

# Tips for turning off suggestions in Excel, disabling the prediction feature in Excel simply

The content suggestion feature in Excel helps quickly enter similar content into the spreadsheet. However, sometimes this feature can be inconvenient. In this article, we will show you how to turn off suggestions in Excel.

For example, we have a data table as shown below. Because the name Hoang Hai Minh is already in the table, when we enter Hoang H, Excel will automatically suggest that the rest of the data is Hoang Hai Minh as the name above. This will cause inconvenience if the name you want to enter is not Hoang Hai Minh. Please follow these steps to turn off this feature.

	A	B	C	D	E	F
19	18	Nguyễn Đức Hiếu	Nam	266 Phan Bội Châu-Phạm Hồng Thái-HB	24/03/1998	7
20	19	Phạm Gia Huy	Nam	2A Trần Hưng Đạo-HVT-HB	28/09/1997	195
21	20	Nguyễn Minh Huyền	Nữ	8 Ngõ 771 Nguyễn Bình Khiêm-Đông Hải I-HA	22/01/1994	311
22	21	Bùi Công Khanh	Nam	4/2 Trần Quang Khải-HVT-HB	05/10/1988	202
23	22	Nguyễn Hoàng Lâm	Nam	137 Đinh Tiên Hoàng-Hoàng Văn Thu-HB	15/07/1989	120
24	23	Văn Tiến Long	Nam	10 Lãn Ông-Phan Bội Châu-HB	19/02/1990	339
25	24	Hoàng Hải Minh	Nam	6 Ngõ Lý Nam Đế-Minh Khai-HB	21/02/1993	341
26	25	Hoàng Hải Minh	Nam	274 Phủ Thượng Đoạn-Đông Hải-HA	23/10/1986	220

## Suggested shortcut steps in Excel are simple

**Step 1:** First, click the **File** tab on the toolbar.

**Step 2:** Next, click **More** in the lower left corner of the screen. Then you select **Options** .

**Step 3:** At this point, the Excel Options window appears. You select the **Advanced** tab in the left menu. Then in the **Editing options** section , uncheck the **Enable AutoComplete for cell values** box . Finally, click **OK** to complete the installation. With just a few simple steps, you have successfully turned off the content suggestion feature in Excel. From now on, when you enter the same data, Excel will no longer automatically suggest the next part of that data.
