

Tips to help you easily share folders on Windows with Android

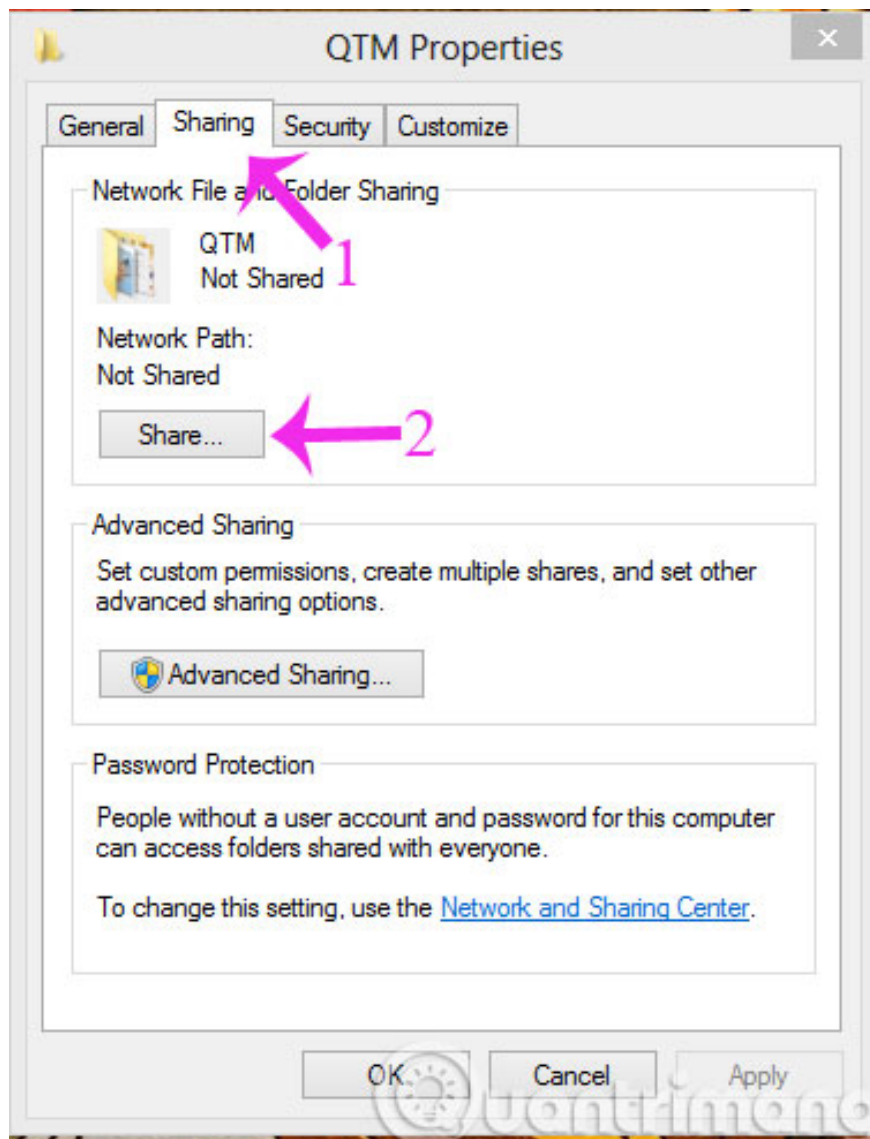

Today, the memory on smartphones has been significantly improved but it may still take a while longer, it is enough to replace computers in the field of data storage. Therefore, a good solution is to recommend that you create a folder on Windows to store large data that allows smartphones to access and access internal content via a local network. Refer to the steps taken with Android phones below of TipsMake.com offline.

Today, the memory on smartphones has been significantly improved but it may still take a while longer, it is enough to replace computers in the field of data storage. Therefore, a good solution is to recommend that you create a folder on Windows to store large data that allows smartphones to access and access internal content via a local network. Refer to the steps taken with Android phones below of TipsMake.com offline.

