

This website allows users to view 3 new iPhones and many other smartphones in all angles

The 9to5Mac technology site recently shared a super-cool observation tool integrated on a website called Hotspot3D that allows users to view 360-degree 3D images of iPhone Xs and iPhone Xs Max.

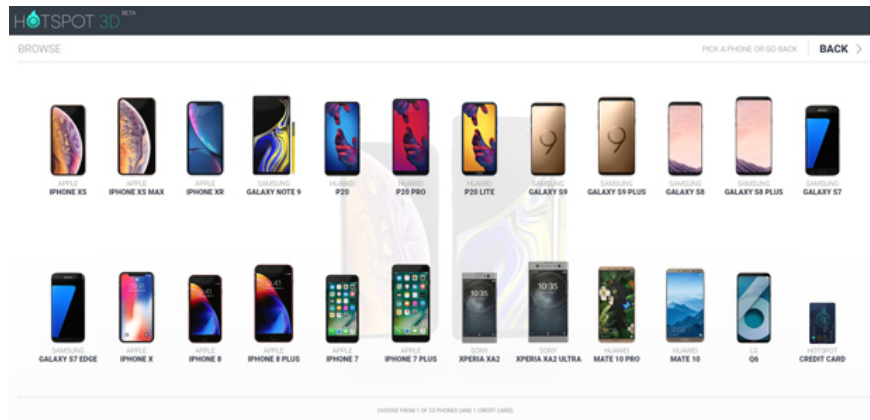

The 9to5Mac technology site recently shared a super-cool observation tool integrated on a website called Hotspot3D that allows users to view 360-degree 3D images of iPhone Xs and iPhone Xs Max.

In addition, with this tool, users can compare 360-degree 3D images of iPhone Xs and iPhone Xs with other high-end phones such as iPhone 8 Plus, Huawei P20 Pro, Samsung Galaxy S9, . or even change the colors of the iPhone Xs duo and other phones.

If you want to know what the new yellow iPhone Xs duo look like or how the iPhone Xr is designed, this tool can satisfy your curiosity.

This site has 23 different phone lines from Apple, Samsung, Huawei and other famous smartphone manufacturers. With extremely sharp and detailed 360-degree 3D images, users can compare from size to design with each other.

For those who intend to buy a pair of iPhone Xs and iPhone Xs Max or other smartphones, this is a great tool for them to have a more intuitive and detailed look at the product before deciding to buy.

Hotspot3D website was created by a group of developers from the Netherlands and was first introduced earlier this year. This website works both on Smartphone, to access this extremely useful website, please click on the link below:

1. Hotspot3D
