

# Tips to collect a lot of gold in Piggy GO

Tips to collect a lot of gold in Piggy GO, Tips to play Piggy GO help gamers collect a lot of gold to easily build a rich and strong empire

By combining multiple playstyles, Piggy GO creates an unpredictable gaming environment. Developed by Forever9 Games, this mobile game will bring a lot of fun.

However, Piggy GO can also be a bit overwhelming for new players, for example too many colors can be confusing, having trouble collecting gold and leveling up.

In this article, let's learn Piggy GO tips to help gamers easily build their own richest and strongest empire ever.

## Use Autoplay to roll the dice

When playing Piggy GO, players will be rolling the dice all day. In other words, the piglet will move along the board when the dice are thrown. The higher the number received, the longer the pig will move on the chessboard. So luck will be the most important factor when playing this game. But there are certain methods and tricks that can help you collect more gold.

For example, players should enable Autoplay as soon as possible. By tapping on the big dice icon at the bottom of the screen and holding it for a few seconds, the auto mode will be activated. Thus, the dice will roll without direct intervention. As long as there is a turn, Autoplay will help roll the dice quickly. Thanks to this, the piglet will travel to many locations in a short period of time, allowing to collect a lot of gold.

## **Invest in cities to unlock new locations**

Besides a chess board and a pair of dice, players will have a lot of other options in Piggy GO. For example, people will have the opportunity to develop cities and make them great. To perform such an action, people need to spend gold on each upgrade.

To invest, tap the Build option (hammer icon). By visiting this area, the player can invest in the reconstruction of the city. The gold spent here will improve the defense of the city with a lot of options to invest.

## **Repair the first airship**

To conquer the world and expand your empire, gamers will have to be able to travel. Therefore, repairing the airship should be a top priority when starting Piggy GO.

Airship will take players to different cities, allowing to collect tons of coins. However, to repair the airship will require a certain amount of gold. Raid other players' areas to accumulate a considerable amount of gold.

## **Teleport to other cities to earn more money**

After repairing the airship, the player can expand his empire. The map in the bottom right corner will show you nearby cities. Starting from Havana, through Mexico and the Caribbean, to New York, all these cities are waiting for people to come. Players need to master how to teleport as soon as possible to jump from one location to another in a flash.
