

Tips to win games in the Play Together Game Party

Here are some tips on the Play Together Game Party. Most are simple games so it will depend on your skills when playing. But you should also refer to the instructions above to win when you first enter the game party.

In Play Together PC, the Game Party feature features the same fun mini-games in Fall Guys. All are mini games that require a large number of players, requiring at least 30 people to start.

Games are randomly selected for all players and grouped into rounds. Each game has a timer and players who reach the finish line or complete a goal by avoiding obstacles when the counter reaches zero move on to the next round.

Those who do not pass the round will be removed from the list of 30 players after the round ends. The remaining players will play against each other and the next round will be more difficult than the previous round. This continues until only the last winner is left, whose reward is money stars and crown points. Those who lose will also receive an amount of stars based on the achievements. Here are some tips for winning some games in the game party.

Tips to win the Play Together Game Party

Descend

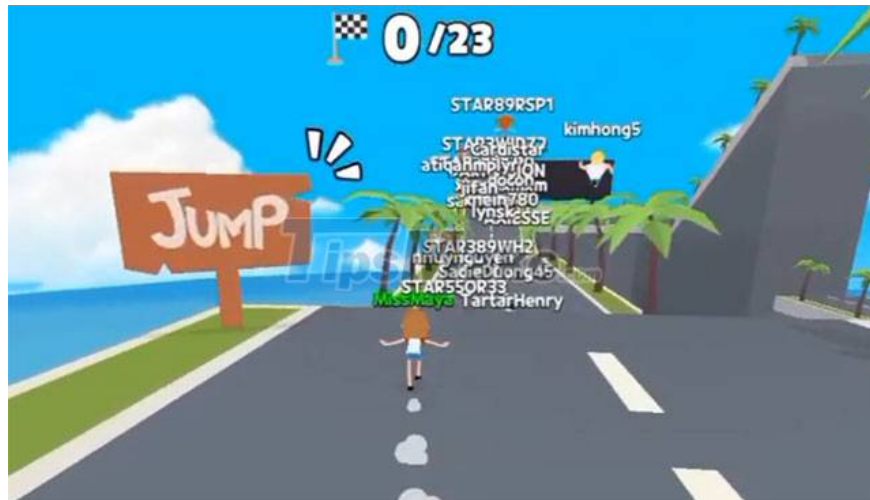

This game will require the player to find the hole to the bottom floor of the hexagonal tower. Each floor will randomly have a hole punctured, you have to find that hole to go down to the last floor.

The trick in this game is that you drag the character's perspective to a wider view. This way, you will see the hole appear first, avoiding the perspective shift as shown in the picture. You will have limited viewing angles and will not be able to spot any empty space to go down early.

Or you can stay in a group and follow your team members. You will find the hole much faster if you go in groups.

Speed ??Racing

You will have to reach the finish line faster than any other player in this game. You will have to jump from terrain to terrain, timing is very important in this moment.

In this game there are not many tips, it depends on your quick eyes and jumps at the right time. You will be racing on many terrains such as desert, galaxy.

On the map running on the dragon's back you will see clouds, they cover the distance on the dragon's back, so you need to jump over the clouds at the right time or you will fall down.

Run the Wall

In Run the Wall, you and 29 other players must run on narrow roads full of obstacles. The background and design are inspired by the Great Wall of China. Follow the path and finish before the others to move on to the next round.

Pay attention to the blue and red arrows on the lanes. Running through the red arrows will increase your movement speed, while the blue arrows will slow you down. If you get stuck at an obstacle then just move away from it. Don't try to jump over it.

Hot Potato

One of the most entertaining mini games. You and 29 other players will be dropped in a stadium, your task is to pass the bomb to other players and run away.

It is also the shortest of all the games and is divided into 3 rounds. During each round, a bomb is placed on a random player's head. This player must move closer to another player to "give" this bomb back to the other player. If you keep holding this bomb when the countdown expires, the bomb holder will be disqualified.

If a bomb lands on your head or is passed to you, quickly move to a group of players. You will pass the bomb to one of them, in a panic, everyone will tend to run in groups. When in a normal state, you stand at the fence and jump continuously, there will be times when you can stand on the fence and pass to the other side. Then you will be safe.

Rotating Logs

In the meantime, you'll have to avoid the rotating log on top of the cliff. There will be two rotating logs, you will have to avoid the smaller one with red spikes underneath.

The trick in this game is to stand near the pivot of the larger log and pay attention to the thorny log and follow it.

Obstacle Race 01

This is a constantly moving terrain changing game. You will have to jump from platform to platform and sometimes have to walk on narrow paths.

The game will be divided into stages, in the first leg it can be quite difficult to reach the finish line when many people are not familiar with the terrain in the game. The advice is that you should not jump from one terrain to another and also do not run here. Go slowly when you are traveling on narrow roads or between moving terrain. Where else will depend entirely on your mobility skills.

Above are some tips for playing in some games in the Play Together Game Party. Most are simple games so it will depend on your skills when playing. But you should also refer to the instructions above to win when you first enter the game party.
