

Tom Clancy's configuration Rainbow Six Quarantine on the computer

In this article, I will introduce you to the upcoming Rainbow Six Quarantine version and get the configuration of the game.

Rainbow Six Quarantine, a spin-off version that supports Rainbow Six Siege's PvE. Recently Ubisoft has released a teaser video introducing Rainbow Six Quarantine, showing that our character with arms shows signs of mutation, proving that the upcoming Rainbow Six Quarantine version will be somewhat horror-oriented.

This Rainbow Six Quarantine version will give gamers the experience of combining 3-person groups against AI enemies instead of following PvP style like Rainbow Six Siege before.

That's all the information you can know about this upcoming game. Although at the E3 2019 event, Ubisoft announced officially but nothing but a short video teaser about this upcoming version.

Rainbow Six Quarantine version is currently being developed by a new group in Ubisoft Montreal. This is also the developer of Rainbow Six Siege, you can recognize the two familiar agents in that clip, Vigil and Ela, which indicate that the context of both will take place in the same world.

Rainbow Six Quarantine will be released in early 2020 for PC, PS4 and Xbox One. But there are currently some projections about the configuration of this game, and below is the configuration of Rainbow Six Quarantine.

1. Configuring Cyberpunk 2077 on the computer
2. Configuration of playing Fifa Online 4 on the computer
3. Configuration of Counter Strike: Global Offensive
4. Configure Play Layer Of Fear 2 on the computer

Minimal configuration Rainbow Six Quarantine

1. **Operating system:** Windows 7 SP1, Windows 8.1, Windows 10 (64bit)
2. **CPU:** Core i5-2500K or AMD FX-6300
3. **RAM requirements:** 6GB
4. **Graphics card :** GeForce GTX 760 or AMD Radeon R9 280

Recommended configuration Rainbow Six Quarantine

1. **Operating system:** Windows 10 (64bit)
2. **CPU:** Core i7-4770 or AMD Ryzen 5 1600X
3. **RAM requirements:** 8GB
4. **Graphics card :** GeForce GTX 1070 or AMD Radeon RX Vega 56

Currently, the above configuration is rated as mid-range configuration and not too heavy for many gamers. Most gamers, if passionate about offline games, have the same or even more computer configuration than the recommended configuration of Rainbow Six Quarantine.
