

# This is why you should buy Pixel 2 instead of iPhone X

If you look back, you'll see there are a number of reasons why Google's Pixel phones are better than the iPhone X, in a way.

When using Pixel 2 XL of Google, you will find it difficult to fully assert that it is better than iPhone. iPhone X is even more special with its own design and technology. But if you look back, you'll see that there are a number of reasons why Google's Pixel phones are better than the iPhone X, in a way.

## Both Pixel 2 and Pixel 2 XL are cheaper than iPhone X

Not to say much, this is the first advantage of all phones compared to the iPhone X, including Pixel 2 and Pixel 2 XL, with prices of \$ 1000, \$ 650 and \$ 850, respectively.

*These are Google's Pixel 2 and Pixel 2 XL phones*

**Pixel 2 comes with fast charging and iPhone X does not**

Apple finally supports fast charging on the iPhone 8 and iPhone X, something that makes sense that Android phones have long been available, bringing hours of battery life in just a few minutes of charging.

But the iPhone X box only comes with a regular charger, but if you want a fast charger, you will have to buy separately. While the Pixel 2 phones are available fast charging in the box already. Not only is it cheaper, there are also more chargers, it must be thought.

### **Pixel 2 XL has a larger screen than the iPhone X, although both weigh nearly the same**

Pixel 2 XL weighs 175 grams, while iPhone X weighs 174 grams, much less than each other. But the Pixel 2 XL has a 6-inch screen, while the iPhone X's screen is only 5.8 inches. So you will be able to use the larger screen without the phone being heavier.

### **Fixing both phones The Pixel 2 is cheaper and designed with no glass to break**

*The cost of repairing iPhone X is very expensive*

iPhone X is broken, the repair cost will be very expensive. Without AppleCare +, you'll have to spend \$ 280 to fix the screen and \$ 550 for the 'other damage', which has the rear glass.

Meanwhile, to fix the Pixel 2 screen, it only costs \$ 130, the small glass behind it will be \$ 170. Of course it is expensive but compared to iPhone X it is still cheaper. With Pixel 2 XL, the cost is \$ 220 and \$ 160 respectively.

## Working with Android on faster Pixel 2 phones is iOS on iPhone X

You can adjust Android to make it faster than iOS by cutting or removing effects when opening apps, swiping between screens. iOS also selects Reduce Motion but only changes the zooming, zooming, closing and opening effects and blur effects, but the applications when closing and opening are also not faster.

## The Pixel 2 is cheaper but the camera is still good, if not better than the iPhone X

Many iPhone users are also curious about the Pixel 2 camera, which is still considered one of the best cameras on mobile. Both the iPhone and Pixel 2 phones are beautiful, but as mentioned above, Google phones have an advantage in price, but still in the top.

*Photos taken with Pixel 2 XL and iPhone X*

Looking at the image above, you can see that the iPhone X makes some details haunted, easily visible in street and building details. This is quite familiar because the iPhone often tries to make the image warmer. It also means that the color accuracy of iPhone X will be reduced.

## Overall, Android has more flexible customization capabilities

One of the factors that makes Android more appealing than iOS is that you can hide the application in the App Drawer. With the applications on the Home, you can move, arrange as you like. This is still Android's advantage for years in the battle between 'iPhone and Android'. With iPhone X, everything is easier to understand. Wouldn't it be nice to hide all applications and display OLED screens on a beautiful wallpaper?

Notice is also a plus point on Android. When you swipe down, you'll see all the notifications on the screen, this is where you manage all the notifications and the place to adjust basic settings like Bluetooth, Wi-Fi, battery,

flight mode . Much easier than iOS.
