

# Tips for using Spicetify to change the interface and install utilities for Spotify

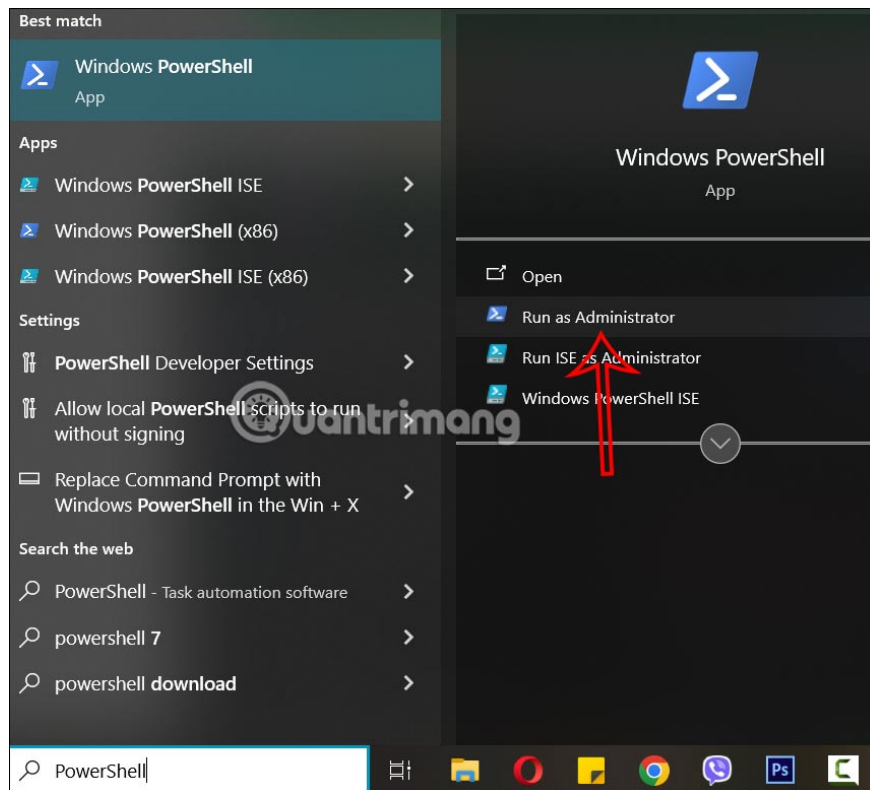

The Spicetify tool brings many utilities to change Spotify's interface such as blocking ads, optimizing functions, beautiful music listening themes,...

Below are instructions for using Spicetify to change the Spotify interface.

## Instructions for installing Spicetify Marketplace

### Step 1:

At the interface on your computer, **enter PowerShell** in the search bar and then **click Run as administrator** as shown below.

### Step 2:

In the displayed interface, enter the command below and press Enter to run the command **iwr -useb https://raw.githubusercontent.com/spicetify/spicetify-cli/master/install.ps1 | iex** then press Enter.

```
Select Administrator: Windows PowerShell
Windows PowerShell
Copyright (C) Microsoft Corporation. All rights reserved.

Try the new cross-platform PowerShell https://aka.ms/pscore6

PS C:\Windows\system32> iwr -useb https://raw.githubusercontent.com/spicetify/spicetify-
cli/master/install.ps1 | iex
```

A red arrow points to the command line in the terminal window. A watermark for 'uantrimang' is visible in the bottom right corner of the terminal window.

### Step 3:

You will now see a **warning not to run the script as an administrator** . Press **N** to continue installing Spicetify.

```
Administrator: Windows PowerShell
Windows PowerShell
Copyright (C) Microsoft Corporation. All rights reserved.

Try the new cross-platform PowerShell https://aka.ms/pscore6

PS C:\Windows\system32> iwr -useb https://raw.githubusercontent.com/spicetify/spicetify-
cli/master/install.ps1 | iex
Checking if your PowerShell version is compatible... > OK
Checking if the script wasn't ran as Administrator... > ERROR
WARNING: The script was ran as Administrator which isn't recommended
Do you want to abort the installation process to avoid any issues?
[Y] Yes [N] No [?] Help (default is "Y"):
```

A watermark for 'uantrimang' is visible in the bottom right corner of the terminal window.

