

# Tips for using emoji right in Chrome browser

The Emoji utility helps improve the experience of using emojis for the browser, with quick access and many different emojis right in the browser.

Although Windows 10 and 11 have the Win+ shortcut. to insert emojis into any application, but many people want to expand emojis, making them easier to use regardless of any version of Windows. The Emoji utility helps improve the experience of using emojis for the browser, with quick access and many different emojis right in the browser. Below are instructions for adding emoji to the browser.

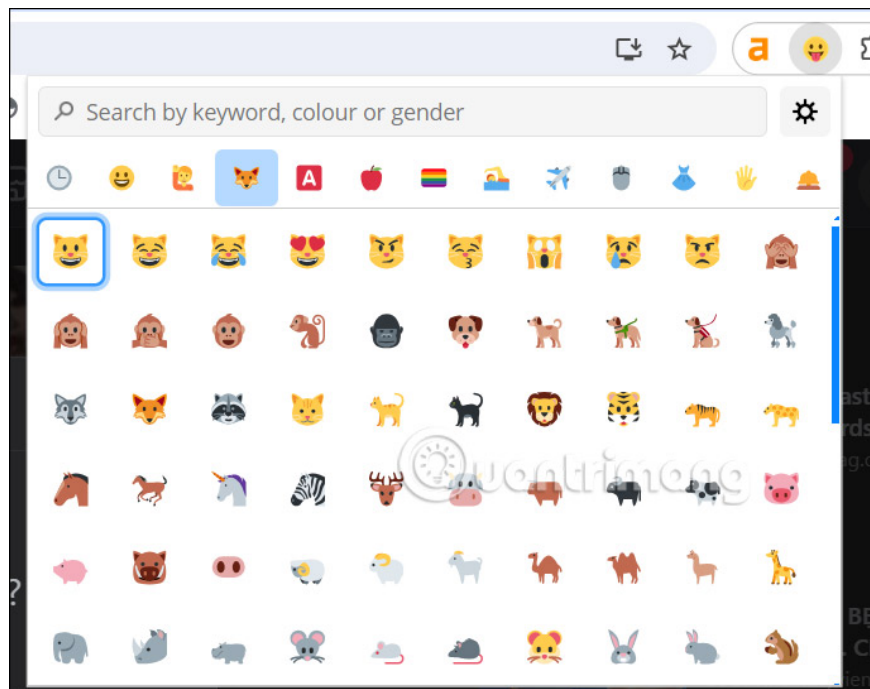

## How to add emoji to Chrome browser

### Step 1:

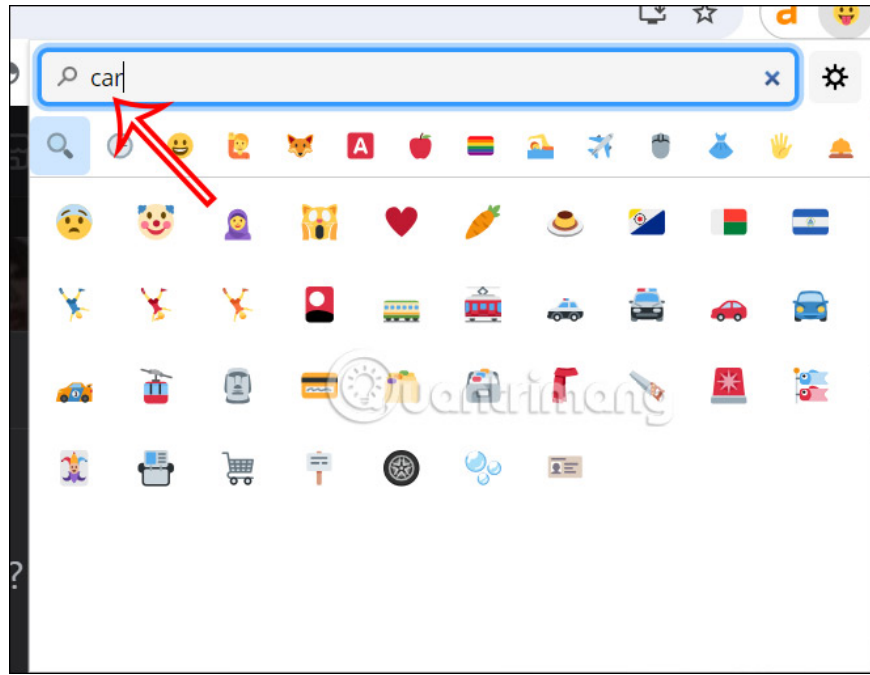

You can access the link below to install the Emoji utility for your browser.

