

# Tips to turn the taskbar on Windows 11 into the dock of macOS

As you know, Microsoft gives Windows 11 users the Taskbar and Start Menu with a new interface. This article will guide you to customize the taskbar on Windows 11 like the dock of macOS.

However, not everyone loves these changes. In the article below, TechZ will share with readers the TaskbarXI tool - A third-party application that will 'dress' the boring Taskbar with a new and more interesting look.

Specifically, the TaskbarXI application has the ability to turn the Taskbar into a compact dock, like on macOS and iPadOS. This is the area that contains applications and functions that you can optionally assign to. In addition, TaskbarXI also supports multi-monitor. Currently TaskbarXI is only in the development stage, in the future developers will also bring more attractive features such as changing the style and background color of the Taskbar, or bringing the Taskbar to the top or left and right of the taskbar. screen.

Currently, TaskbarXI is provided completely free of charge under the link [HERE](#). If you do not want to use TaskbarXI anymore and return to Windows Explorer as before, force to close the application based on Task Manager as shown above. Wish readers have happy experiences on TaskbarXI.