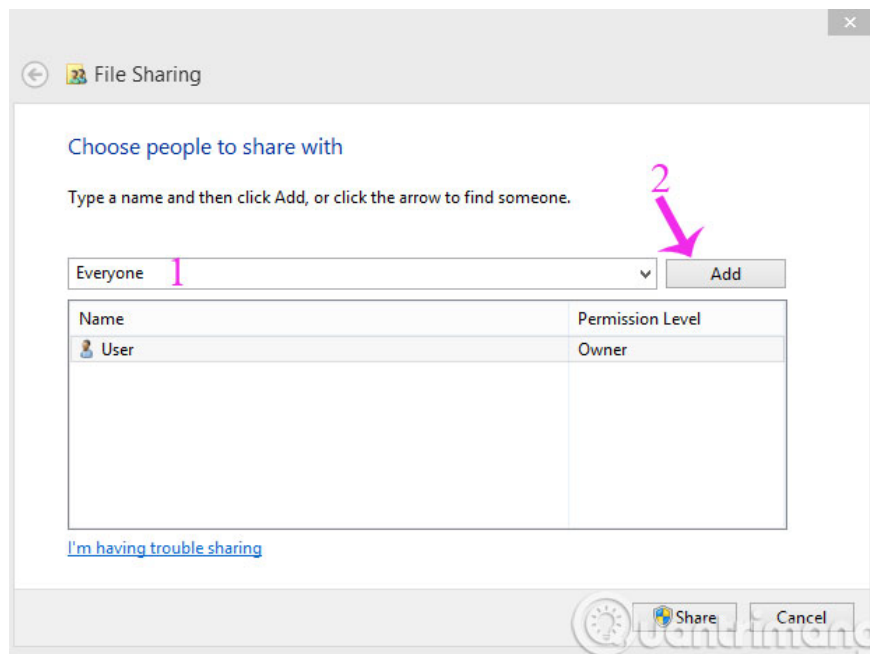

Step 1 : Right-click on the folder to share, select **Properties**

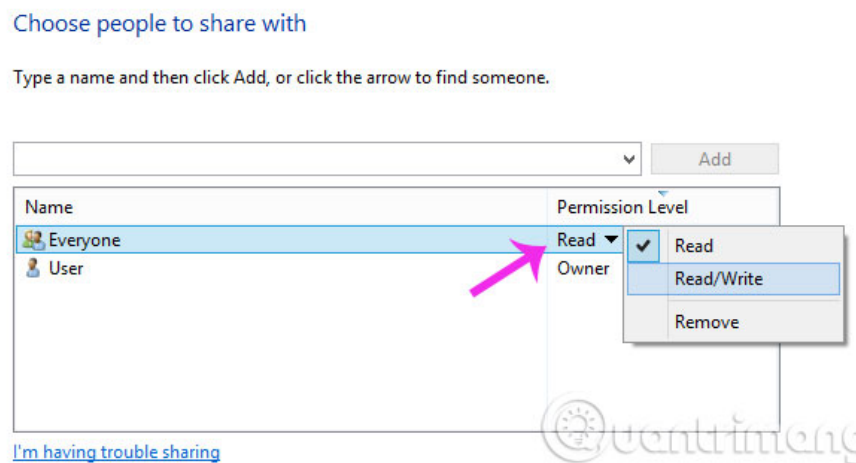

Step 2 : When the **Properties** dialog box appears, click the **Sharing** tab and then click **Share**

