2. Click **Settings**.

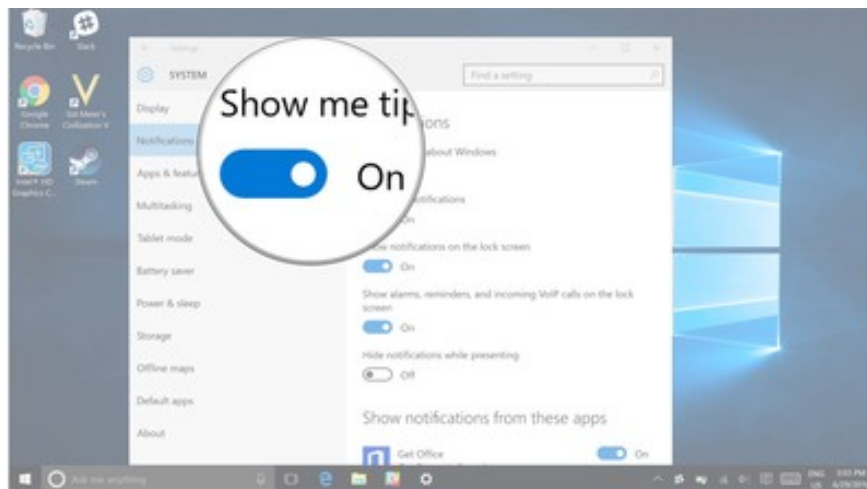

3. Click **System**.

4. Click on **Notifications and actions**.

5. Switch the state of the application that you want to turn off Action Center notifications to **OFF** .

Part 2: Disable Action Center on Windows 10

1. Disable (disable) Action Center in the Registry Editor

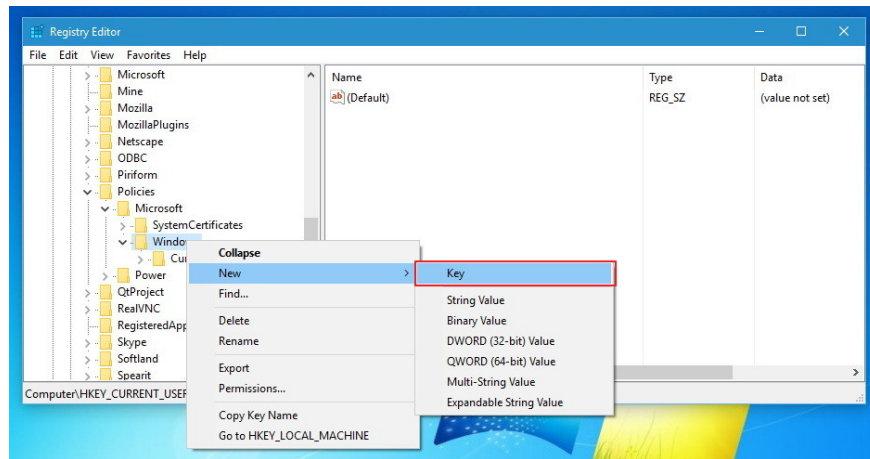

To disable Action Center in the Registry Editor, you can follow the steps below:

First on the Start Menu, type the keyword **Regedit** into the Search box, then press Enter to launch Registry Editor under Admin.

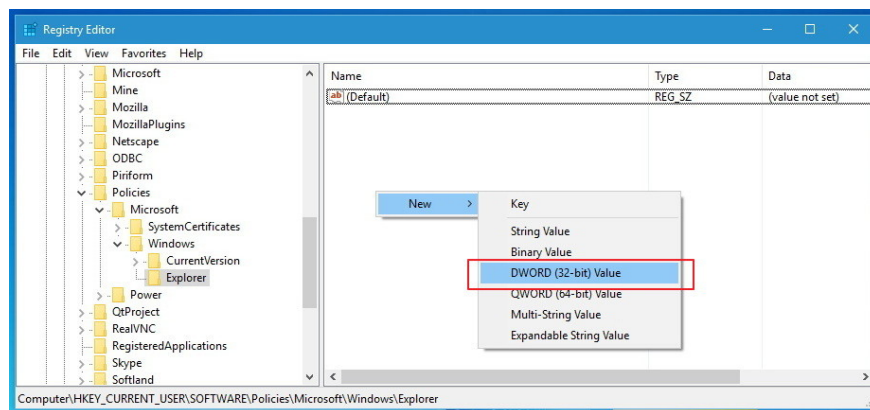

In the Registry Editor window, follow the address:

HKEY_CURRENT_USERSOFTWAREPoliciesMicrosoftWindowsExplorer.

