

This is an 18,000mAh phone ... No, the 18,000mAh battery is equipped with the same function as the phone!

Has anyone ever told you that MWC is an event full of strange and sometimes even crazy in the smartphone world?

Has anyone ever told you that MWC is an event full of strange and sometimes even crazy in the smartphone world? And to continue this tradition of MWC, a company has released a smart phone with a battery capacity up to . 18,000mAh, or you can call this an 18,000mAh battery backup page. Being functioned like a phone is not wrong!

The name behind this impressive device is no stranger to technology lovers, it is Energizer, and their 'overweight' child is called Power Max P18K Pop.

1. Energizer is producing a phone with pop-up camera, 18,000mAh battery, foldable screen

More specifically, according to Avenir's specifications, this dark green 'brick' is up to 18mm thick, ie, equal to 3.5 stacked iPhone Xs, and at the same capacity as announced. The manufacturer's device will have 10 times the battery capacity of the iPhone 7, nearly doubling Xiaomi's standby 10,000 mAh charger. Energizer Power Max P18K Pop really makes people wonder, is this a smartphone mounted on a spare battery, or is it a backup charger with smartphone functionality? Perhaps both are correct. So the next question posed here is: What are so many batteries for? Is it necessary?

According to Avenir, the 18,000mAh battery will allow you to use this phone all week for basic tasks without charging, or two days, equivalent to 48 hours of continuous video playback on the 6.2-inch screen, 1080 x 2280 resolution. In addition, you can also listen to music with Power Max P18K Pop for 100 hours continuously, as well as talk to the 'empty words' with talk time up to 90 hours without a break. Besides, when in standby mode, the battery will help the device maintain 'life' up to 50 days before the 'last breath', and to recharge it will take up to 9 hours. Moreover, this huge capacity will also help Energizer Power Max P18K Pop act as a backup battery thanks to the ability to charge back to other devices via OTG connection.

1. HMD Global launched a new series of phones at MWC 2019, the most impressive being the super-5 smartphone camera

Although it has a large thickness, the overall design of the device does not appear to be a bit clumsy at all. The device is covered by a sleek metal shell in an eye-catching gradient style. Not only does it make the machine more durable, more durable, great for long outings, but it also contributes to the serenity and dynamism of the product. In addition, Power Max P18K Pop's 6.2-inch LCD screen also surprised many people with the edges of benzel are not too thin, not much worse than other expensive flagship models, giving the feeling of 'lightness' when viewed from the side. before. You may wonder where the selfie camera is located? There is a 16MP + 2MP dual selfie camera module hidden in the chassis and only turned on when you use the camera. The device will also be equipped with 3-sensor rear camera, 12MP, 5MP and 2MP respectively.

In terms of configuration, in addition to the large battery, Energizer's products also own the equipment as a popular smartphone today such as 6GB RAM, 128GB internal memory and use Helio P70 chip (on par with Snapdragon chip line). 6xx). It will also be preinstalled with the latest Android 9 Pie version.

Energizer Power Max P18K Pop will officially go on sale this summer for about \$ 680 (equivalent to 15.8 million). At the present time, this is the world's largest integrated battery phone.

1. Oppo 'chases' new folding screen smartphone, designed quite similar to Huawei Mate X
