

# ThinkPad Edge - a new feature of office fashion laptops

Not too flashy and brilliant, the design of ThinkPad Edge appeals to users in their own luxurious looks.

**Not too flashy and brilliant, the design of ThinkPad Edge appeals to users in their own luxurious looks.**

Lenovo ThinkPad Edge has a smooth black shell with the highlight is how to color the silver gray border around the body. Covered ThinkPad Edge shell is a paint with roughness, anti-fingerprint storage and color stability over time. Users will not have the feeling of plastic or paint when observing the device. Instead, the feeling of a thin gemstone flattened on the desk. When active, the small dot in the ThinkPad logo on the case flashes brightly like an interesting indicator light. Weight of 1.7 kg is the ideal number for 13-inch laptops, suitable for the needs of many moves.

The top priority in ThinkPad designs is always convenience and accuracy. ThinkPad Edge's keyboard and touchpad are an example. The device still has a typical red trackpoint, still has very smooth bounce but ThinkPad Edge keyboard is renamed to chiclet with removable keys. The wide area of the keys feels comfortable when writing. This "glimpse" is due to Lenovo's designers who boldly put all the controls such as Home, End, Insert . upwards, giving the entire width to the character keys. Moreover, the entire function key is converted to a secondary button (only effective when pressed with Fn), leaving the main role for multimedia buttons.

Below the keyboard, the touchpad of ThinkPad Edge is spacious with large click keys. Although slightly slippery, ThinkPad Edge's touchpad still controls the cursor accurately and responsibly. Users will be able to feel the convenience of viewing photos on ThinkPad Edge by using the multi-touch function on the touchpad of the device: zoom in, zoom out, rotate images . quickly and flexibly under control of 2 fingers.

ThinkPad Edge's mirror screen has bright light and vivid colors. Images display clearly under various lighting conditions and the screen supports a wide viewing angle. ThinkPad Edge allows watching high-quality HD movies with screens that support 16: 9 aspect ratio and maximum resolution of 1366x768. This laptop is also equipped with a stereo speaker located on the bottom of the device. When adding a built-in webcam and microphone, ThinkPad Edge becomes an effective communication device over the Internet.

Video introduces ThinkPad Edge

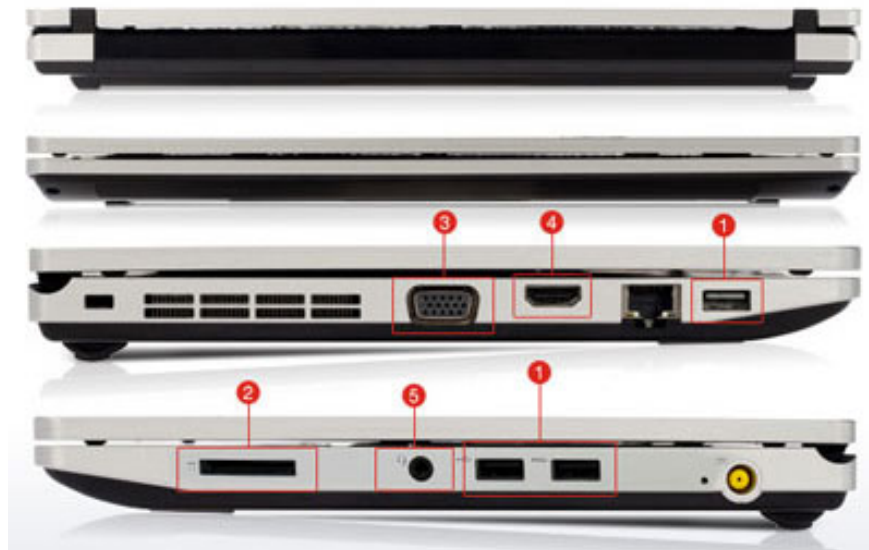

ThinkPad Edge uses Intel Core 2 Duo U7300 processor at 1.3 GHz and internal memory of DDR2 2 GB. With this configuration, the machine is powerful enough to run Windows 7 Professional smoothly and softly. Good multitasking machine with basic office software such as Words, Excel, PowerPoint . ThinkPad Edge uses shared Intel graphics Media Accelerator 4500MHD graphics card and 250 GB storage drive. Although using shared graphics card, but the image quality of ThinkPad Edge is not inferior to the configuration line equivalent to using a removable card. ThinkPad Edge still handles graphics at a fairly fast and smooth speed, supporting playing games that require middle-class graphics.

The device is full of basic connections such as 3 USB ports, VGA, memory card slot, audio jack, ethernet. Wireless connection like Wi-Fi standard b / g / n and Bluetooth. In addition, ThinkPad Edge also has an HDMI port to serve the entertainment needs of watching high quality movies and videos.

Included with Edge is the familiar ThinkVantage software suite, which helps manage machine resources, optimize performance, save battery power and provide comprehensive security. Thus, 6-cell ThinkPad Edge battery allows operation up to nearly 5 hours.
