1. Why do rivers never flow in a straight line but like to twist?
2. Decipher the mysterious success of the mysterious blue aquamarine river with 1-0-2 in the world

According to experts, the water color changes because of *Macarenia Clavigera*, an endemic species of the Sierra de la Macarena - a mountain range located south of the capital Bogota, Colombia.

During the period from July to November (mid-rainy season to dry season), mosses, aquatic plants, corals and red *Macarenia Clavigera* trees cling to the rocks along the nearly 100 km long river, creating a colorful carpet from orange, red, yellow and blue just below the surface of the water creates a beautiful 'liquid rainbow'.

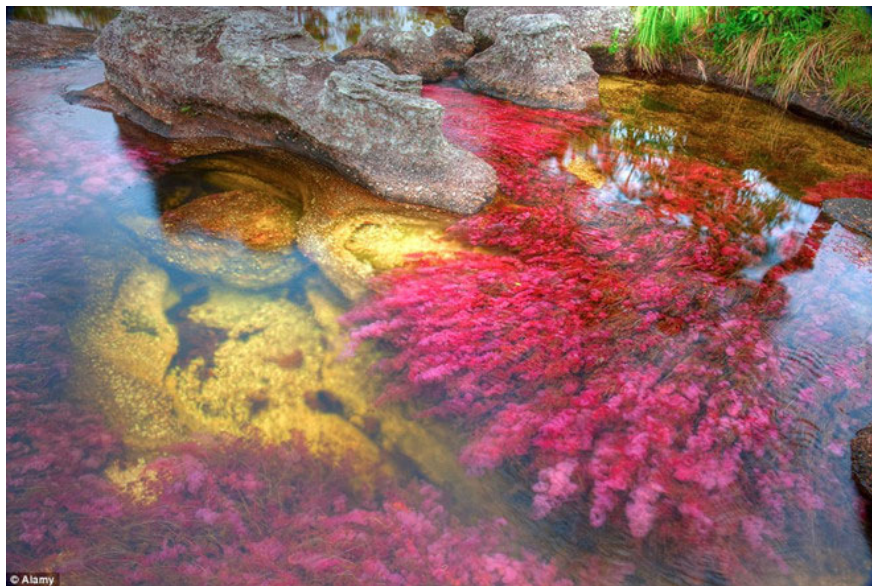

Admire the magical beauty of the world's most beautiful river through a few images below.

The *Macarenia Clavigera* bushes growing at the mouth of the water holes along the river create a beautiful setting.

The gray of the stone and the clear blue of the water blend with the red of the tree.

Flaming red water due to the color of *Macarenia Clavigera*.

Strange beautiful river attracts many visitors in Colombia.

Macarenia Clavigera, endemic to the Sierra de la Macarena.
