

Tips for playing Airborne Kingdom for beginners

Tips to play Airborne Kingdom for beginners, Tips to play Airborne Kingdom gamers need to know to make their cloud kingdom the most powerful.

Airborne Kingdom is an innovative, exciting city building game with a focus on strategy and management. Players will control a town center, continue to develop it. The main goal is to collect inhabitants and become the last kingdom in the sky. The indie title from The Wandering Band is filled with nuanced gameplay details and aspects.

Participating in a game as complex as Airborne Kingdom requires a lot of patience as well as a time investment. Players will find much to love about this game and there's no pressure to do anything in a hurry while playing. However, there are still some tips and tricks to help gamers grasp the game faster. Refer to the following Airborne Kingdom game tips to make your cloud kingdom the most powerful.

Tips for playing Airborne Kingdom for beginners

Don't skip the instructions

This may seem obvious, but a lot of players rush to jump straight into the game without learning anything about its mechanics.

Simply put, don't skip the tutorial, although the game doesn't always provide the relevant information in a timely manner, it can always be turned on by anyone at the touch of a button. Be sure to read through each point in the guide to understand your basic goals at each point.

Resources play an important role

All empire building and strategy management games consume a lot of resources and Airborne Kingdom is no exception. Resources are needed for almost every aspect of the game, from building new structures to keeping the city aloft.

Early in the game, the best way to gather resources is to go through forests on the ground. After building the first pylon, gamers can send many people and planes to collect forest resources to continue building. The kingdom's available resources are trackable at the top of the screen.

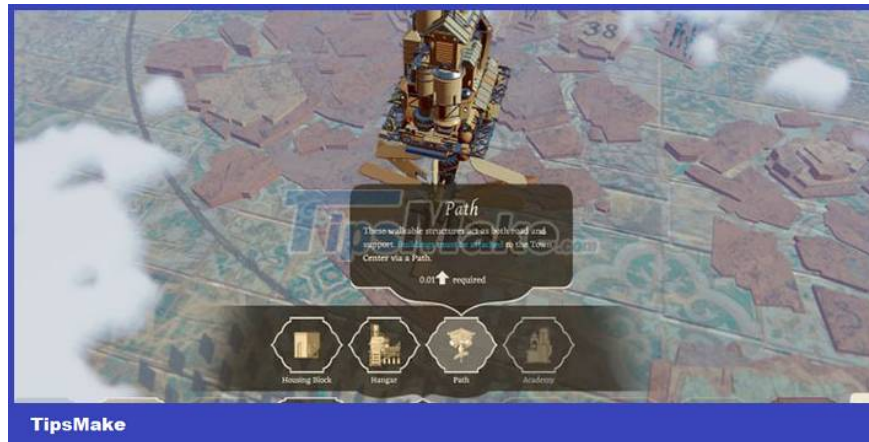

Pay attention to weight balance

One of the gameplay mechanics that make Airborne Kingdom interesting is that players must constantly be mindful of balancing the floating kingdom's weight. Gamers are required to keep an even weight distribution on all sides of the build.

Fortunately, when starting to build new buildings, the game will indicate whether the kingdom is tilted in a certain direction and how much. This mechanic almost turns Airborne Kingdom into a puzzle game.

Build roads

Everything in this game needs to be connected through roads. Since it's literally building a flying kingdom, gamers need to make sure to build the correct roads throughout their kingdom. Roads don't take a lot of resources so people don't have to worry about this aspect when building.

A good idea to keep in mind with roads is to be symmetrical. If the walkway is built on one side, do the same on the opposite side to ensure proper balance, to reduce tilt.