### Step 4:

You will then receive a prompt whether you want to install Spicetify Marketplace or not. Press **Y** to continue and Spicetify Marketplace will be installed.

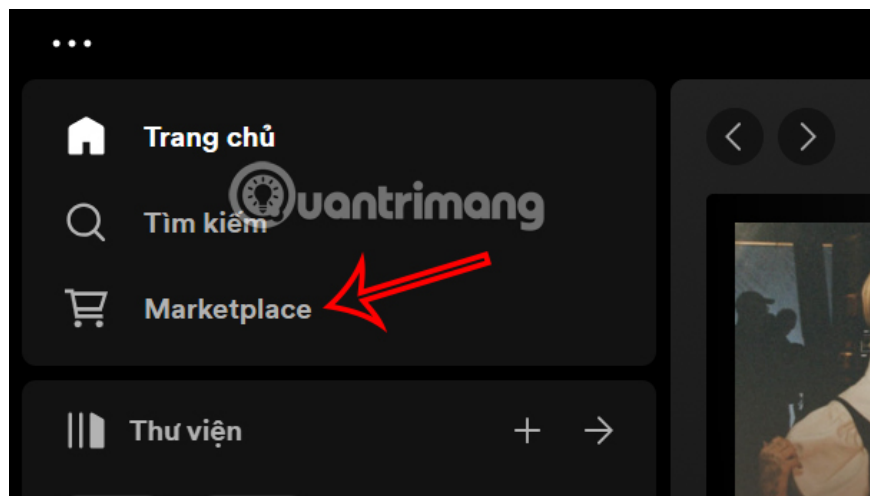

So we have installed Spicetify on the computer.

```
Windows PowerShell
[Y] Yes [N] No [?] Help (default is "Y"): Y
Starting the spicetify Marketplace installation script..
Setting up...
Removing and creating Marketplace folders...
Downloading Marketplace...
Unzipping and installing...
success Config changed: custom_apps = marketplace
... Run "spicetify apply" to apply new config
success Config changed: inject_css = 1
... Run "spicetify apply" to apply new config
success Config changed: replace_colors = 1
... Run "spicetify apply" to apply new config
Downloading placeholder theme...
Applying...
success Config changed: current_theme = marketplace
... Run "spicetify apply" to apply new config
spicetify v2.36.12
... Spicetify up-to-date
Backing up app files:
Extracting:
Preprocessing:
... Fetching remote CSS map for newer compatible tag version: main
```

## Instructions for using Spicetify to change the Spotify interface

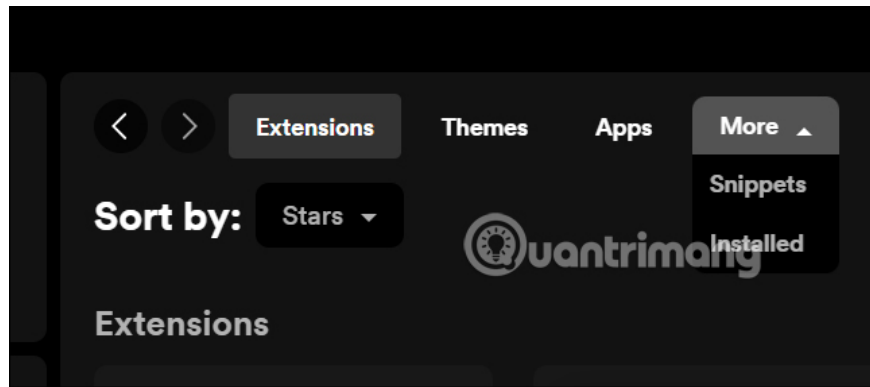

### Step 1:

You reopen Spotify and you will see **the Spicetify Marketplace icon** as shown below.

