After the rumors that appeared before the **ThinkPad X1** was released, the computer model running two **ThinkPad X1 Hybrid** operating systems today was officially launched. This product uses a Qualcomm dual-core chip on the motherboard to run a separate Android operating system like Lenovo's previous IdeaPad K1. With the operating system from Google, users can listen to music, watch videos, surf the web or change widgets without having to start Windows. Unfortunately, the Android Market cannot be used.

In fact, a quick test of *Engadget*, the ThinkPad X1 Hybrid model has a remaining operating time of 1 hour 16 minutes when running Windows to 4 hours 19 minutes when running the Android operating system. However, when you want to change the operating system, users are required to shut down and restart.

ThinkPad X1 Hybrid equipped with Gorilla Glass screen with 13-inch size resolution of 1366 x 768 pixels, brightness of 350 nits and weighing 1.67 kg. Machine equipped with Intel Core i3, i5 or i7 processor, sim card slot to use 3G network and thin battery for about 5 hours of usage time.

The ThinkPad X1 Hybrid will start selling in the second quarter of this year for \$ 1,599, \$ 300 more than the original ThinkPad X1.

**Some final photos of the ThinkPad X1 Hybrid.**

The ThinkPad X1 Hybrid has the same design as the ThinkPad X1.

This model has integrated sim slot using 3G network.

The ThinkPad X1 Hybrid costs more than the original 300 USD.

The battery life when running Android is double when running Windows.
