

Timemark - Time-stamped photo app

Timemark is an application that allows you to take a photo and display all relevant information about the photo, including time, date, exact location using GPS coordinates, company logo, altitude, etc.

What is Timemark?

Timemark is an app that allows you to take a photo and display all relevant information about the photo, including time, date, exact location with GPS coordinates, company logo, altitude, etc. This way, you can provide convincing proof that the job was completed or ensure you have more details about the project or field report.

Outstanding features of Timemark

No registration, no login and no ads

You don't need to sign in to use Timemark. No need to provide a phone number, email address, or any other information like that. And, unlike most similar apps, Timemark is also ad-free. So you can use the app freely without being bothered by annoying ads. However, the app does have a Pro mode, which allows you to store more photos and automatically back them up to Google Drive .

Add as much information as you like to your photo

There are several different templates available, allowing you to add details to your photos in a variety of styles. The most important part is deciding what information you want to display. By default, you'll see your exact location (via GPS), along with the date and time, but you can also add your logo, elevation, device, weather, coordinates, and more.

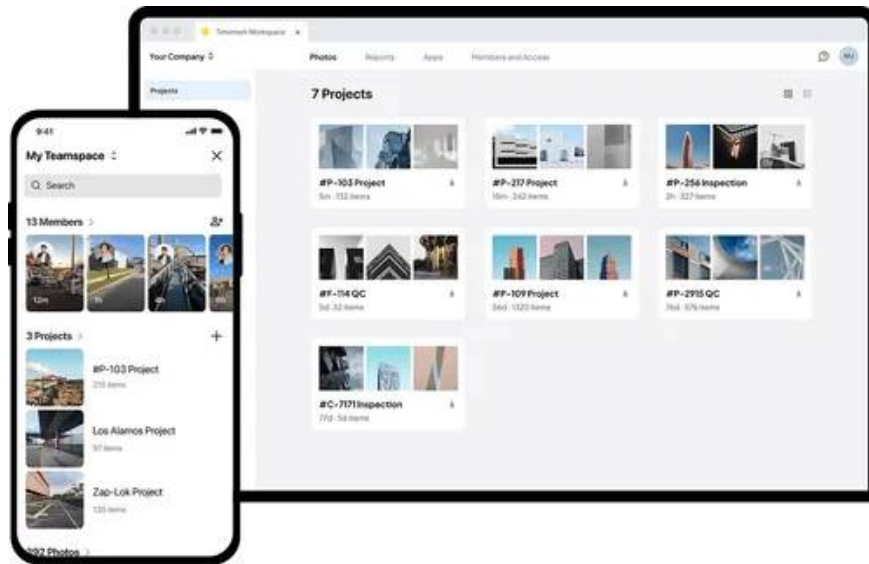

Perfect for a variety of industries

Timemark is especially useful for professionals. For example, in the construction industry, this app allows you to keep a complete record of all progress, recording the exact time each job was completed. Small and medium-sized business owners, on the other hand, can take photos with their own logo and contact information automatically added. Delivery drivers also have a much more convenient way to confirm deliveries.

Add every detail to the photo

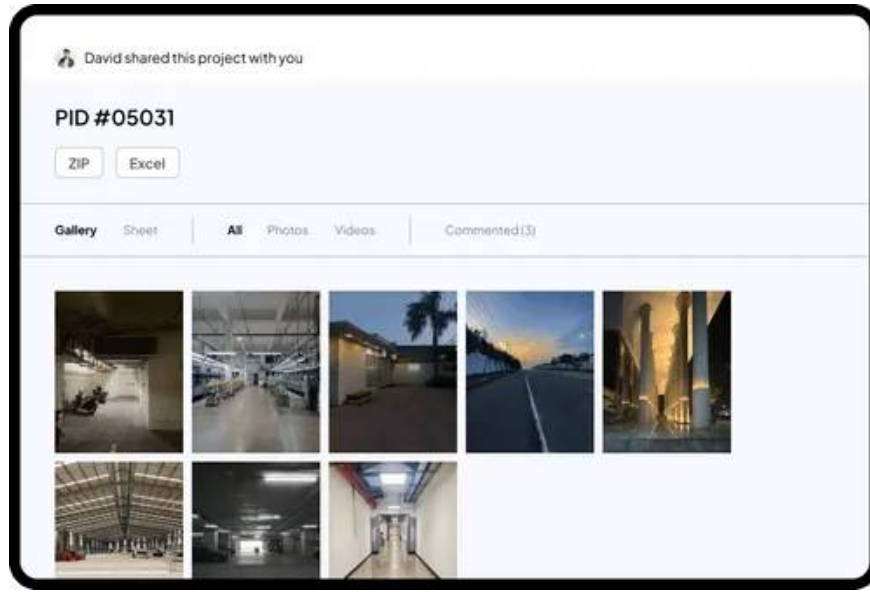

Download the Timemark APK if you need to add information to your photos regularly. This app gives you access to dozens of different templates, all of which are perfectly tailored to your needs. The app is also very easy to use and ad-free.

