

This beautiful little device will help you avoid worrying about losing things

Attaching a 'third eye' on any item to never lose them, this simple, effective idea of a startup will help you not worry about losing things.

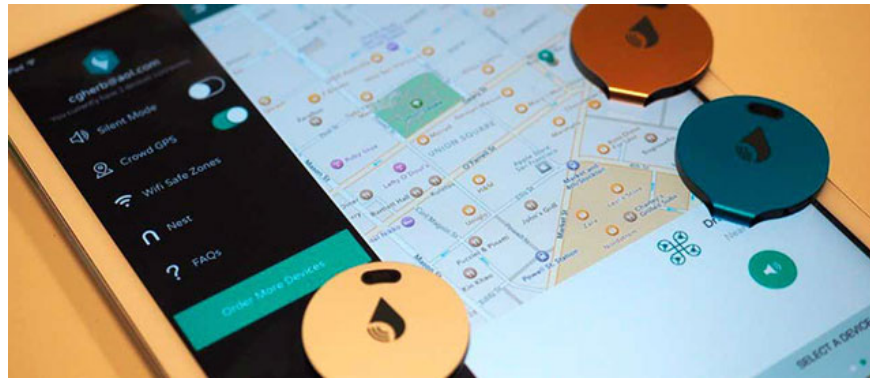

Have you ever parked a car in the parking lot and don't remember where you parked? That must still happen very often. Then you will walk around, press the button on the car key to make the alarm sound loud. This will be even more frustrating on a hot summer day.

There is no need to install expensive GPS navigation systems to track the position of the vehicle. It is too expensive because you will have to pay a monthly fee. If you're looking for a way to track cars or any item, this is the answer for you. A startup in California has created a small device, works with mobile phones and can do the work you need, that is, **asset tracking or any item**.

The compact device is about the size of a coin and can be mounted anywhere

Named TrackR, this is a device with a very small size but possesses a small capacity. The way TrackR works is very simple. Users only need to **install TrackR application on the phone** (support iOS and Android), **connect to TrackR purchased device** of the company and you are ready to "follow" your item by attaching TrackR to any item Whichever you want to follow. The whole set-up process will take place for **up to 5 minutes**.

You can attach it to keys, suitcases, wallets, technology items or anything you don't want to lose. Wherever you go, TrackR will help determine the location of the item in seconds.

Attach TrackR to any item you don't want to lose

This tiny item is only available for \$ 29 and you can order it directly from the company's website. They take delivery worldwide and you will receive TrackR in just one week. Currently, with **over 4.5 million products** sold worldwide, this is truly an effective solution for tracking furniture at affordable prices. They have several different models with attractive discounts and promotions. If interested, visit the TrackR home page and find a product that suits your needs.

TrackR receives user support
