

Things you didn't know about 26 types of Pokéball - Part 1

Pokéball is the most important item in Pokémon GO, allowing gamers to quickly catch Pokémon back to their team. The higher the Pokéball, the more effective the ability to catch Pokémon.

As one of the indispensable "tools" every time a player participates in catching Pokémon, Pokémon GO's Pokéball balls will help us to capture Pokémon. However, Pokéball is also divided into different levels, the higher the level, the higher the ability to catch Pokémon.

Besides, Pokéball's ability to catch Pokémon depends on the characteristics of each type of ball, whether or not the Pokémon are easy to catch, or the status of the Pokémon when we throw the ball, . There are all 26 types of Pokéball and is divided into 5 generations or different levels. In this article, we will show you what few people know about Pokéball.

1. Things you didn't know about 26 types of Pokeball - Part 2

1. The first generation Pokéball:

Pokéball 1 ball generation is the simplest, low-level ball and is present in Pokémon GO.

1. Poké Ball:

This is the first type of ball that you will own right after entering the world to catch Pokémon. This type of ball has a successful Pokémon capture rate ranging from 0 to 255. The ball has a characteristic red and white color, with a low purchase value. Poké Ball usually only fits and unleashes all its strengths with Pokémon from level 1 to level 15.

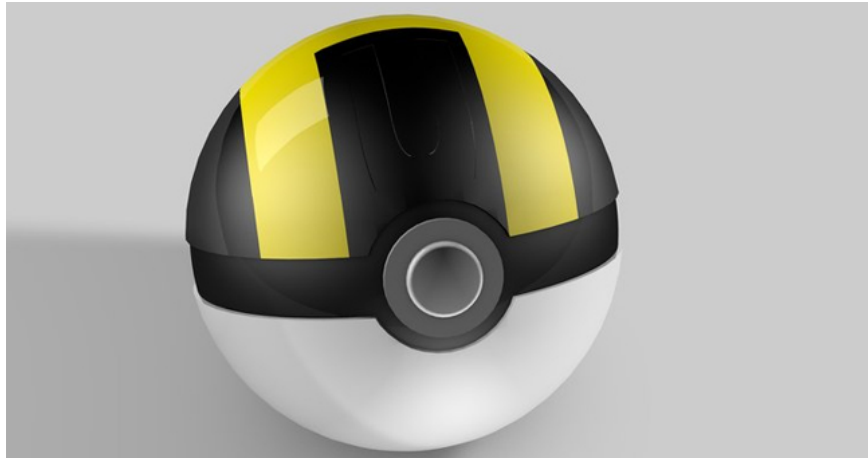

2. Great Ball:

The ball is covered in white and blue, the catch rate of Pokémon falls between 0 and 200, 1.5 times higher than the Pokéball. For this type of ball, you should use level 15 to 30 to achieve high efficiency.

3. Utral Ball:

Using the dominant brown and gold colors, Ultra Ball has a catch rate ranging from 0 to 150. This type of ball is suitable for catching Pokémon from level 30 - 60.

4. Safari Ball:

Safari Ball is a special type of ball that cannot be purchased with money, but can only be obtained when you join the price of catching Pokémon in the Safari wilderness area. Safari Ball catch rate is equal to the Great Ball ball type.

5. Master Ball:

This type of ball belongs to "extreme", only a few appear as a gift for worthy coaches. The success rate of Master Ball is up to 100%. This means that even the most powerful Pokemon cannot escape Masterball.

2. 2nd Pokéball generation:

1. Level Ball:

The ball has a gray streak on the orange background, made from the Apricorn tree. This allows gamers to easily catch Pokémon with a level lower than the Pokémon you are using.

The levels are as follows: use will be similar to Poke Ball when the Pokémon is used at or lower than the Pokémon intended to catch. The rate will be doubled when the user has a higher level, but not to double the level. Multiply 4 if level is double but less than 4. Multiply 8 if level is 4 times higher.

2. Lure Ball:

This type of ball is quite similar to Great ball but has a red streak on it. This type of ball is capable of bait, three times the success rate of Pokémon that appears when using a fishing rod. In other situations, Lure Ball's ability to catch will be on par with Poke Ball.

3. Moon Ball:

As the name suggests, right on the surface of the shadow is printed with the moon, effective for Pokémon that can evolve with Moon Stone (Moon Stone). The catch rate of this type is multiplied by 4 for Pokémon such as Nidoran, Clefairy, Jigglypuff or Skitty. In other situations, this type of ball is as effective as Poké Ball.

4. Friend Ball:

The ball is covered by the island because the green color is accompanied by red dots, with the catch rate equal to Poke Ball. Friend Ball has the effect of making Pokémon with a trainer friendly index of 200.

5. Love Ball:

This type of ball is effective for wild Pokémon of the same type that Pokémon are using. The catch rate will be multiplied by 8 times, while others will be similar to Poké Ball.

6. Heavy Ball:

The ball has a bluish gray color and green dots on the surface. This type of ball is used to handle large types of Pokémon. The successful catch rate will deduct 20 if the Pokémon has a lighter weight of 451.5 lbs, plus 20 if it is between 451.5 - 677.3 lbs. Plus 30 is in the range of 677.3 - 903 lbs. Add 40 if the Pokémon has a weight greater than 903 lbs.

7. Fast Ball:

The success rate of this type of ball will be multiplied by 4 if Magnemite, Grimer or Tangela are captured. In addition, the ball is also effective for Pokémon with a speed index of at least 100. In other cases, it is as effective as Poké Ball.

8. Sport Ball:

This type of ball has an equal catch rate with Great Ball and is played free when players take part in a Pokémon catching competition at the park.

Above is part 1 of the fascinating information and ability to catch Pokemon of 26 types of Pokéball. We will quickly bring you a sequel to new things about Pokémon that catch Pokémon.

Wish you all have fun playing games!
