

Told you 5 shortcuts with the Windows button on your computer that are extremely useful

Today's article I will introduce to you 5 extremely useful shortcuts with the Windows button on your computer, making it a lot more convenient for you when using a Windows computer.

Computers are indispensable devices in our daily lives as an extremely powerful tool for work, study or entertainment. Therefore, Microsoft also added to Windows a lot of keyboard shortcuts to help you use the computer much faster and more conveniently. Today's article I will introduce to you 5 extremely useful Windows button shortcuts on your computer.

1. Windows + Shift + W

This is a shortcut that helps you to quickly capture the laptop screen by region or full screen. You press the above key combination and drag the area to be captured, that area has already been screened.

If you want to save it as a file, just click on the notification after the capture is complete and select the save icon in the corner.

In addition, after capturing, the camera will save the image inside Clip Boards and you just need to Paste (Ctrl + V) where you need it.

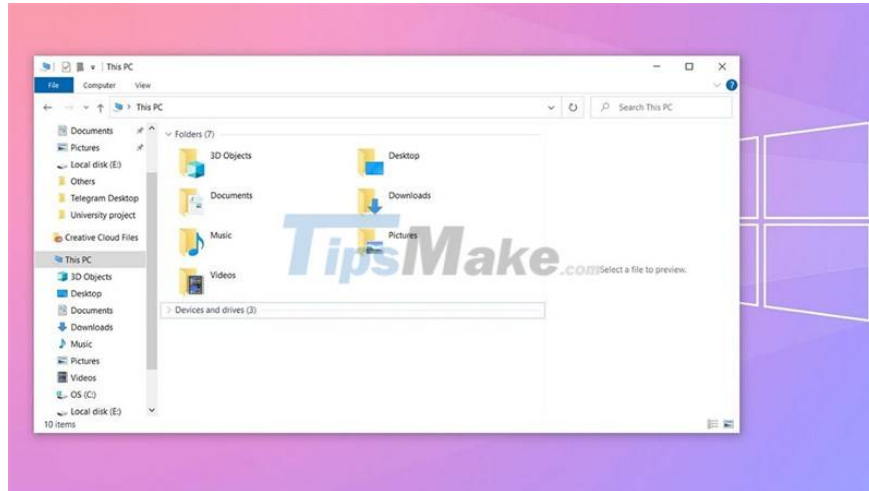

2. Windows + "."

On Windows 10 there is a hidden Emoji panel with a lot of beautiful icons. You can activate it quickly with the key combination Windows + ".". Then you just need to select the chat box the icons you like and show off to your friends.

3. Windows + E

In addition to the traditional way of opening Windows Explorer, you can also open it quickly by using it on the Taskbar or quickly pressing the Windows + E key combination. This key combination will take full effect when you are folding and not using the mouse. , or in another application.

4. Windows + EASY

This shortcut will help you quickly collapse all open windows on the Desktop quickly. When you are using your computer with dozens of applications at the same time and you want to close quickly, without clutter and do not want to waste time having to close them one by one.

5. Windows + ERROR

Once you've left your desk, you want to lock your computer as quickly as possible, but don't want to Shutdown. In addition to the way that you can fold the screen down immediately, you can also use the Windows + L key combination. This key combination will help you quickly lock the computer and use it again when needed.

What keyboard shortcuts do you usually use with the Windows button? Hope this article is useful to you. Good luck.
