Since the advent of iPhone, multi-touch technology has created a new wave for multi-touch screens. Single touch screens are no longer popular as before. Therefore, manufacturers have integrated multi-point technology onto new products and laptops without exception.

ThinkPad T400s

Belonging to the business notebook, the T400s has a super slim design (only 2.1cm thick) and super light (less than 1.8kg in weight). Users can use four fingers on the T400s' 14.1-inch capacitive touchscreen to adjust sound, screen brightness, links to programs or bookmarks .

Its screen has a resolution of 1,440 x 900 pixels, 16:10 standard, using LED technology should save 30% of power consumption compared to LCD screens and does not use substances harmful to the environment. Buyers can choose brighter screens, suitable for outdoor use and add an anti-reflection layer that helps to see clearly both indoors and outdoors.

Configuration of the T400s is quite strong: 2.53GHz Intel Core 2 Duo CPU (standard voltage) and discrete graphics card; SSD hard drive up to 128GB or HDD HDD 250GB; DVD burner or Blu ray drive 9.5mm thin; Connect Ethernet, WiFi and WiMAX (optional), WWAN, Bluetooth and super broadband connection. It has two USB ports and a shared USB / e-SATA port, ExpressCard / 34 port, VGA port, and DisplayPort.

In addition, the T400s is equipped with Active Protection System shock protection, the ability to detect vibrations when using the machine on vehicles and automatically switch to the appropriate operating mode. It is secured by fingerprint scanner and hard drive data encryption built-in with secure TPM chip. T400s have a starting price of VND 34 million.

Toshiba Satellite M505 Touch

This is one of the first two models of Toshiba multi-touch computer running on Windows 7 operating system. Users will now have more ways to interact with the computer, such as viewing photos, browsing the web or playing games. Without using a keyboard, you can drag or drop, scroll, zoom in, zoom out the selection or back up data from one drive to another, just touch the screen.

To better support users when using touch screen on Windows 7 platform, Toshiba also preinstalled with applications with friendly touch interface such as Bulletin Board to manage and display media content, ReelTime supports searching and viewing files quickly. Both are very easy to use, all operations can be done through the touch gestures of the fingertips.

The M505 has a 14-inch HD HD TruBrite® LED Backlit TFT LCD Touch screen, using 2.2GHz Intel Core 2 Duo T6600 CPU, maximum 8GB RAM, 500GB HDD, Intel GMA 4.500MHD integrated graphics, drive Optical DVD format to swallow disc, with 6 cell battery. The device is fully equipped with communication ports, including two USB, one eSATA / USB, 5-in-1 card reader, HDMI video output. Additional S / PDIF audio jacks with 10/100 Ethernet LAN connections and WiFi 802.11 b / g / n.

The M505 has a starting price of VND 20 million. In addition, consumers can choose 13.3-inch Satellite U505 Touch with similar configuration and features for VND 18.5 million.

Acer Aspire 1420p

If anyone often has to bring a super-light multi-touch computer with them, the Aspire 1420p will be a good choice. The Aspire 1.420p is used as a photo frame, a portable cinema, a presentation tool, or simply a laptop!

The ultraportable tablet has a unique design with a metal texture just above the keyboard and a hinge to convert laptops into Tablet mode. The device weighs only 1.5kg, with three colors black, red and blue, equipped with touch screen touch 11.6 inches, resolution of 1366 x 768 pixels.

Aspire 1.420p also uses Windows 7 operating system. It owns a configuration of ultra-portable ultraportable laptop with Intel CULV processor, 4-8GB Ram memory, 250-320GB hard drive and chip Intel GMA 4.500MHD integrated graphics. In addition, it has a card reader that supports various formats, Gigabit Ethernet, 802.11b / g / n, Bluetooth and other mobile connectivity options including UMTS / HSPA / HSDPA / GSM / GPRS / EDGE, There are three USB ports, integrated HDMI, VGA, webcam video outputs.

Not only multi-touch screen, the touchpad of the device also supports multi-touch, making it easy for users to zoom in or zoom out the viewing area. Using the 6 cell 5.600mAh battery, the Aspire 1420p allows users to use it continuously for eight hours. The price is about VND 16 million.
