

Tips for converting audio messages to text on Instagram

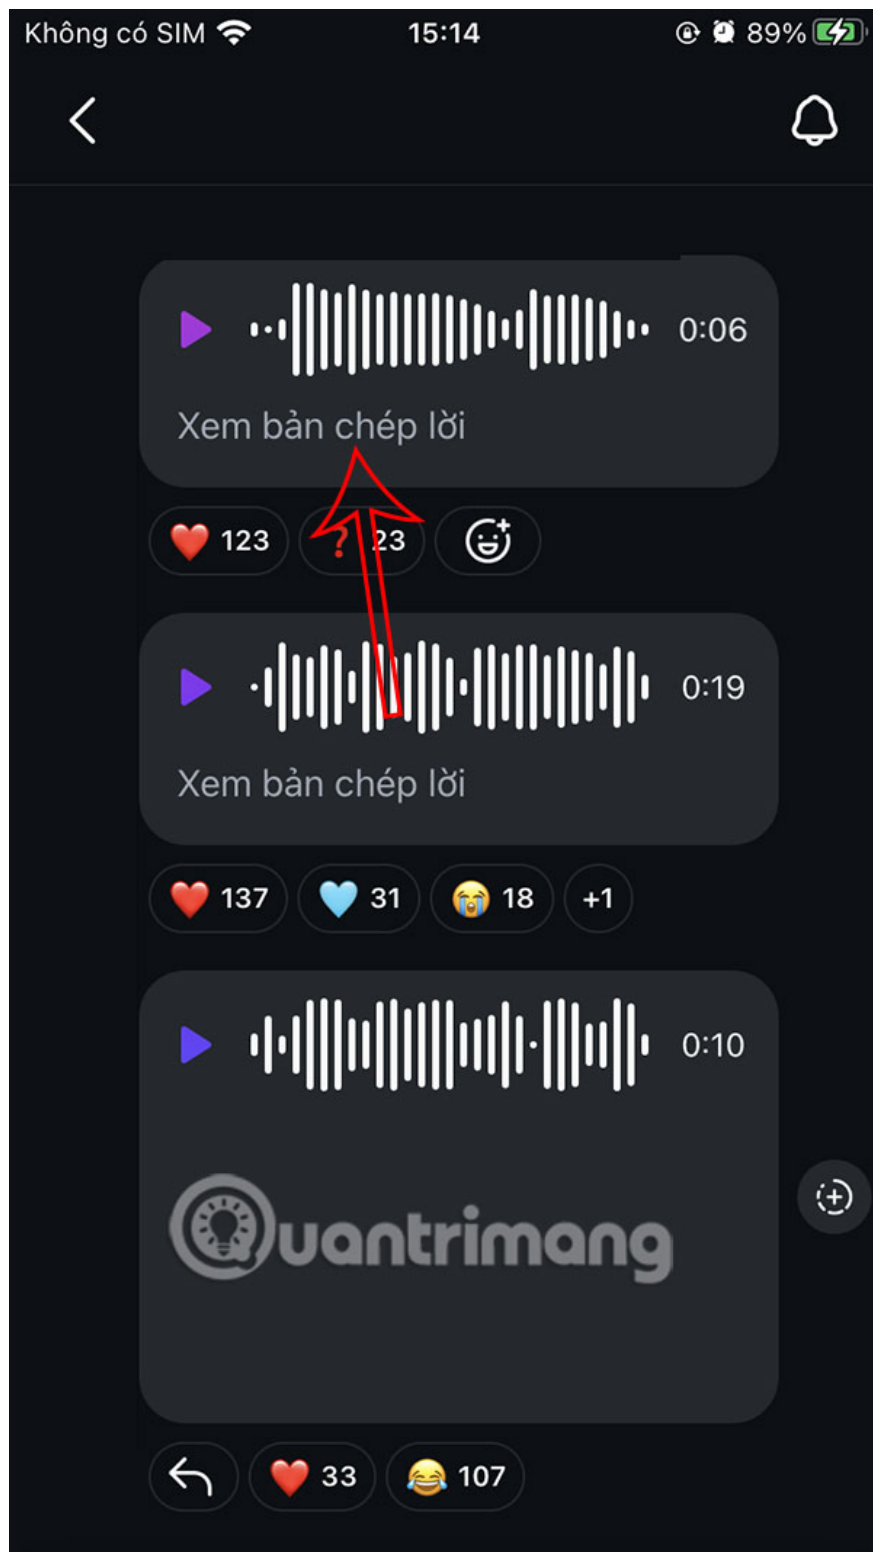

Instagram has just updated a very useful feature that converts audio messages to text with just 1 simple tap.

Instagram has just updated a very useful feature that converts audio messages to text with just one simple tap. The application uses AI to classify the voice content and then converts it into a translated voice message so that you can read the content, in case you cannot listen to the audio message on Instagram. Here is a guide to convert audio messages to text on Instagram.

