

# **This young man made a computer case with a tube of water, only costing 100,000 VND**

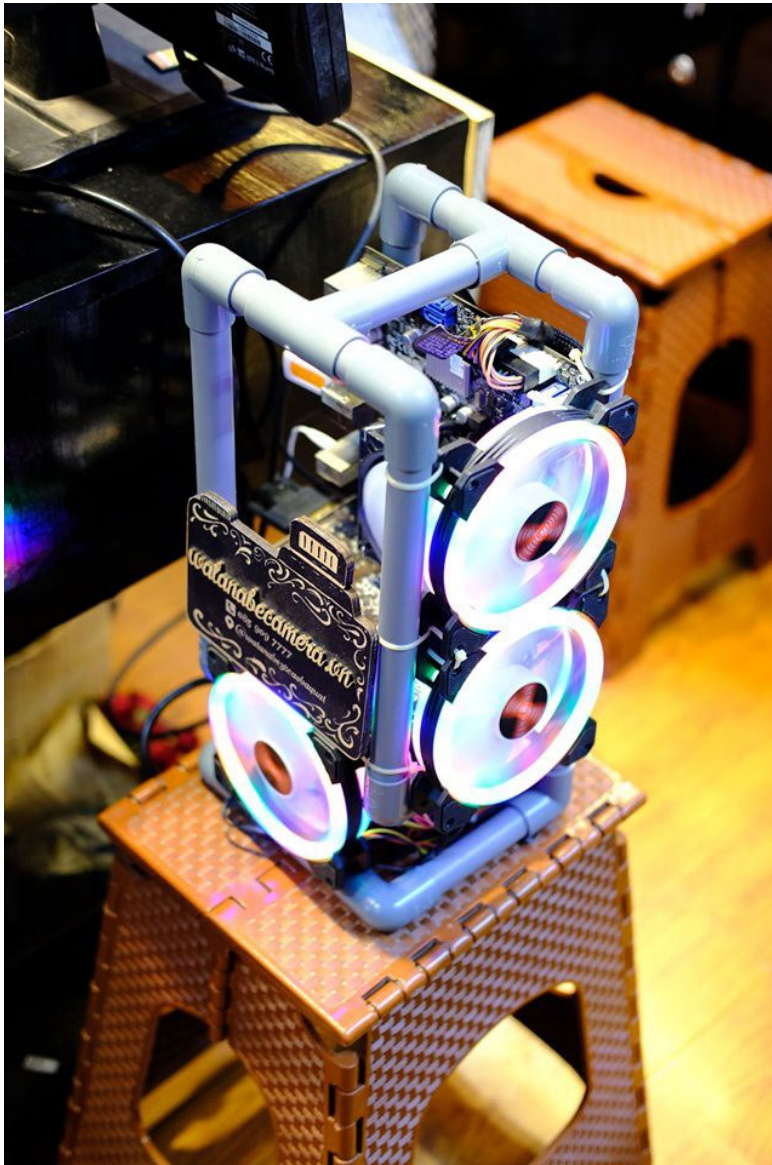

A guy from Hanoi showed off a computer with a homemade shell made entirely from plastic pipes that were super unique and surprisingly cheap.

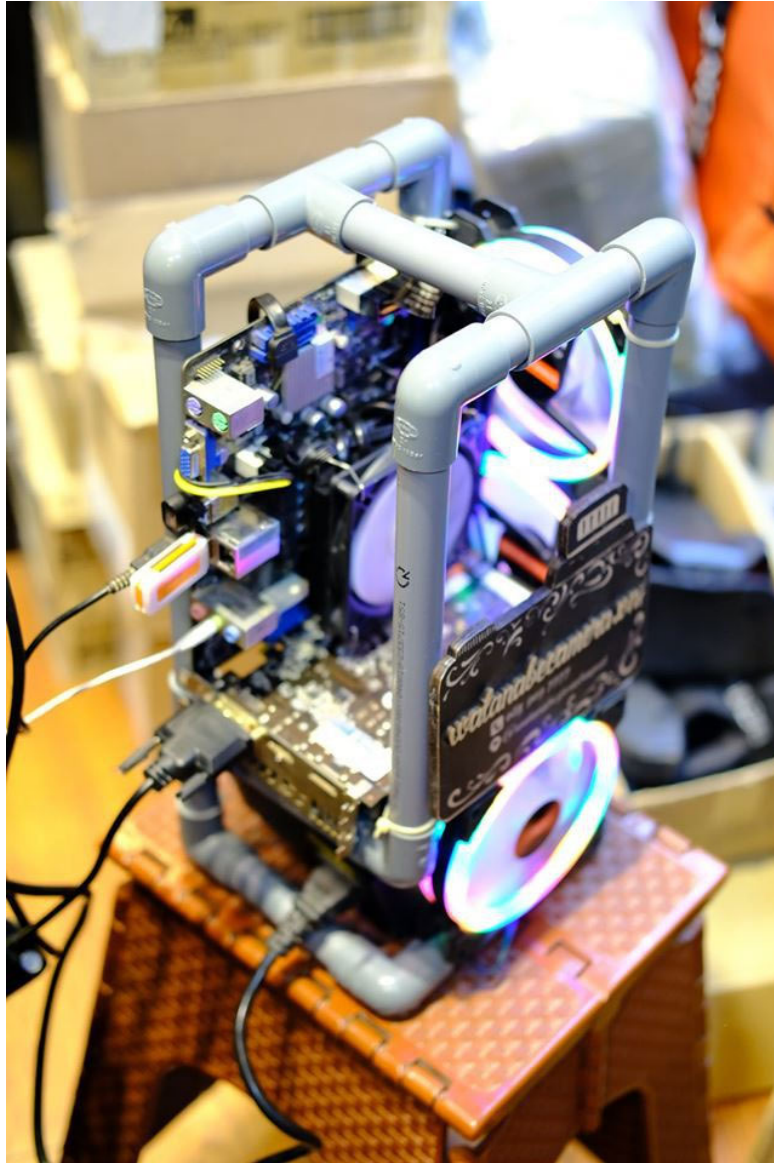

For many people, especially gamers, the case is an important detail that determines the "eye-catching" level of the computer and the personality, aesthetic eye of the owner. Currently on the market there are many different types of cases available, but you can also make your own case, unique style like this guy from Hanoi.

Specifically, recently a guy from Hanoi showed off a computer with a homemade shell made entirely of super-unique and surprisingly cheap plastic water pipes.

This guy said he wanted his computer to be light so that he could move from home to work and vice versa. Because he did not want to use a laptop, he came up with a product that could meet his usage needs. So, he went to buy plastic tubes and glue them to his liking.

The total cost for this super unique case is only 100,000 VND, only 1/10 of the normal type on the market.

This computer is used to render some light clips or play games. Its configuration is quite modest.

*Mainboard: Asrock H61 VG3*

*CPU: Intel Xeon E3 1230v2*

*Tản ID Cooling IS 40X*

*RAM: 4GB x2*

*VGA: AMD Radeon HD7730 2GB DDR5*

This PC is both compact and lightweight, meeting the needs for work, home easily of the owner, but the machine is 'exposed' too much, so it is a bit inconvenient and prone to foreign objects.
