

# Tip to save all images in Word file out

Want to save all the images in your Word file, but having too many images takes you too long? Follow the following article to know how to save images in Word files out extremely quickly.

To **save all the images** in your Word file out, first you need to open the Word file. Then select the File tab on the ribbon toolbar.

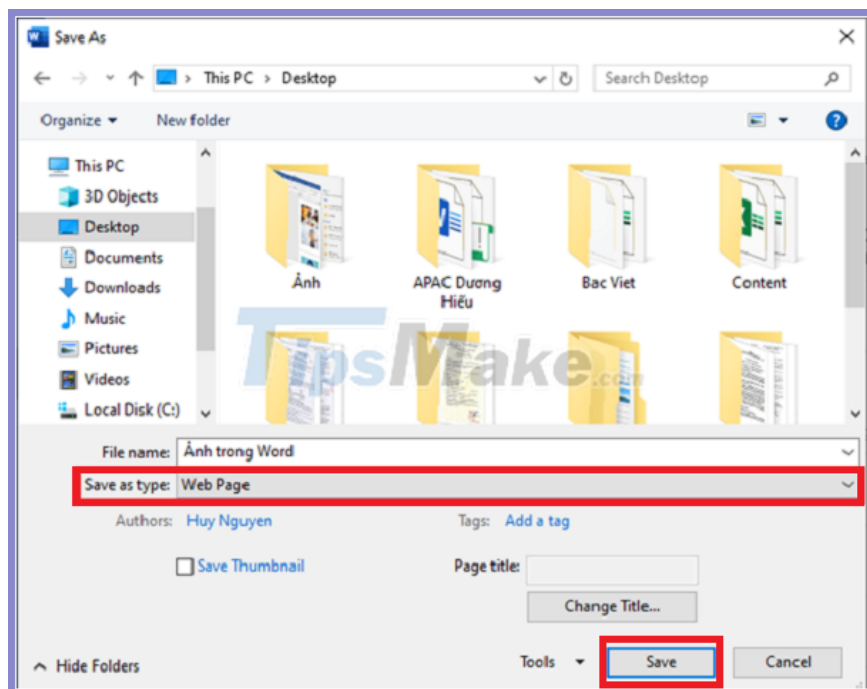

Next, you choose **Save As** in the list on the left. Then select **Browse** to choose a **save location**.

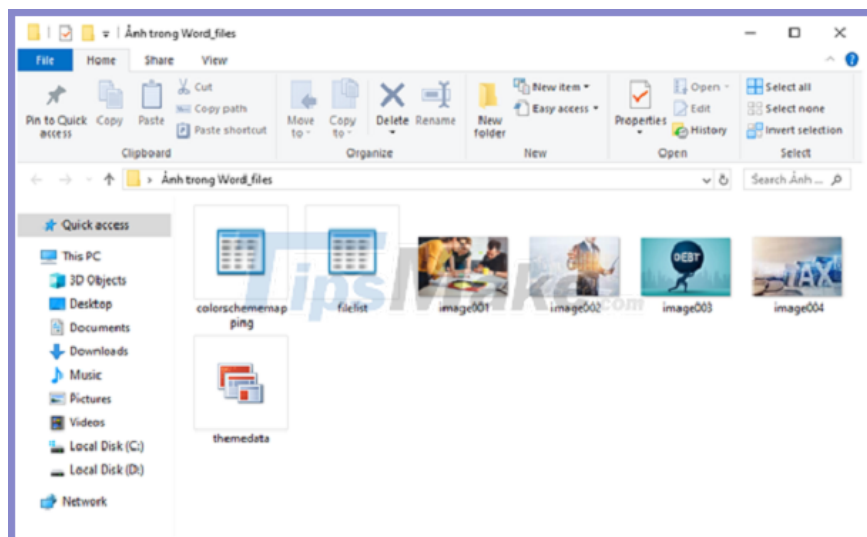

At this time, the **Save As** window appears. You proceed to name the folder and choose the location to save. Then you click on Save as type. Scroll bar appears, you select **Web Page**. Finally, click Save to Word to save the

image in your Word file out.

After you have finished clicking **Save**, you navigate to the location earlier and choose to save the folder. You can see a new folder with all the images in your Word file there. It's quick, isn't it.

Thus, the above article has guided you to quickly save all images in your Word file.

Hope the article will be useful to you in the working process.