How to Convert Audio Messages to Text on Instagram

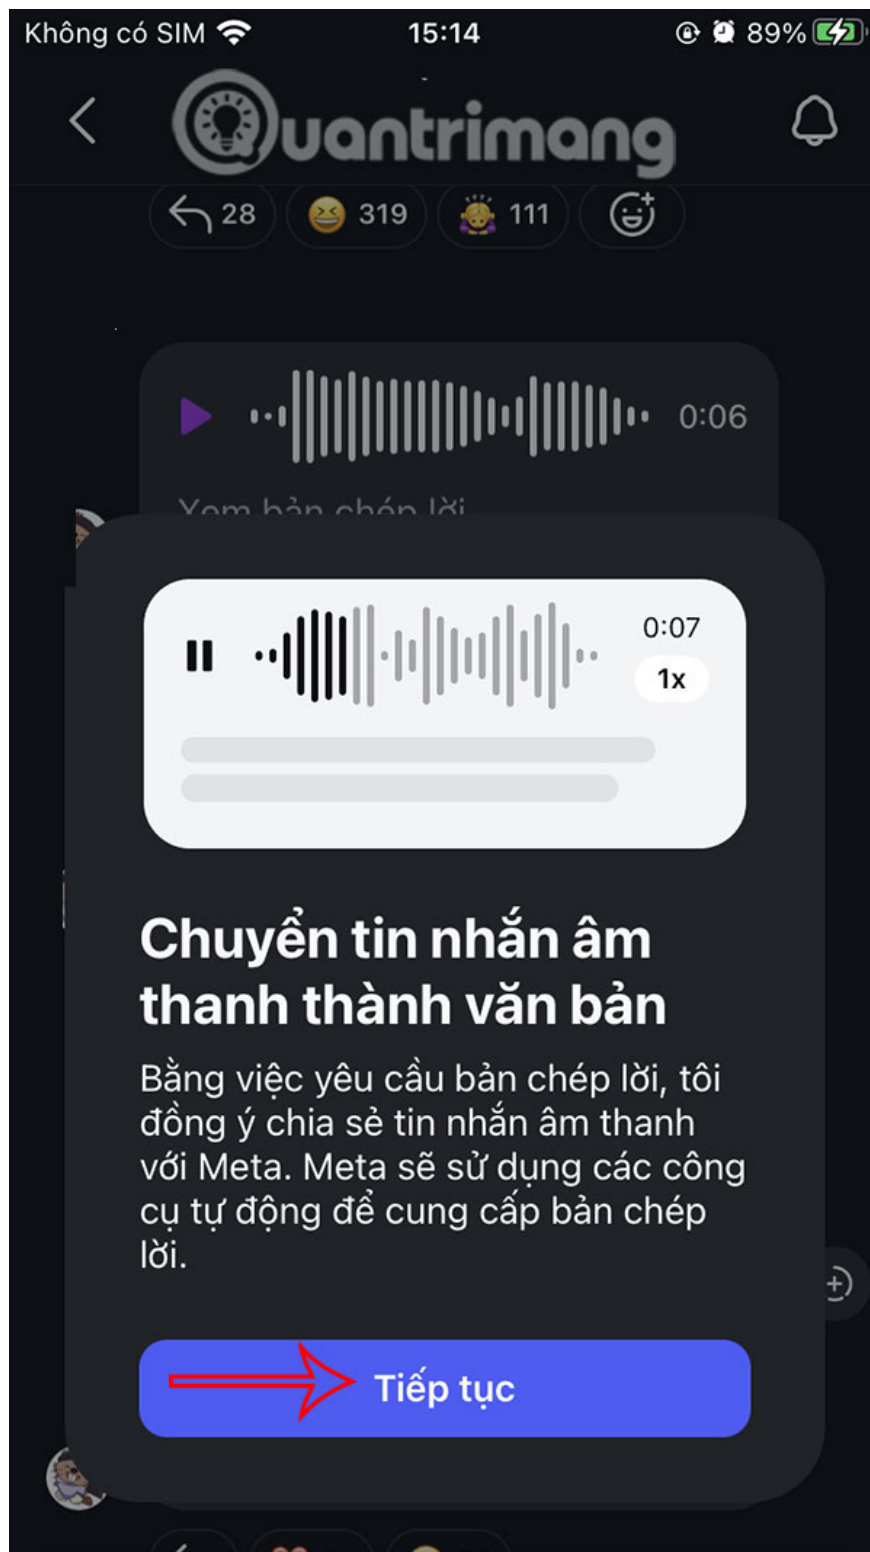

Step 1:

You access the messaging interface on Instagram and then tap on the chat on the app with the audio message. In the messaging interface, you just need to **tap View transcript** to do it.