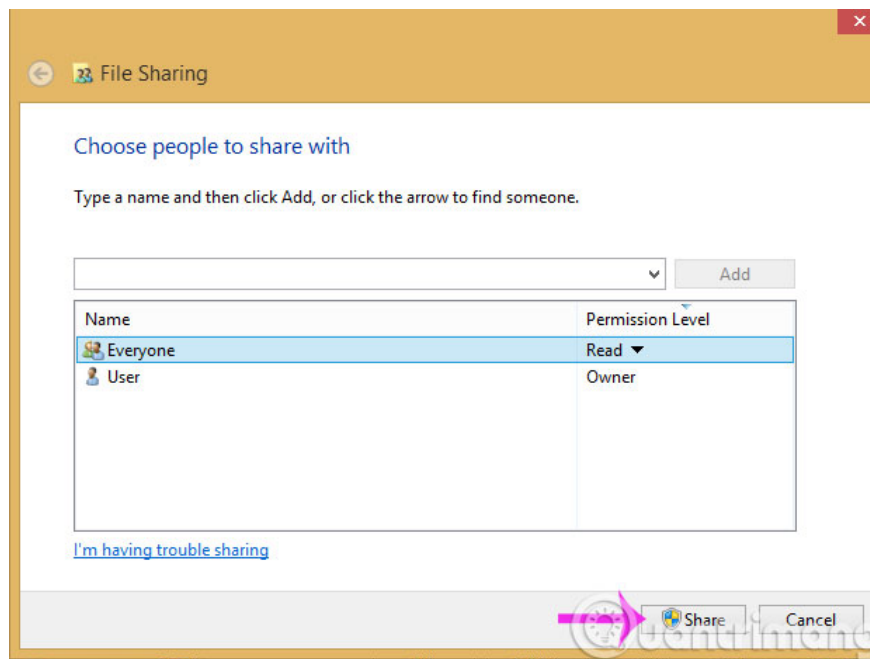

Step 3 : In the **File Sharing** window, select the account name you want to share or **Everyone** if you want to share with everyone. Then, click **Add** .

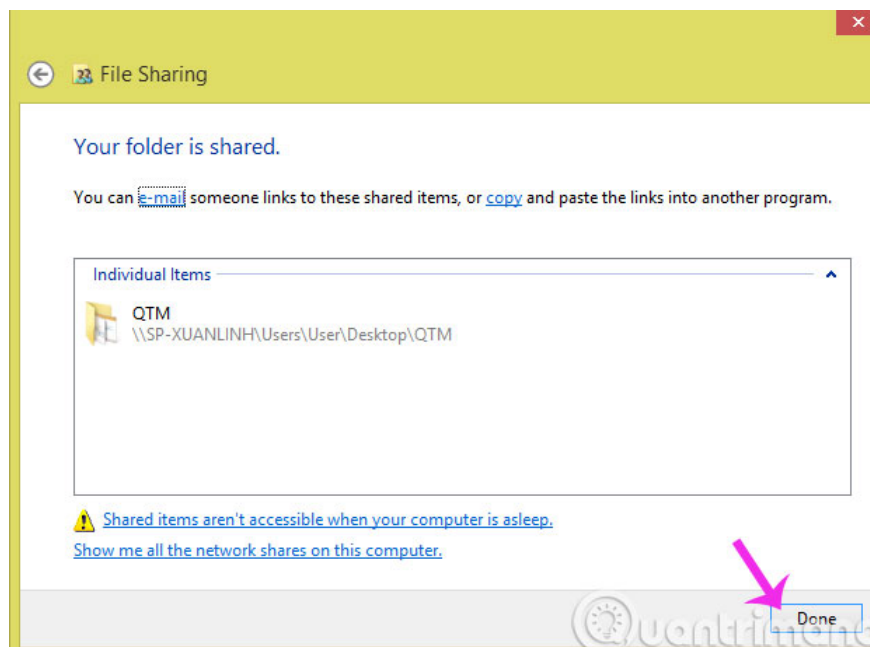

Step 4 : You can set up additional permissions for that account from Read to **Read / Edit** (Read / Write) by clicking the **Read** word in the **Permission Level** column.