### Step 2:

After you successfully install the utility, you will see the Emoji icon displayed in the address bar. Click on this icon to search for emoji.

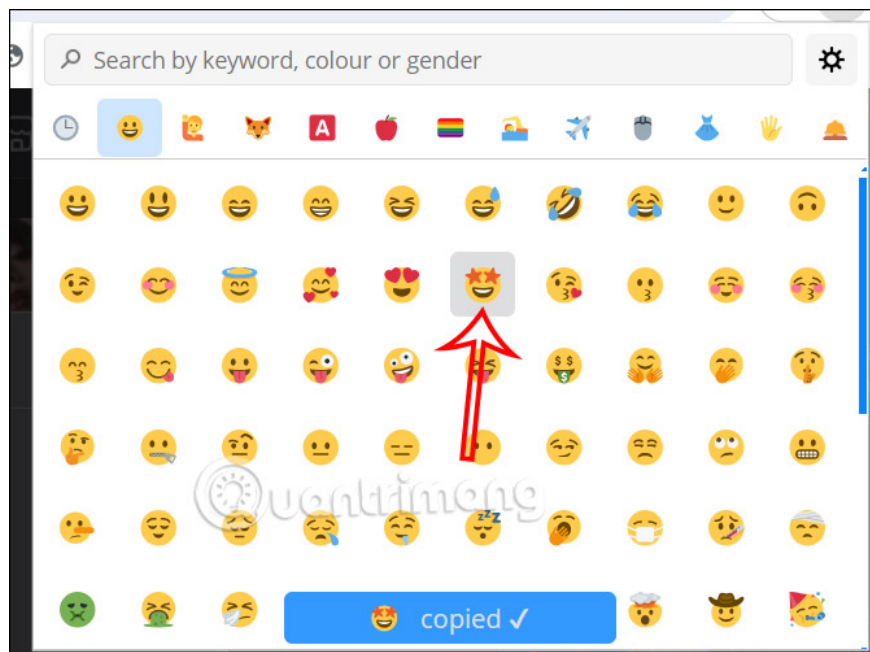

We can **enter keywords into the search bar** to quickly find the emoji we want.

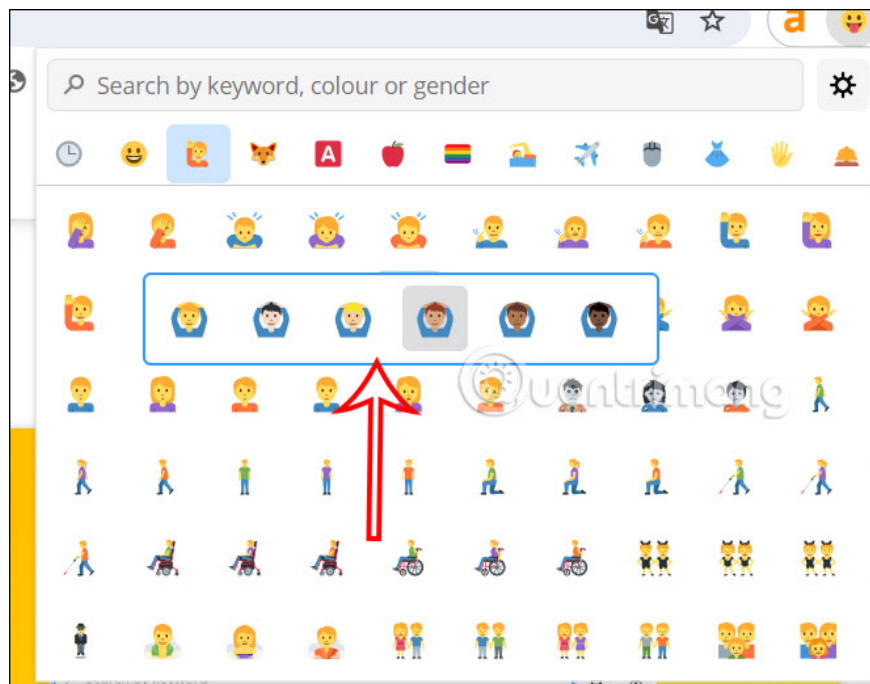

### Step 3:

To use emoji from the widget, just **click on the emoji to copy** from the table and paste the widget into any interface you want.