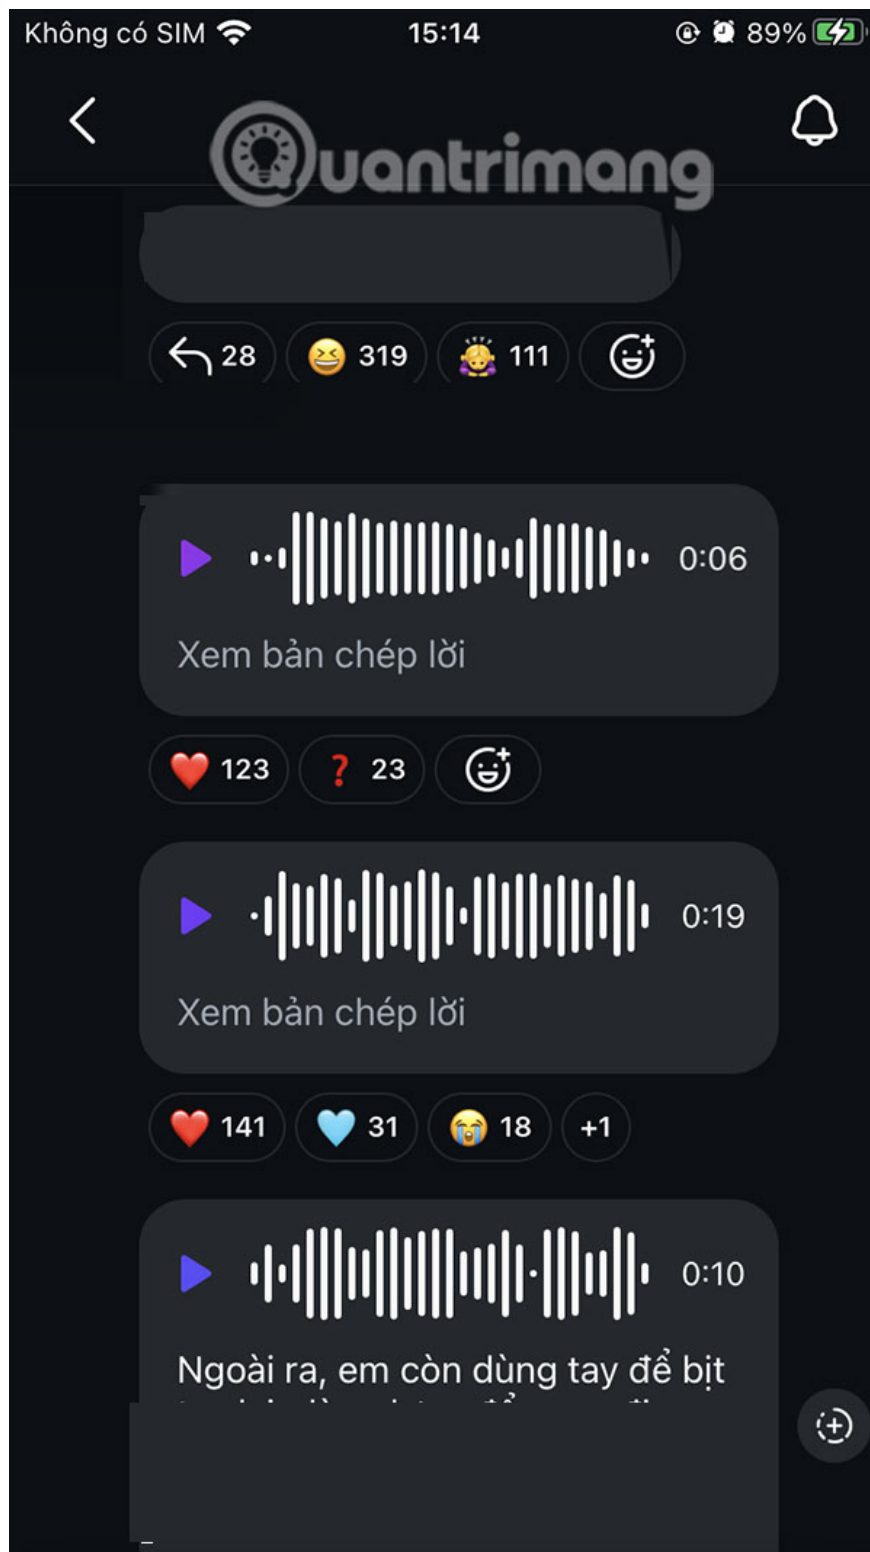

Step 2:

Displays a notification about the voice chat to text message feature for the first time use. Click Continue to proceed.

Step 3:

The result is that you will see the text message converted from the audio message on Instagram for you to see the content. In general, the audio message to text message converter on Instagram cannot be 100% correct, word for word, but it also follows the content of the voice message, and you can still understand the content of the voice message that is being conveyed through the message translation on Instagram.
