

This application helps you turn the hole-punching camera on Galaxy Note 10 into a beautiful% battery indicator

The Energy Ring app creates a circle around the mole, the front camera portion of the device corresponding to the battery% in real time.

At the present time, the perforated screen design (mole) is used by smartphone manufacturers, such as the Note 10 series. For those who do not like this type of screen can download wallpapers. especially to cover this mole or use the Energy Ring app to customize this hole to show the battery percentage beautifully.

1. Ho Chi Minh City has deployed the application 'Lookup for medical examination and treatment' on smartphones
2. Zao, how dangerous is China's face-changing application that is causing the Internet storm?

Specifically, the Energy Ring app creates a circle around the mole, the front camera portion of the device corresponding to the battery% in real time. Users can customize the color, the density, the direction of the circle and many different effects as you like.

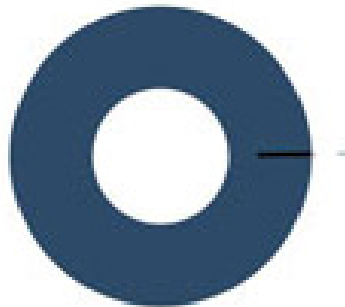

When users perform tasks such as playing games, watching movies in full screen mode, this application allows you to hide to avoid being distracted.
