

This is why you will choose AMD's latest 3rd generation Ryzen CPU instead of Intel chips

AMD: 'After we launched this new product, there was no reason for people to buy Intel chips anymore.'

At AMD's Next Horizon Gaming event on the sidelines of the E3 2019, AMD went on to introduce the Ryzen 3000, the product line it first introduced at Computex 2019 two weeks ago. This time, AMD confidently announced that its new 7nm processors are more powerful, more energy efficient, support better and stronger gaming performance in some tasks thanks to additional cores. compared to Intel chips.

Product manager Travis Kirsch of AMD believes that the latest 3rd generation Ryzen CPU line will beat Intel giant for the first time in years. He said: 'After we launched this new product, I don't think there is any reason for people to buy Intel chips anymore.'

THE 3RD GEN AMD RYZEN™ FAMILY

MORE CORES, MORE CACHE, MORE TECH

\$499 USD	AMD Ryzen™ 9 3900X	\$499 USD	Core i9-9900K
\$399 USD	AMD Ryzen™ 7 3800X	\$385 USD	Core i7-9700K
\$329 USD	AMD Ryzen™ 7 3700X		
\$249 USD	AMD Ryzen™ 5 3600X	\$263 USD	Core i5-9600K
\$199 USD	AMD Ryzen™ 5 3600X	\$224 USD	Core i5-9600

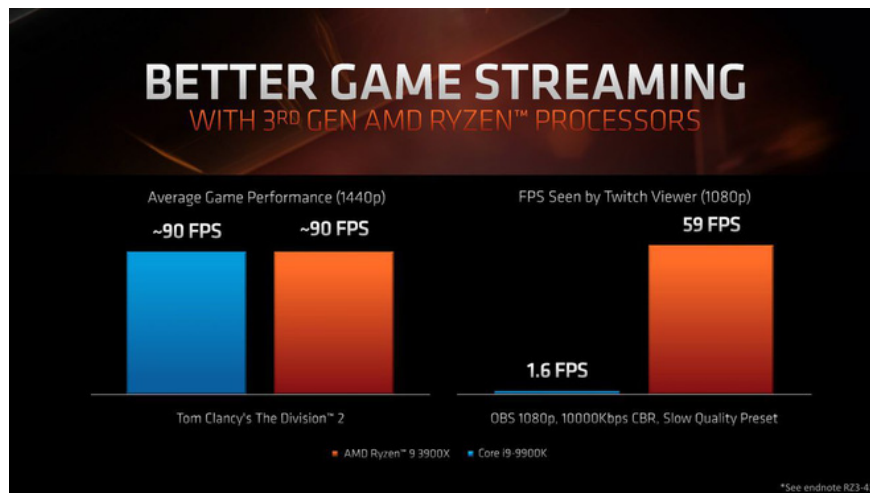

AMD RYZEN™ 9 3900X

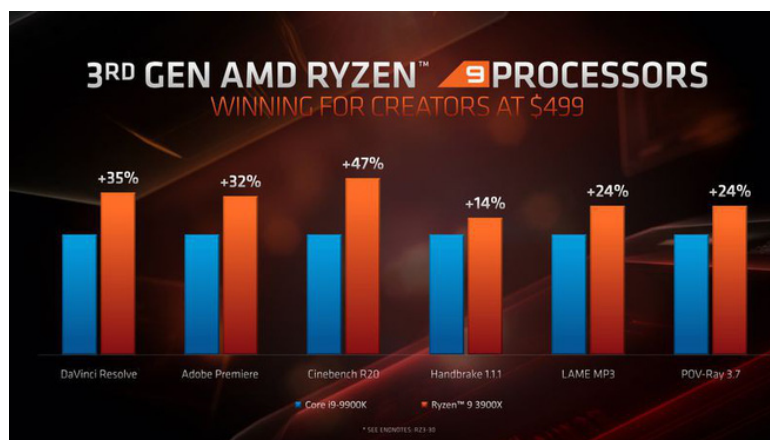

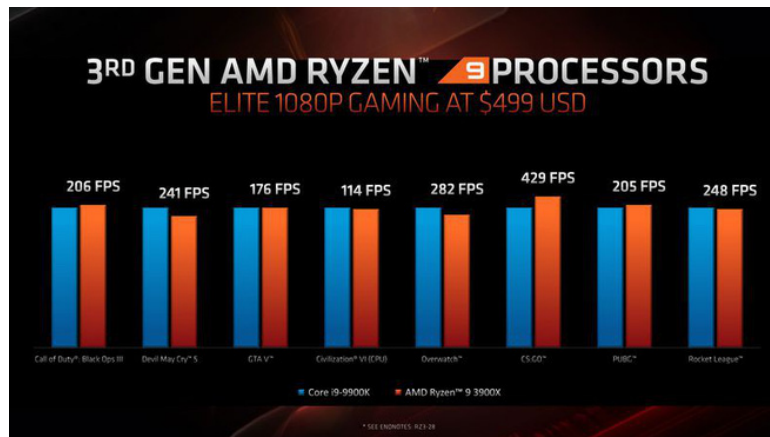

THE NEW DESKTOP PERFORMANCE LEADER

12 Cores 24 Threads	4.6 GHz Boost 3.8 GHz Base	70 MB GameCache	105W TDP
------------------------	-------------------------------	--------------------	----------

Microprocessors from Intel and AMD can play games with similar performance but in terms of livestream capabilities when playing games, AMD's processors are superior. It allows livestream users with extremely high image quality to viewers on Twitch or YouTube.

The Ryzen 3000 chips based on AMD's 7nm architecture will still support socket AM4 so users can comfortably upgrade the CPU without having to spend money to buy new motherboards.

Wraith Prism LED heat sink fans will be sold with high-end Ryzen 7 and 9 chips from AMD. This radiator fan supports the Razer Chroma light which can synchronize with the gaming mouse and keyboard colors.

The Ryzen 9 3900X CPU, the most powerful CPU in this new AMD series, is equipped with 12 cores, 24 threads, but is very affordable at just \$ 499, less than half of the 12-core Intel i9-9920X (\$ 1,189).

With these outstanding advantages, AMD is confident that its latest 3rd generation Ryzen CPU will attract consumers, especially gamers, to beat Intel, when the company has only designed it. 10nm chips.
