

This is the most commonly used version of Windows 10 in the world

Windows 10 is currently the most commonly used personal computer operating system in the world, this is probably well known, but have you ever wondered which version of Windows 10 is the most popular?

Windows 10 has been on the market for nearly 5 years, along with dozens of updates, large and small, to make this operating system more perfect, both in stability as well as user support utilities.

Windows 10 is currently the most commonly used personal computer operating system in the world, this is probably well known, but have you ever wondered which version of Windows 10 is the most popular? According to new statistics of market analysis firm AdDuplex, Windows 10 1903 (Windows 10 May 2019) is currently the most popular version of Windows 10 used in the world, accounting for 49.2%. Of the total number of Windows 10 computers that are currently active, second place is Windows 10 1909 (November 2019 Update) with 33.4%. Notably, there are still 9.3% of Windows 10 computers in the world currently running on Windows 10 update 1809 (October 2019 Update). This is known as one of the worst Windows 10 updates ever released, with a series of fundamental vulnerabilities that Microsoft forced to recover after only a short time to market.

Windows 10 1903 most commonly used in the world with 49.2%

The good news is that about 0.8% of devices are running on Windows 10 preview versions. That means that the number of insiders in Windows 10 is still quite large, this is the team that helps Microsoft a lot in finding and reporting vulnerabilities on the platform, for allow the company to fix them before releasing large-scale updates to users of the popular font.

Back in Windows 10 1903, this version was released by Microsoft on May 21, 2019, and is the 7th feature update for compatible devices, bringing a range of improvements and some new features. to enhance the overall

experience. Overall, Windows 10 1903 is a stable update, with few errors and is taken care of quite carefully. So it's no surprise that this is the most commonly used version of Windows 10 today.

In less than 1 month, Microsoft will release Windows 10 2004 (20H1 or May 2020 Update) - the next major feature update of Windows 10. Now this important update is almost complete development stage and has been released as a trial version on the Release Preview Ring to gather feedback from the public before the official launch, and if everything goes as planned, the deployment of Windows 10 2004 worldwide will begin in the next few weeks.
