

Tips to remove redundant people and replace them with any object on a simple image on your phone

The famous Picsart application will help you remove excess details / objects on photos extremely simply.

Photos containing redundant details must make you very uncomfortable and want to delete it immediately. With the new AI Replace feature that has just been released by Picsart, users can delete objects in an image easily, and even replace it with anything you want.

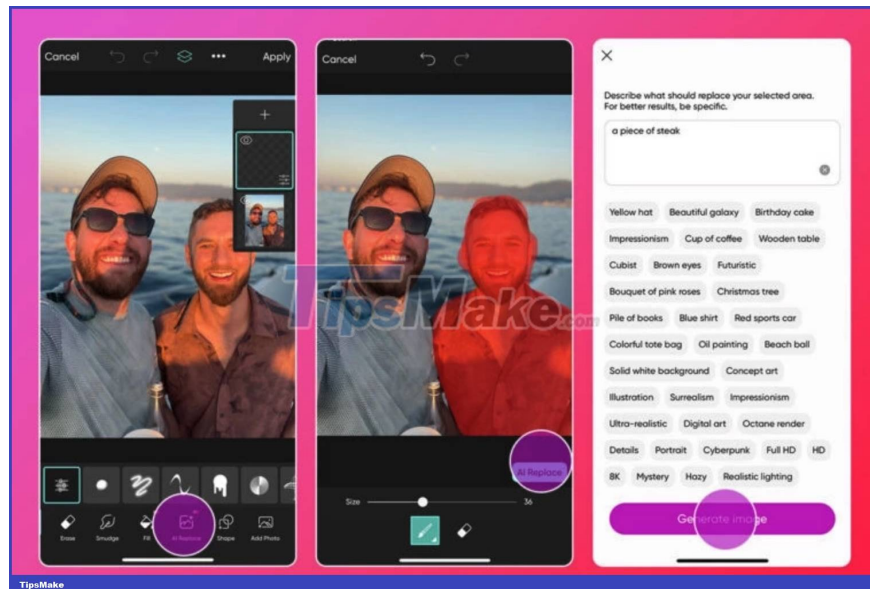

In the image above, the woman deleted the image of her ex and replaced it with a very funny snake. To be able to use this feature, follow the steps below:

Step 1: Access **the App Store** or **Google Play Store** , download the Picsart application by following the link:

Android:

iOS:

Step 2: Go to the application and select the photo you want to remove the object from.

Step 3: Swipe right and find the **Draw** tool , then select **AI Replace**

Step 4: Apply around the area of ??the object, now the keyboard will appear and you can ask Picsart's AI to replace it with any object.

Step 5: Finally, click **Generate image** for the application's AI to analyze and follow the user's request.

Quickly download Picsart and experience the AI ??Replace feature right away. Surely AI Replace will make you admire.