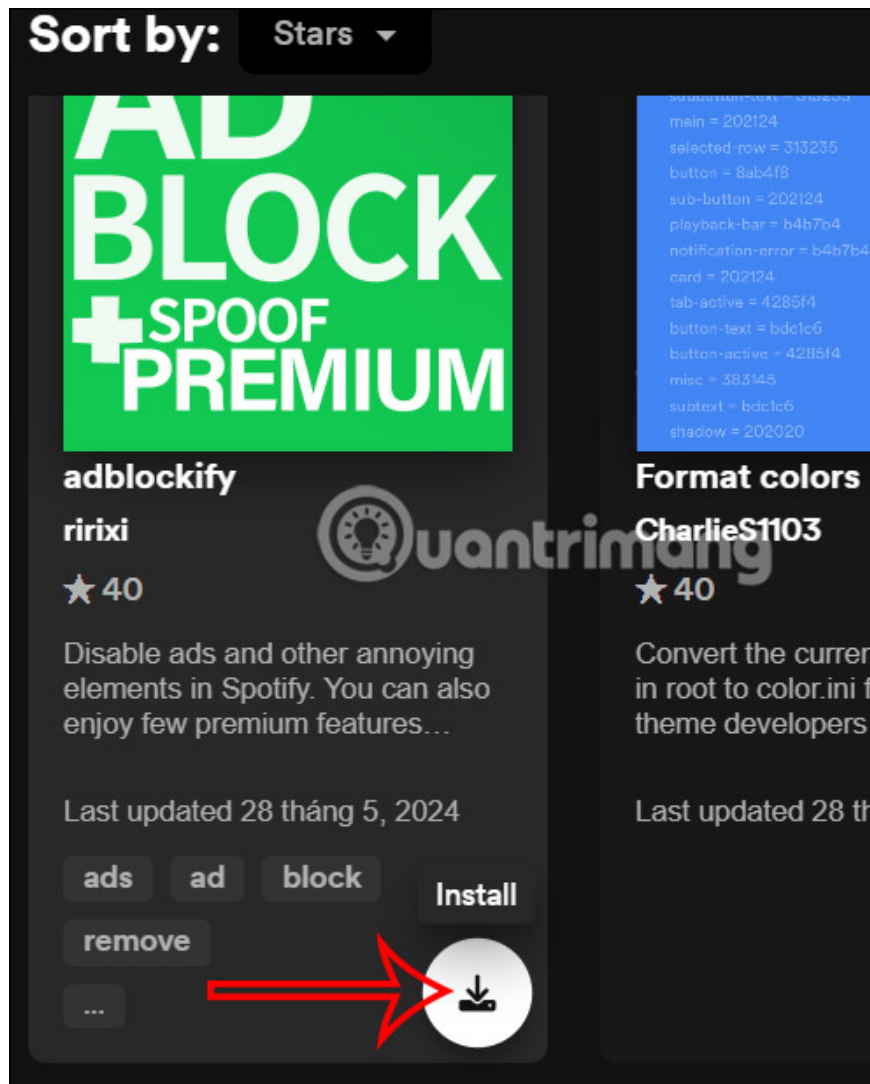

### Step 2:

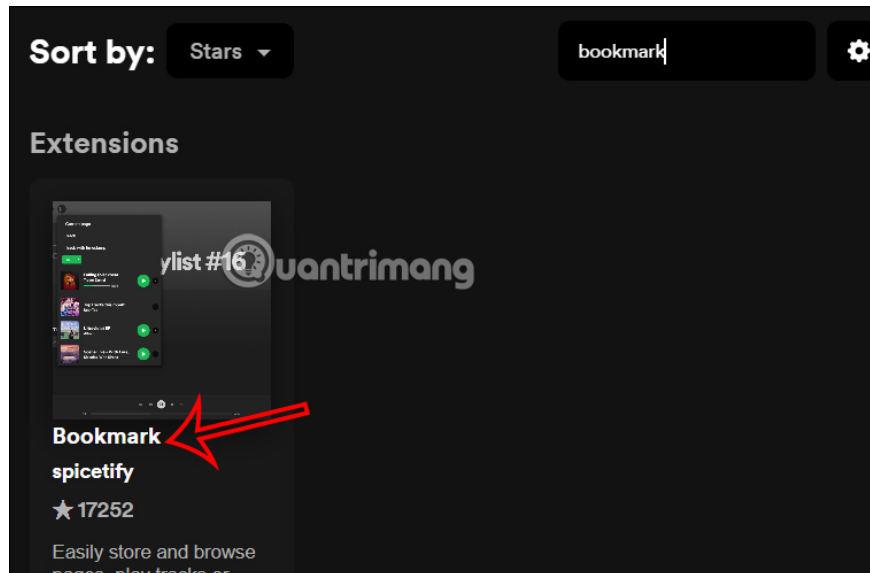

Here you will see the available items in Spicetify to change the appearance on Spotify. First, **click on Extension** to see the installed utilities.