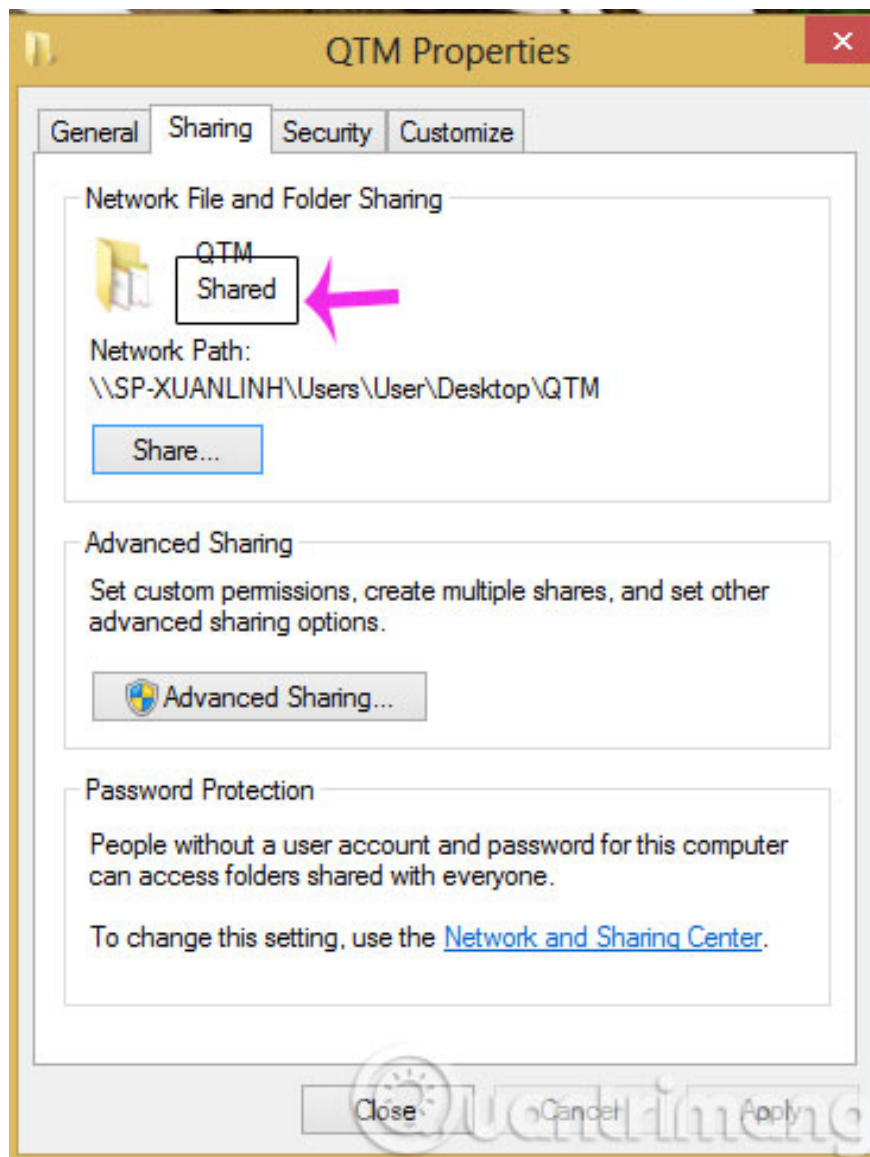

Step 5 : Then, click **Share** to share with that account

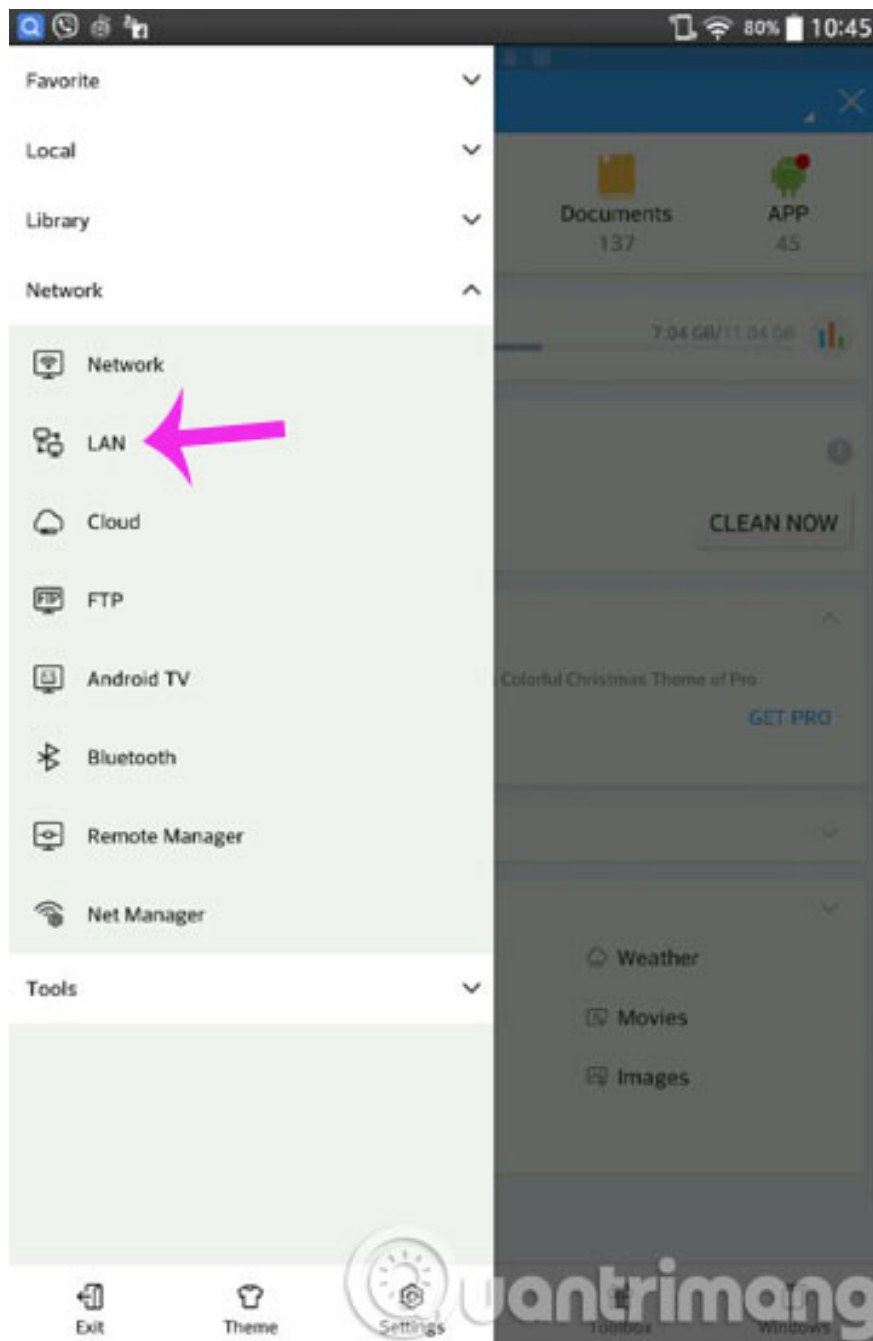

Step 6 : If your screen appears as shown below, it means you have successfully shared. Click **Done** to finish.