Keep everything organized and in sync

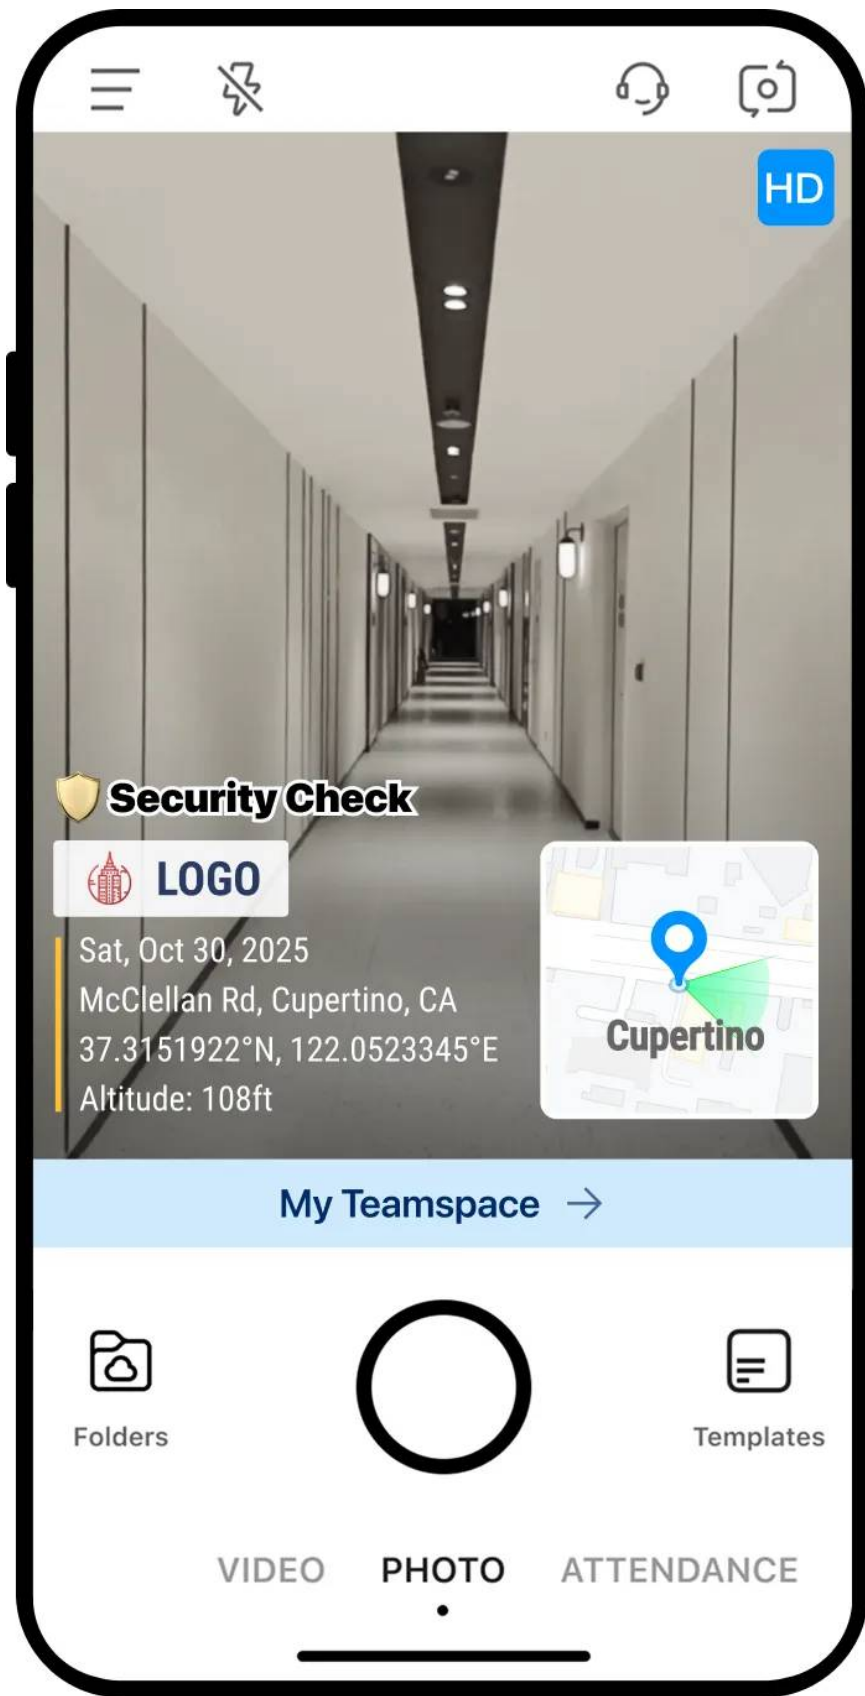

1. **Centralized Cloud Storage** : All work photos and videos are automatically stored in one cloud center, with no risk of losing files or missing photo submissions.
2. **Automatic organization** : Photos are named and sorted by project, team member, and date, and can be viewed on a map, timeline, or sheet for easier work tracking.
3. **Field and office connectivity** : Everything captured in the field is instantly accessible in the office, and offline work documents automatically sync when back online.

Send reports in minutes

1. **Flexible export options** : Easily export photos and work reports in formats like Excel, ZIP , PDF , or shareable links.
2. **Smoother Collaboration** : Reduce email clutter by sending neatly organized reports in a single export.
3. **Reliable and accurate profiles** : Timestamps, GPS data, and notes are automatically recorded with each photo, minimizing human error.

No doubt. No dispute.

1. **Customizable** : Automatically add important scene details with built-in watermark templates or by creating your own.

2. **Unalterable Proof** : Timemark locks timestamps, verifies GPS location, and provides a unique identifier for photos that is fully traceable and tamper-proof.
3. **Fast, maximum detail** : Capture high-quality photos even from a distance, at lower resolutions, and offline.
