Photos of ThinkPad Edge 11 versions at the launch this morning.

ThinkPad Edge 11 is the cheapest version of the Edge series, the ThinkPad laptop models but the design is quite modern.

It has two colors, black and red, in which the black version will include glossy and lumpy models.

These laptops use Core i3 and i5 processors.

As a compact laptop, it fully supports the connection ports, but there is no disk reader.

The corners are rounded, unlike the traditional ThinkPad's simplicity.

In addition, the edges are covered with a metal border to increase the strength.

A Lenovo representative is an example of Edge's certainty when holding out.