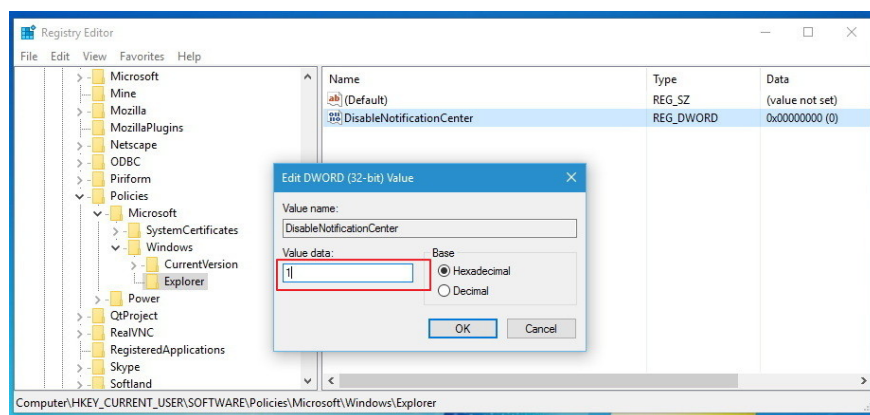

Here, in the tree in the left pane, right-click on **Windows** and select **New => Key** . After that, name the key just created as **Explorer** .

Next, right-click the newly created key Explorer name and select the **32-bit DWORD** value format , name this value **DisableNotificationCenter**.

Double click on the newly created value. Then change the value in the Value data frame from **0** to **1** , click **OK** to complete the process and close the Registry Editor window.

Proceed to restart your computer. So you have disabled (disabled) Action Center.

2. Disable (turn off) Action Center in Local Group Policy Editor

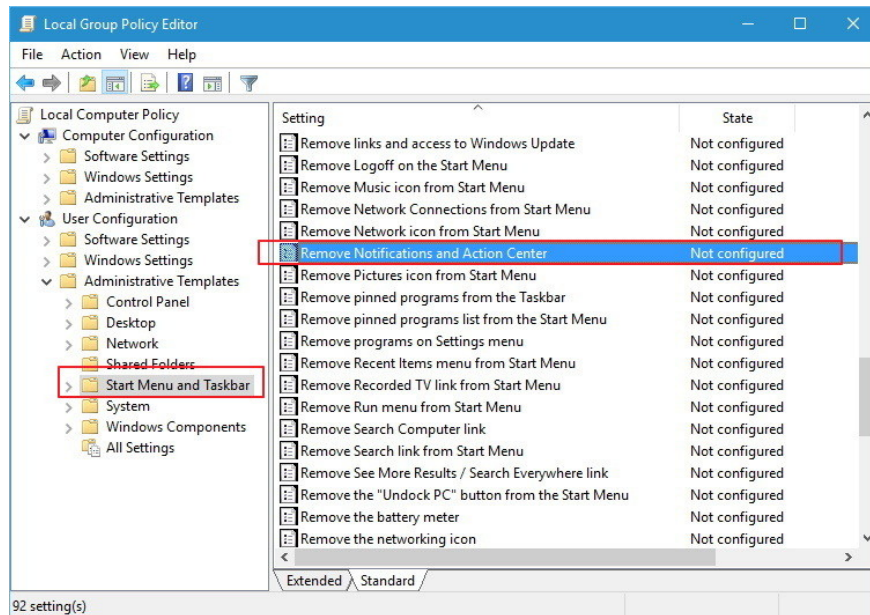

Note : Local Group Policy Editor is only available on Windows 10 Pro . If your computer is running Windows 10 Home, you can only disable Action Center on the Registry Editor as described above.

To disable **Action Center** in **Local Group Policy Editor** , follow the steps below:

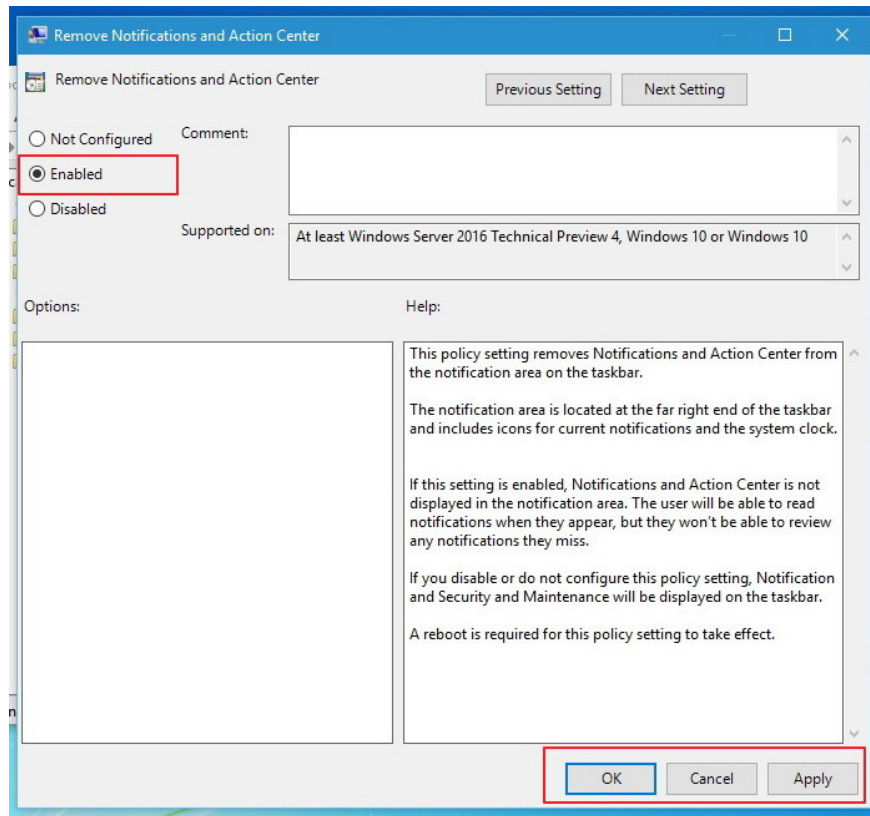

First on the Start Menu, type the keyword **Edit Group Policy** , press Enter to launch Local Group Policy Editor.

In **Local Computer Policy** , find the **User Configuration** section, then select **Administrative Templates** , then click and select **Start Menu and Taskbar** .

Next, find and double-click **Remove Notifications and Actions Center**.

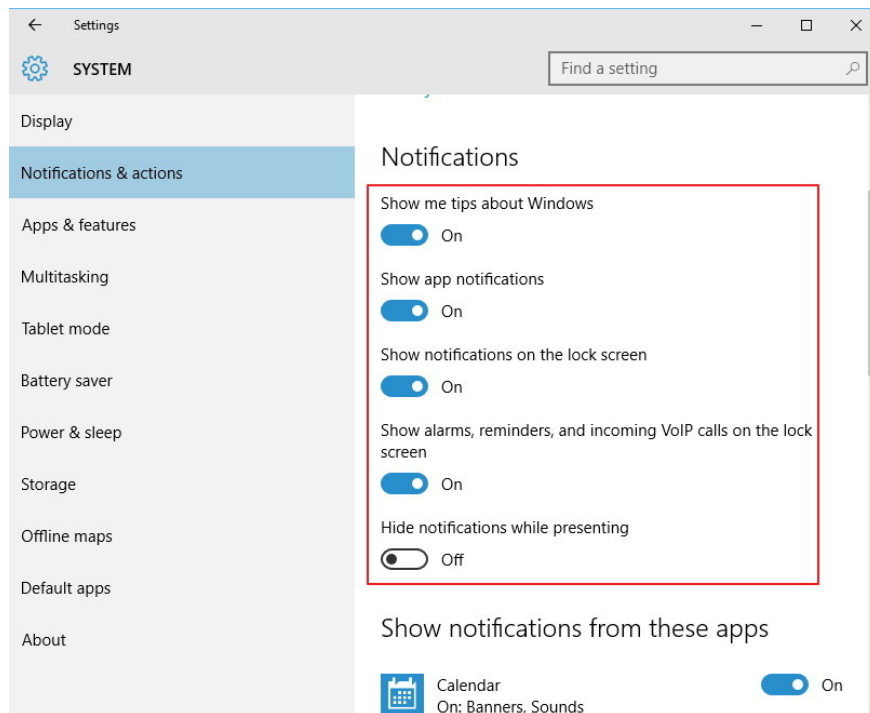

On the new Remove Notifications and Actions Center window that appears on the screen, select the **Enabled** option, then click **Apply** and **OK**.