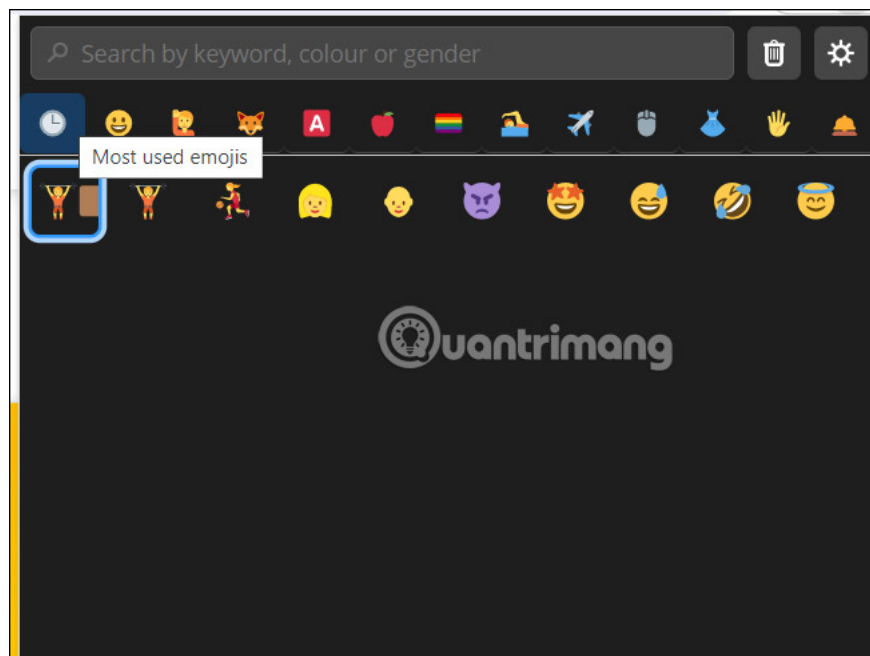

### Step 4:

Some **emoji templates also have the option to change color**, **right-click on the emoji** and you will see the option to change color as shown below.

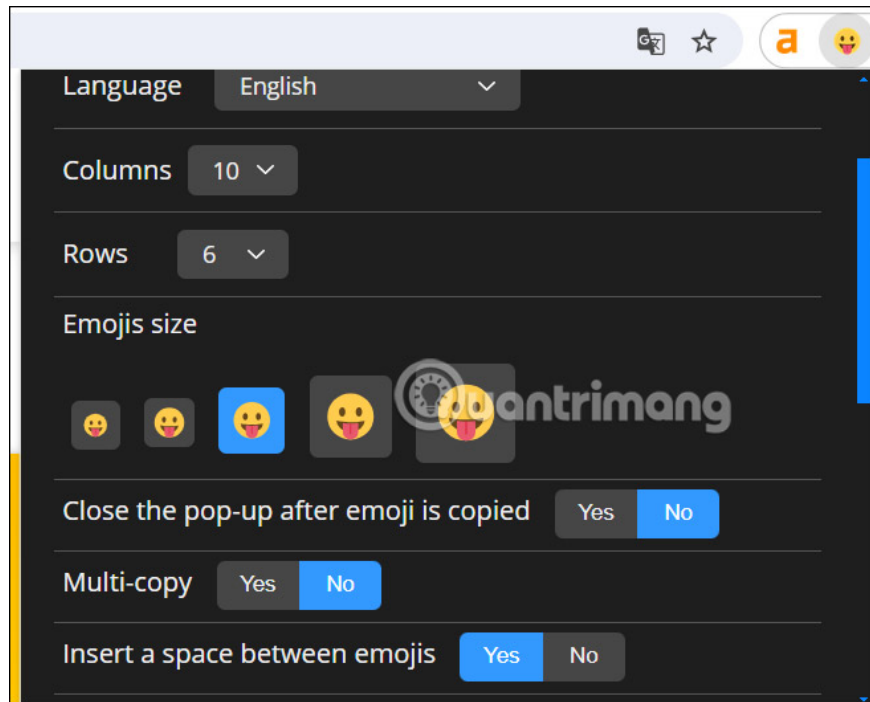

All used emojis are saved as a history for you to use immediately with frequently used emojis. If you want to delete any emoji, click on the trash can icon to delete.

### Step 5:

Click **the gear icon** to access the settings interface for the Emoji utility. Here you can adjust the number of emojis displayed in the interface, change the display size of emojis to make them easier to see,.
