

This is a bot made to encourage viewers, but 'breath' of extremely pessimistic and amusing sentences

'Life on Earth is no different from a kidnapping for ransom!'

Go to the Facebook wall or visit the home of teenage girls, or middle-aged doctors, you will definitely see the words '*Inspirational quote*', in order to create an optimistic atmosphere for the viewers. A good example is the saying '*Live Laugh Love*' - '*Live, Laugh and Love*', placed at the beach or sunset image.

Sometimes these quotes are also helpful, helping people live happier and more useful; but there are statements that are used so often that . it looks boring. So why not make a lot of these statements to make them less boring? Perhaps human imagination is limited, so it cannot be 'published' anymore.

That's why InspiroCorp came up with a unique idea: Create a Bot powered by Artificial Intelligence that automatically creates sayings that motivate users, then Put them on a "love life" wallpaper.

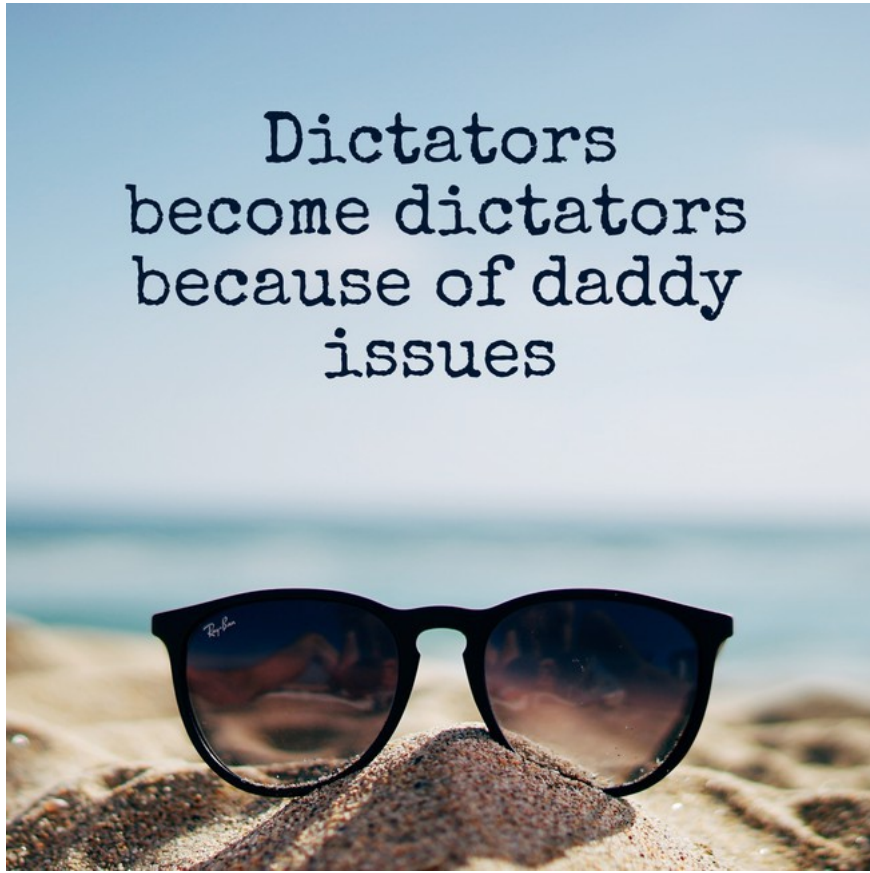

Most of the sentences created by *InspiroBot* are optimistic, some are due to non-standard sentences so it makes no sense. But the more we press the 'Create new sentence' button, the more we find pessimistic statements, the opposite is equally humorous. Perhaps reading these lines users will not feel love life but also . more depression!