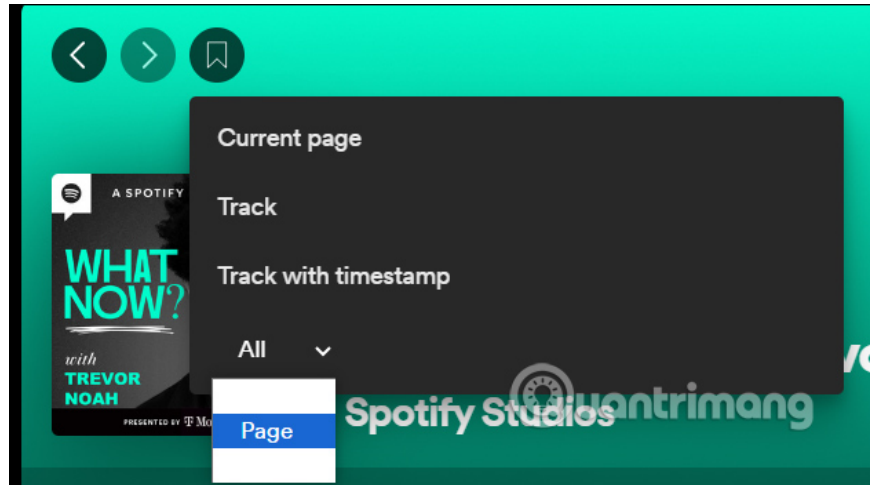

For example, with the Adblockify ad blocking utility, you click on **the download icon** to install Spotify.

You can **enter utility keywords in the search bar** to quickly find the utility you need. With **the Bookmark utility**, you can easily store any Spotify page for later viewing or bookmark songs.

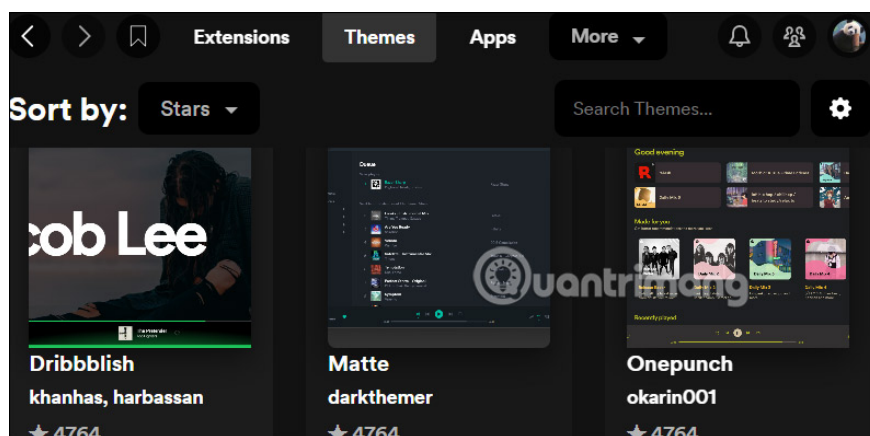

You can click **the bookmark icon** to save the content you want to bookmark on Spotify.

