

Tips for playing Naruto Shippuden: Ultimate Ninja Storm 4

Naruto Shippuden: Ultimate Ninja Storm 4 or Naruto Storm 4, is the final game in the Ultimate Ninja Storm series, with a unique amount of content across various game modes, including Story and Adventure modes.

As soon as entering the game, people may wonder how to get through the modes in the best way. If you have trouble starting the game, let's learn the tips for playing Naruto Shippuden: Ultimate Ninja Storm 4 below.

Tips for playing Naruto Shippuden: Ultimate Ninja Storm 4

Play story mode first

Story Mode is the first thing that will appear on the mode selection screen when starting the game and is really what a beginner should start with.

The first battles are easy enough that everyone can get used to the controls, although practice can still be done in Free Battle. In addition, Story Mode will provide an interesting story that includes the end of the story of the Naruto Shippuden saga and some of the unlocks available in the game.

Most importantly, the adventure mode in the game acts as a follow-up to the story mode, as it can reveal some content.

This may not be a problem for someone who has watched the anime or read the manga, but for those who only play games it will be quite a problem.

After passing the story mode, gamers can switch to more difficult modes like Survival and Tournament, to better prepare for online battles.

Careful use of alternative Jutsu

For those who are new to the series, one may soon find that it is very difficult to avoid being attacked by long combos.

This is where the substitution comes into play, as it will allow to avoid combos, while opening the way to the opposite attack. As soon as the opponent is about to strike, whether it is the first attack or part of a combo, press L2 or the corresponding button on the platform, to use the alternate jutsu, place your character right behind the opponent .

This allows the player to create attacks quite quickly, but also remember, there is no infinite alternative jutsu. Always look out for the orange bars below the health and chakra that allow 4 alternate moves.

It is dangerous to use them all, as players should stock up on at least one hit to escape when stuck in a long combo. To avoid this, try not to use them all at once, instead split them up throughout the match, giving time to refill the bar.

Always keep chakra charged

Chakra will play a very important role in battles, at least when facing tougher opponents. The chakra gauge is found just below the health bar, colored blue.

Performing certain attacks will require the use of a specific amount of chakra, and without it leaves the character vulnerable to button presses but nothing really happens.

Honestly, the best time to charge up chakra is usually after performing a special move that can take down an opponent. Quickly try and charge as much as you can and keep the watch at least half full at all times.
