

# Things to know when crafting in Minecraft

Things to know when crafting in Minecraft, Basic instructions on how to make items and tools in Minecraft and some important tips to know.

Minecraft is a sandbox game with the main goal of survival and building anything you want. At the beginning of the game, Minecraft looks easy, until the sun goes down and monsters or mobs appear to try to destroy the character. If you want your character to survive to see the sunrise the next day, players will need to craft some items to keep themselves safe.

Here are basic instructions on how to make items and tools in Minecraft and some important tips to know.

## Introducing the crafting mechanism in Minecraft

There are plenty of resources to gather in the massive open world of Minecraft. Besides the fun of collecting, players really need them to create items, help characters survive in dangerous and harsh environments. Minecraft has a specific crafting mechanism that players will use to create items using recipes.

When opening any crafting menu, the player will notice 2 specific boards. On the left side there will be recipes divided into different category tabs. Those that cannot be created due to lack of resources will be blocked in red. To the right is a crafting menu that tells the player what the recipe includes.

## Things that can be crafted in Minecraft

While there's only one space and crafting screen, people will need specific items to unlock the different recipes in each category. When switching to more advanced crafting, gamers also have to forge other tools to create

items. Here's what players can create in Minecraft using specific devices:

**Basic items and blocks** : These are items that are very useful when starting out or needed for emergencies, such as sticks, base blocks, torches, and crafting tables.

**Advanced Tools and Items** : At some point, gamers will need tools to help collect and craft more advanced building materials. People can craft these on the crafting table.

**Metallurgy** : When finding different types of ores in the caves, such as coal, iron, . will need to smelt them to form ingots. These help craft and upgrade armor, weapons, as well as many valuable items. To smelt these ores, the player needs a furnace.

**Charms** : Charms that enhance weapons and armor, consume any experience the player has to cast spells, and require an enchantment table to do this.

**Food and Potions** : Craft different foods, cakes and potions that will be useful for your health, increase your character's endurance and abilities. Depending on the product the gamer produces, everyone will need a set of furnaces, distillation racks, and cauldrons.

**Mechanics** : There is a special item in Minecraft called Redstone. Players can create a variety of items using the crafting table to create unique objects. They activate buttons, levers, and other items to aid in defense.

**Other crafting tables** : With the latest updates in Minecraft, players can now use several other crafting tables. For example, a map table for working on maps, a search table, and a forging table for upgrading tools.
