's World Technology Development Conference takes place from 4 to 8/6/2018 and we will be able to hear information about iOS 12 there.

As we know, during the past four years, Apple has often released iOS versions for users in the second week of September, namely Tuesday or Wednesday. Therefore, iOS 12 is expected to be released around September 18, 2018.

## What do users expect from iOS 12?

What we know about the new feature on iOS 12 is still unofficial, everything is predicted by technology experts. Here are the hopes that have been longing for users of the most awaited new iOS update.

## 1. Quality improvement

The past version of iOS 11.3 has not met the expectations of users. Therefore, iOS 12 is expected that Apple will prioritize in dealing with issues that its predecessor has encountered such as user interface issues, battery life, performance, .

Even, some features should be removed. With all the analysis that Apple gathers from iPhone and iPad users, you will be surprised to have a lot of functions / APIs that no one uses during the device usage.

## 2. Complete dark interface mode (Dark Mode)

For OLED screens on iPhone X, if Apple brings Dark Dark mode to iOS 12, it is really a great thing. The interface of the dark background of YouTube has been proven to save a lot of battery for iPhone X, so many people who enjoy watching entertainment programs at night are hoping Apple will bring this feature to the next version of the operating system. .

In fact, you can enable Dark Mode on iPhone running iOS 11, but this mode is still not perfect and perfect. Apple needs to improve it on iOS 12, while providing users with a way to turn on Dark Mode rather than following many steps as before.

### 3. Features 'Always on display'

Option Always on display is known as one of the extremely useful features on many Android devices, it helps you not need to open the screen and still see most important notifications. That is also the reason that many iFan expect in the upcoming iOS 12, Apple will integrate Always on display up like the Android updates are doing.

### 4. Other features are expected

Add a series of features that are expected as follows:

1. Application installation is easier.
2. Notice is displayed clearly and conveniently.
3. 3D touch.
4. Add many interesting features to Siri virtual assistant.
5. Better support on iPad.
6. Increase battery usage time
7. The multitasking window is more streamlined.
8. FaceID improvements to improve performance and enable landscape mode unlocking.

9. Improved swipe gesture on iPhone X.
10. Update more new emoji.
11. Collection of more diverse wallpapers.
12. Battery Health features improved.

Up to now, the information about iOS 11 still seems to be overshadowed and mysterious, except for its announcement and release date. We will continue to update users with the latest iOS 12 related information. And what do you hope for more about the upcoming iOS 12 platform?