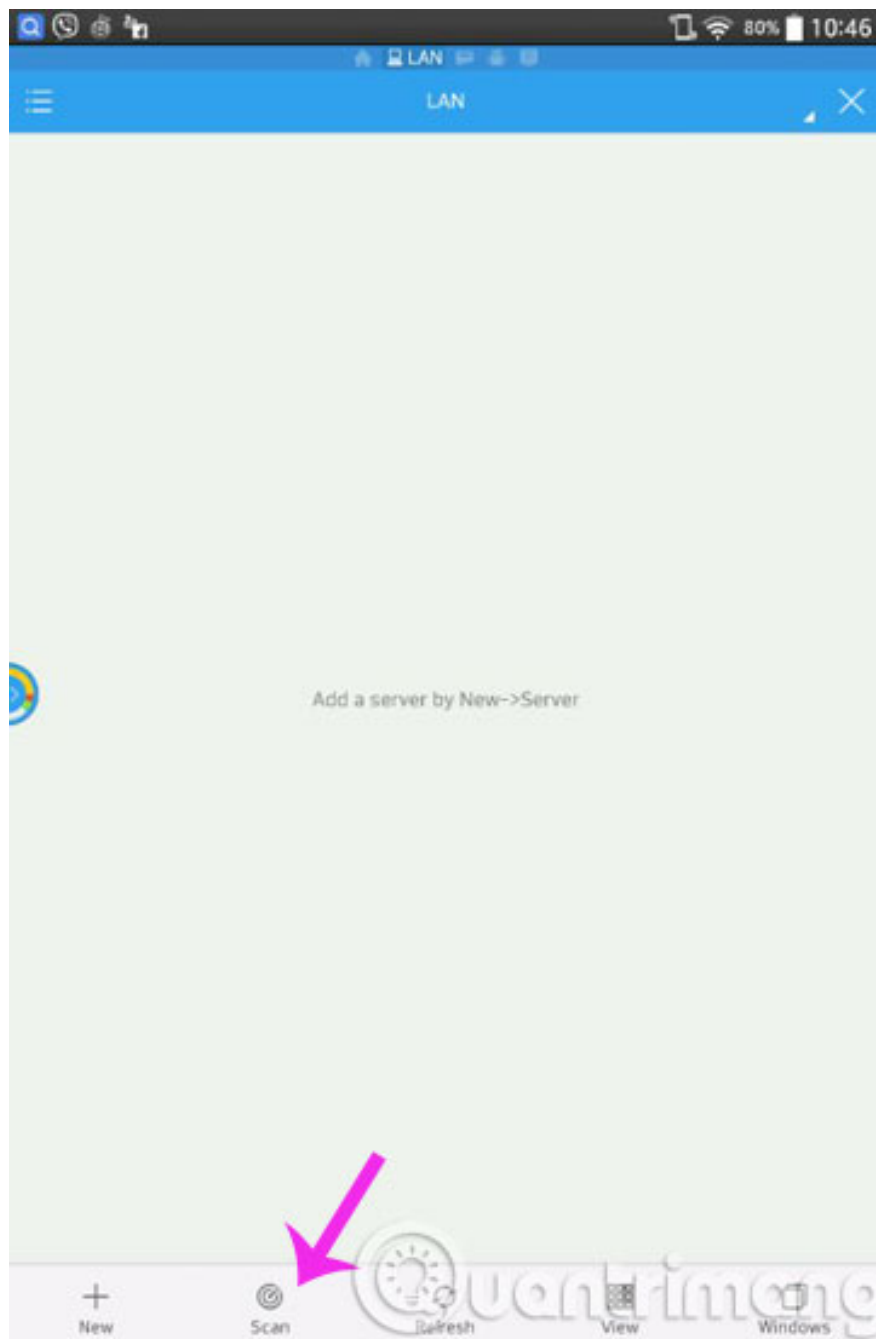

Step 7 : Now your folder has changed to **Share** status

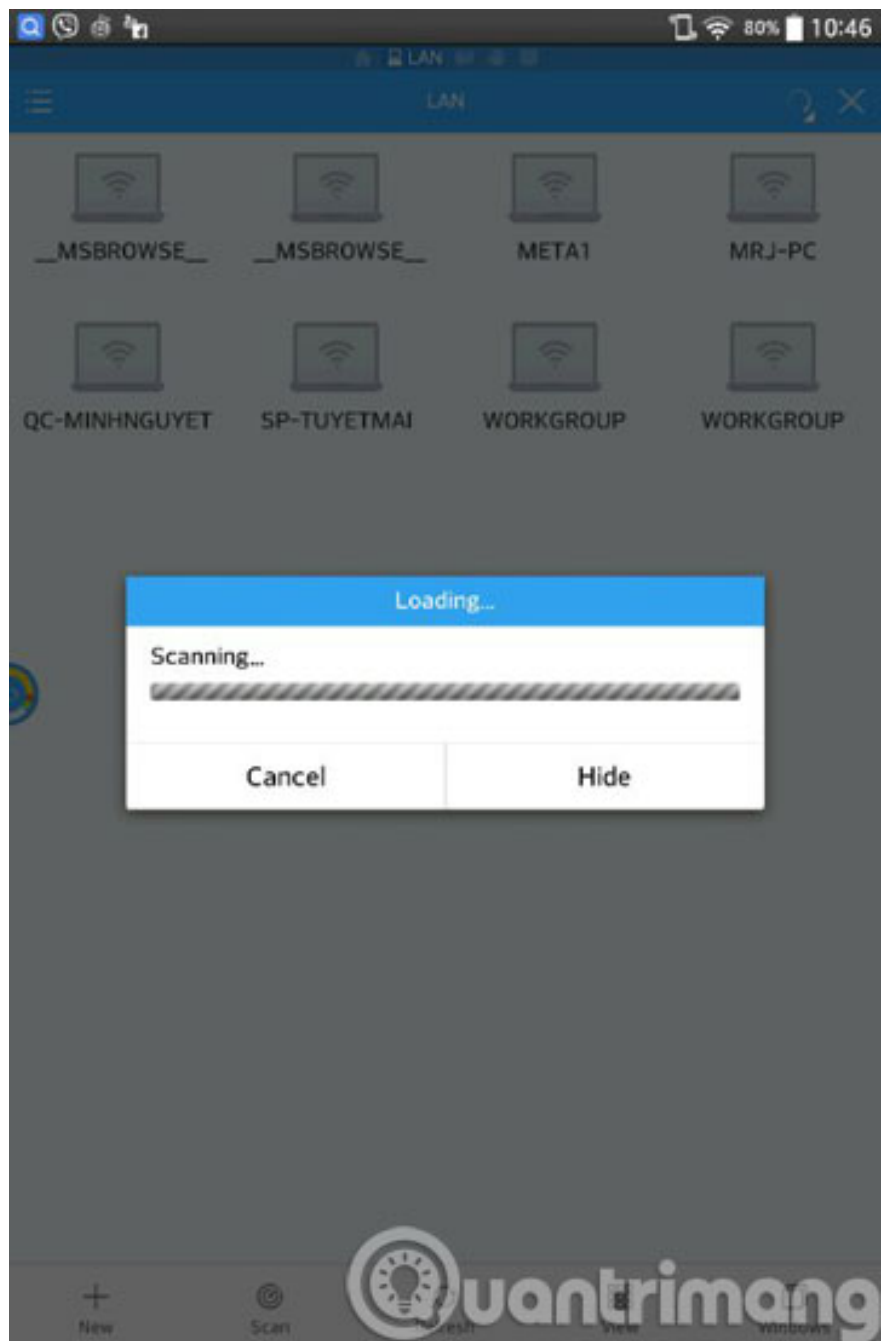

Step 8 : Open the **ES File Explorer application** on your Android device and click on the **Lan** option in the **Network** section