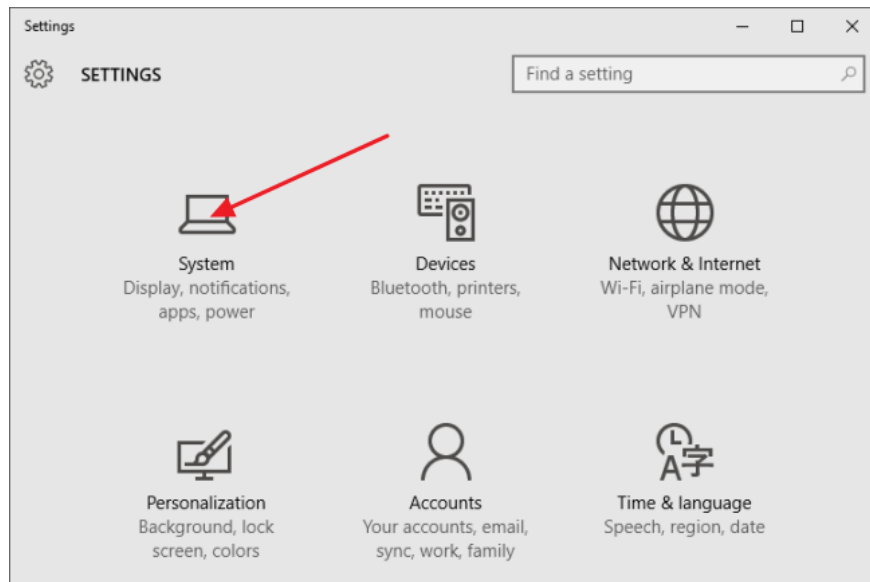

Finally proceed to restart your computer.

Note: Action Center is disabled (disabled) but you still see **Toast Notifications** . If you want to disable Toast Notifications, go to **Setting App => System => Notifications & actions** , turn off notifications that you don't want to appear on the screen.

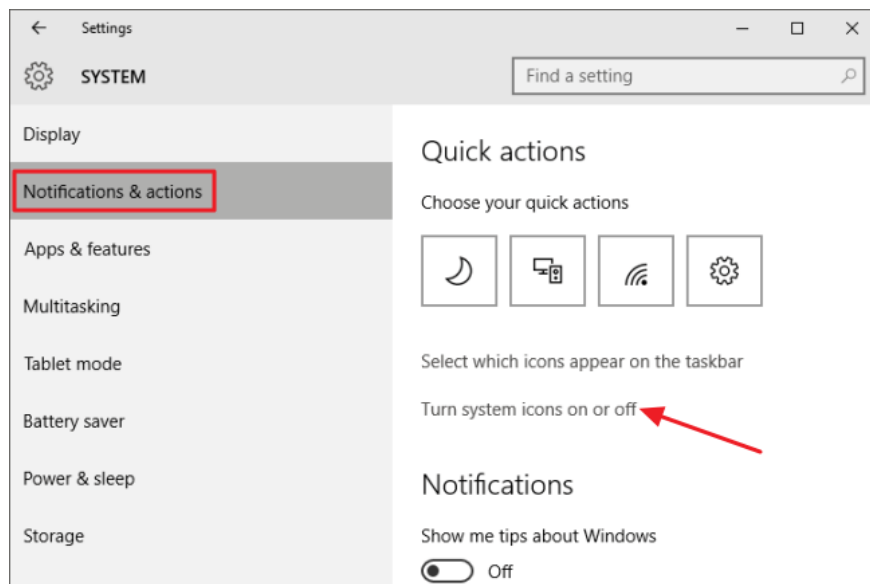

3. Disable Windows 10 Action Center on the Taskbar

Press **Windows + I** key combination to open the **Setting** application, then click **System** .

Alternatively, open the Start Menu and select **Settings**.

In the System window, click **Notification & actions** in the list of options on the left pane. Then in the right pane, click the **Turn system icons on or off** link .

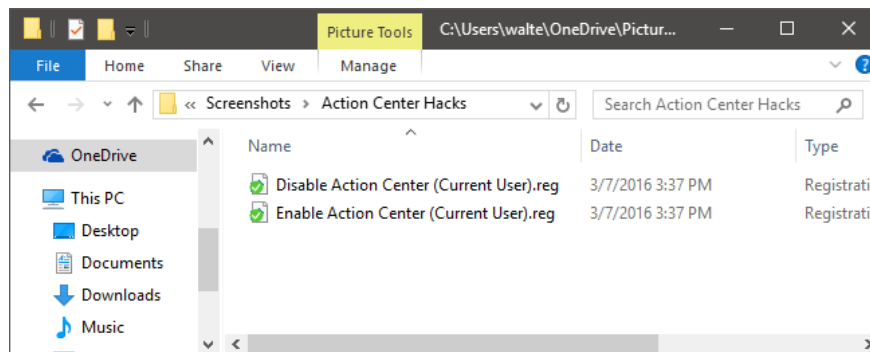

Scroll down to find Action Center in the list. Here you set the Action Center option slider to **Off**.

Finally proceed to close the Settings window to finish

4. Download the 3rd application

If you don't want to interfere with the Registry or the Local Group Policy Editor, you can ask for the help of the 3rd application. The third application that the Network Administrator wants to mention is Action Center Hacks.

Download Action Center Hacks to your computer here.

Action Center Hacks contains 2 Zip files. 1 Zip file to disable Action Center and 1 Zip file to activate Action Center.

Just double-click the Zip file you want (enable or disable Action Center) and then follow the on-screen instructions.

Finally proceed to restart your computer to disable or enable the Action Center.
