

ThinkPad X200 costs nearly \$ 2,500

The ThinkPad X200 is one of Lenovo's latest business laptops. The product stands out with its slim and light body, equipped with many advanced technologies

The ThinkPad X200 is one of Lenovo's latest business laptops. The product features a lightweight body, is equipped with many advanced technologies and sells for nearly \$ 2,500.

The ThinkPad X200 is the next generation of the X61, with a 12.1-inch screen, but has a slim, small, light design like the X300. As expected, the machine will be sold to Vietnam market from September 4 with a starting price of 2,447 USD.

Turn from left to right: ThinkPad X200 12.1 ", ThinkPad X300 Center 13.3" and X61

The X200 has a square, sturdy body like other ThinkPad models.

Lenovo ThinkPad X200 is equipped with 12.1-inch screen, resolution of 1,280 x 800 pixels. Above the screen is a built-in webcam.

The keyboard of the device is wide and full of buttons, but since this is a 12.1-inch laptop, the area for the keyboard spills over to the sides of the device.

However, this laptop is not equipped with touchpad, but only red track point and system with left and right mouse buttons. Next to it is a fingerprint reader that uses biometric identification technology, allowing users to set a password for the device using their own fingerprint.

The left side of the device is where the power jacks, heat sinks, USB ports, VGA-out, Ethernet, USB ports, ExpressCard 54 and turn on / off Wi-Fi features are turned on and off.

The right side must have a USB port and headphone jacks, microphone and modem.

Front edge is screen lock and memory card reader.

The bottom of the ThinkPad X200 has drainage holes, so that users can spill a cup of coffee on the keyboard, the machine is still unharmed.
