

This is an Excel drawing, believe it or not

A 73-year-old man painted beautiful paintings with ... Excel.

A 73-year-old man painted beautiful paintings with . Excel.

Tatsui Horiuchi is a 73-year-old artist who found a passion for digital art 13 years ago, just before retirement. But because graphics software is always very expensive, Horiuchi challenged his talents by creating masterpieces with Excel - a calculation tool that is thought to be dry.

The idea of ??trying something new to Horiuchi is very natural when he reaches retirement age and needs a new hobby. He has loved digital art for a while and choosing a software to do is just a matter of time.

The work is very elaborate and detailed to create a picture

Never used Excel for work, but Horiuchi quickly mastered the techniques and also won the Excel Autoshape Art Contest in 2006. His vivid and detailed paintings are often very detailed. taking the theme of landscapes and cultural and natural heritage of Japan.

Horiuchi didn't use Excel before

If you do not believe that these pictures are made with Excel, download the original file here.

Cherry Blossoms at Jogo Castle (2006) <http://www.moug.net/img/campaign/2006/a1.zip>

Kegon Falls (2007) <http://www.moug.net/img/campaign/2007/a3.zip>

Horiuchi's painting makes the scene of nature in Japan alive

Let's admire some of his other paintings