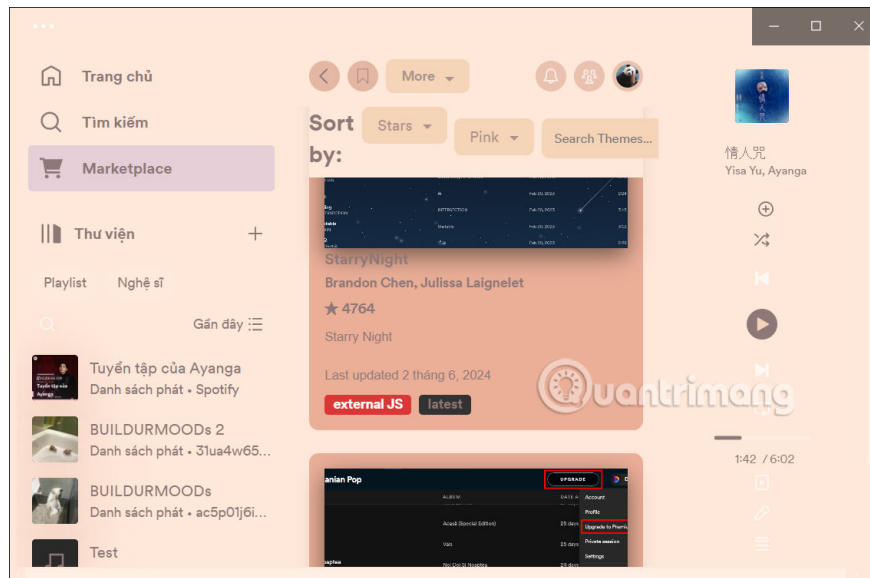

**Step 3:**

Next, **click Themes** to install the theme for Spotify.

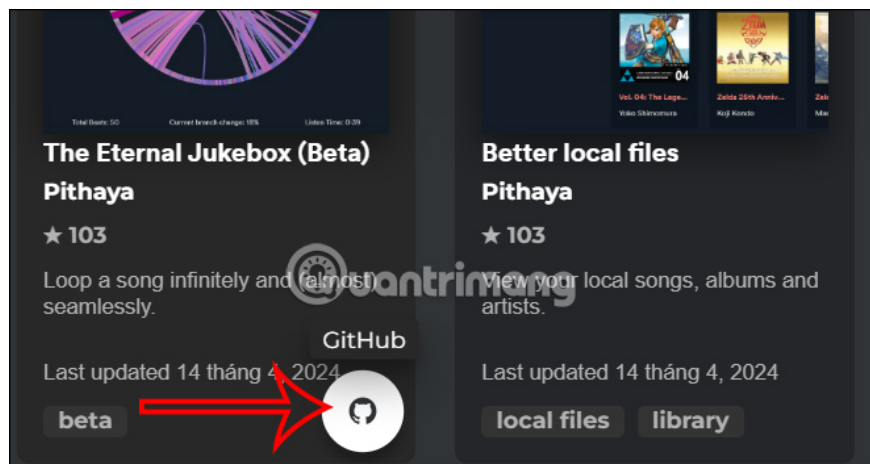

You can change the music listening interface on Spotify to your liking.

#### Step 4:

To install the application on Spotify, click on **Apps** then find **the application you need to install** . Click on **the GitHub icon** to open the page.

