

Things to keep in mind when using WhatsApp on the Web

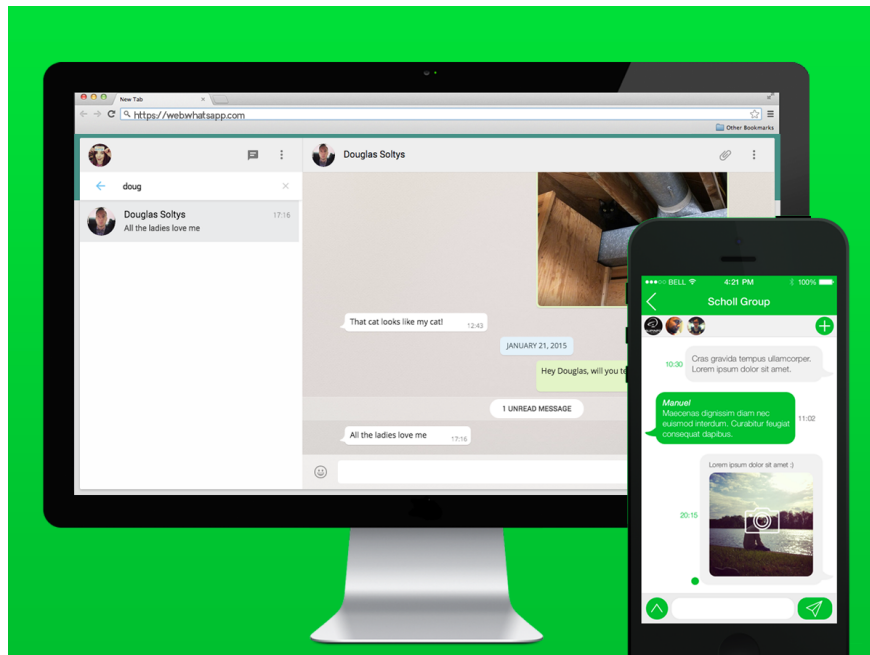

WhatsApp application now has a version for both computers and mobile devices. All messages you send and receive are fully synchronized on your phone and computer, so you can view all messages on both devices.

To give users more experience, WhatsApp application now has a version for both computers and mobile devices. WhatsApp Web is an extension based on WhatsApp application for mobile devices.

All messages you send and receive are fully synchronized on your phone and computer, so you can view all messages on both devices.

Up to this point, WhatsApp Web has versions for Android, iPhone 8.1+, Windows Phone 8.0 and 8.1, Nokia S60, Nokia S40 EVO, BlackBerry and BlackBerry 10 smartphones.

When using WhatsApp, you can easily access the same account on 2 devices (computer and phone) at the same time.

If your mobile device and computer do not have Whatsapp installed, you can download Whatsapp here and install:

Download Whatsapp for iOS [here](#).

Download Whatsapp for Android [here](#).

Download Whatsapp for Blackberry [here](#).

Download Whatsapp for Windows Phone [here](#).

Download Whatsapp for Nokia [here](#).

Download Whatsapp Web [here](#).