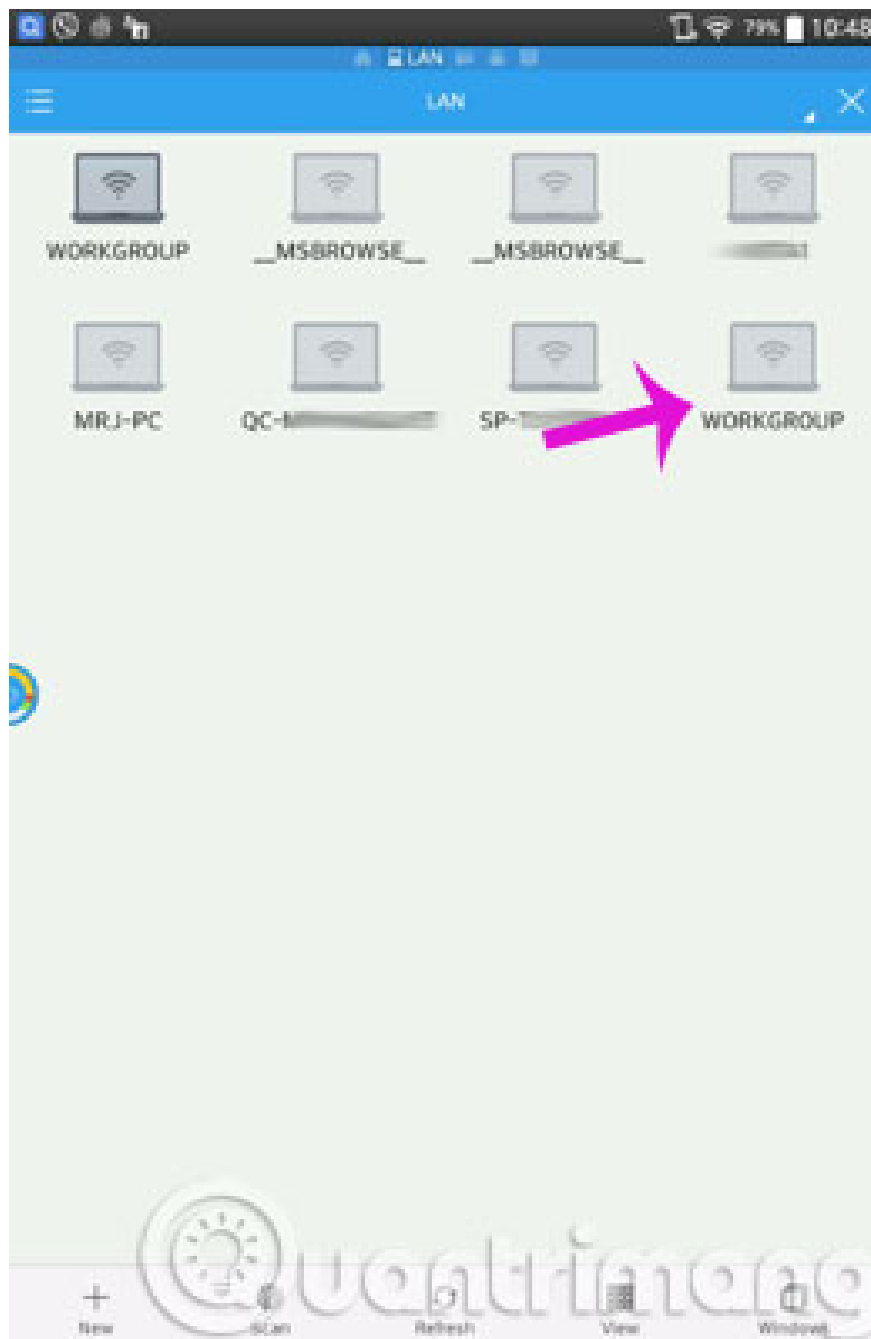

Step 9 : In the **Lan** interface, click **Scan**

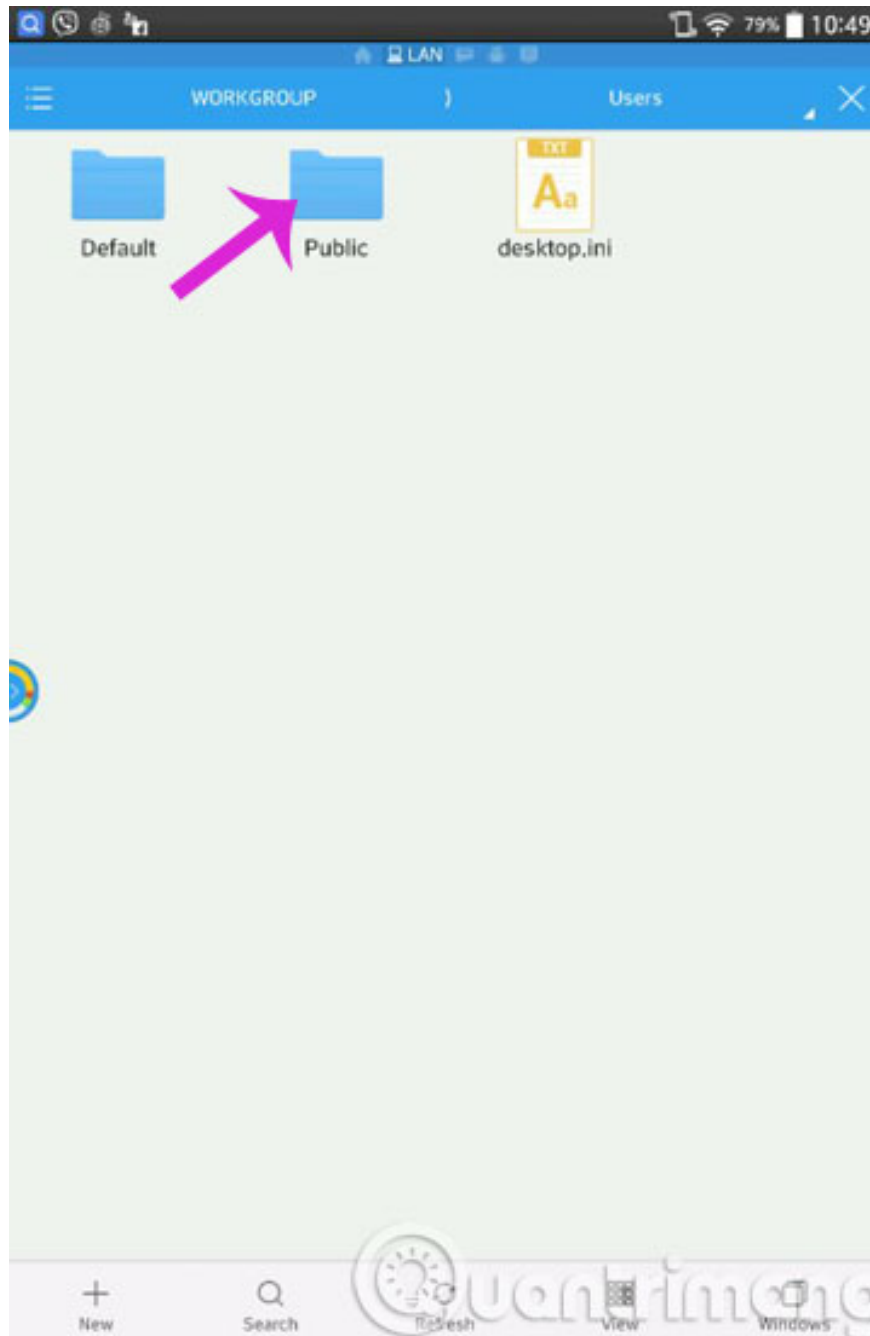

Step 10 : The device will start the network scanning process

Step 11 : A list of computers connected to each other via LAN will appear, select your computer.

Step 12 : Select the **Public** section and navigate to the directory you need

1. 4 free online document sharing sites
2. Instructions for sharing Live Photos on Facebook and Instagram
3. 5 ways to share files and folders from OneDrive in Windows 10