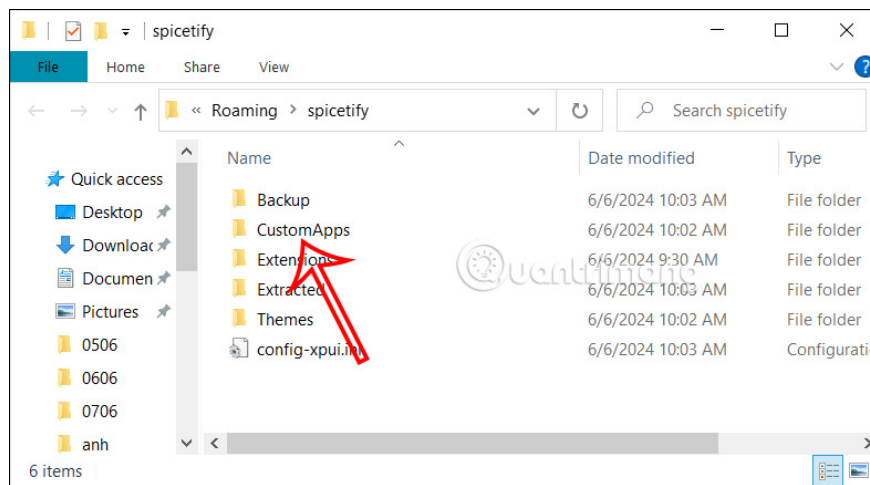

We continue **to open the Powershell interface** , then **enter spicetify config-dir** and press the Enter key.

```
Windows PowerShell
Copyright (C) Microsoft Corporation. All rights reserved.

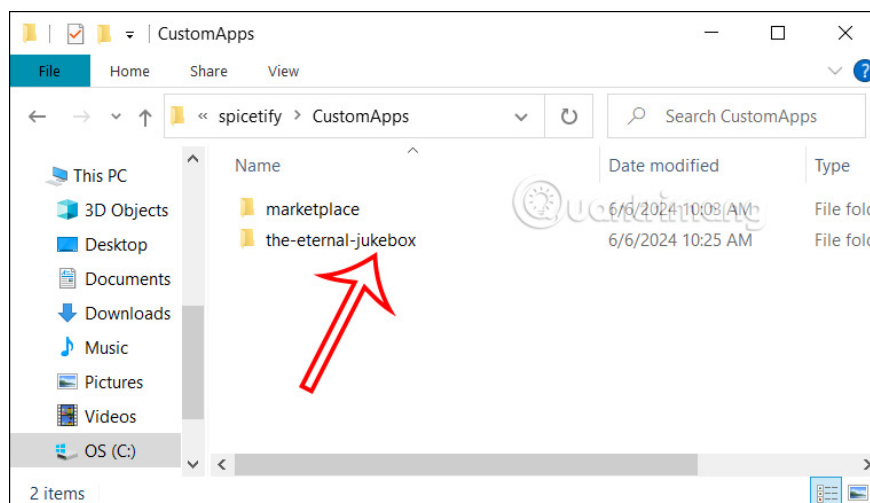

Try the new cross-platform PowerShell https://aka.ms/pscore6

PS C:\Users\Dell> spicetify config-dir
```

Display **the folder on your computer** , click on **the CustomApps folder** .

Here you need to **create a folder with the name of the application you want to install** as shown below.

Back in the **GitHub interface** , you **download the custom application file from the GitHub page** , then **unzip** and **copy it to the application folder** you created earlier.

## Eternal Jukebox

1. Run `spicetify config-dir` to open the spicetify folder.
2. Go to the `CustomApps` folder.
3. Create a `eternal-jukebox` folder.
4. Download the custom app files as a zip from [here](#).
5. Extract the zip and put the files inside the folder you created in step 3.

Then, run the following commands:

```
spicetify config custom_apps eternal-jukebox
spicetify apply
```

Return to the **Powershell window** and type **`spicetify config custom_apps eternal-jukebox`** and press Enter.

```
Administrator: Windows PowerShell
Windows PowerShell
Copyright (C) Microsoft Corporation. All rights reserved.

Try the new cross-platform PowerShell https://aka.ms/pscore6

PS C:\Windows\system32> spicetify config-dir
PS C:\Windows\system32> spicetify config custom_apps eternal-jukebox
```

Continue **entering the spicetify apply command** and press Enter.

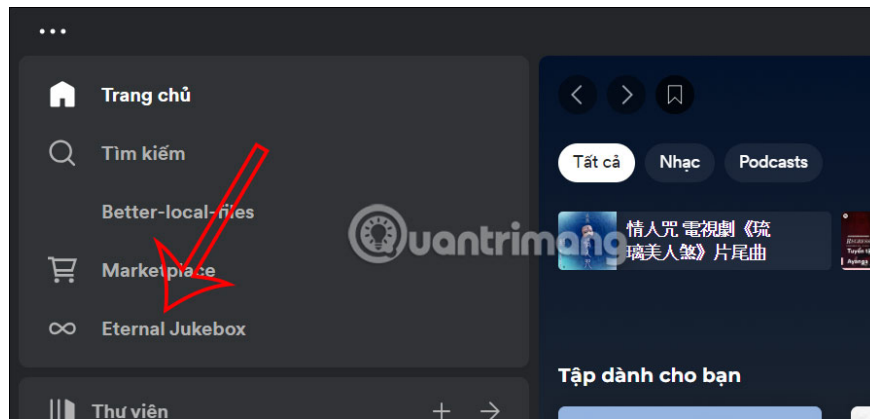

```
Administrator: Windows PowerShell
Windows PowerShell
Copyright (C) Microsoft Corporation. All rights reserved.

Try the new cross-platform PowerShell https://aka.ms/pscore6

PS C:\Windows\system32> spicetify config-dir
PS C:\Windows\system32> spicetify config custom_apps eternal-jukebox
success: Config changed: custom_apps = better-local-files|marketplace|eternal-jukebox
Run "spicetify apply" to apply new config
PS C:\Windows\system32> spicetify apply
```

Then Spotify automatically restarts to install the application.

To delete an application installed on Spotify, open the application folder and delete the folder you created for the application. Then rerun each of the above commands and press Enter after each command.
