

Tonight (March 26), Facebook's 'dating' feature will be available in Vietnam, are you ready to try it out?

According to information from Facebook, Vietnam and Colombia are the first two countries in the world to be tested by the social network for the 'Meet new friends - Meet new friends' feature, allowing users to choose whether to make friends with those who do not have any common friends but share a common interest, same city, workplace ... or not.

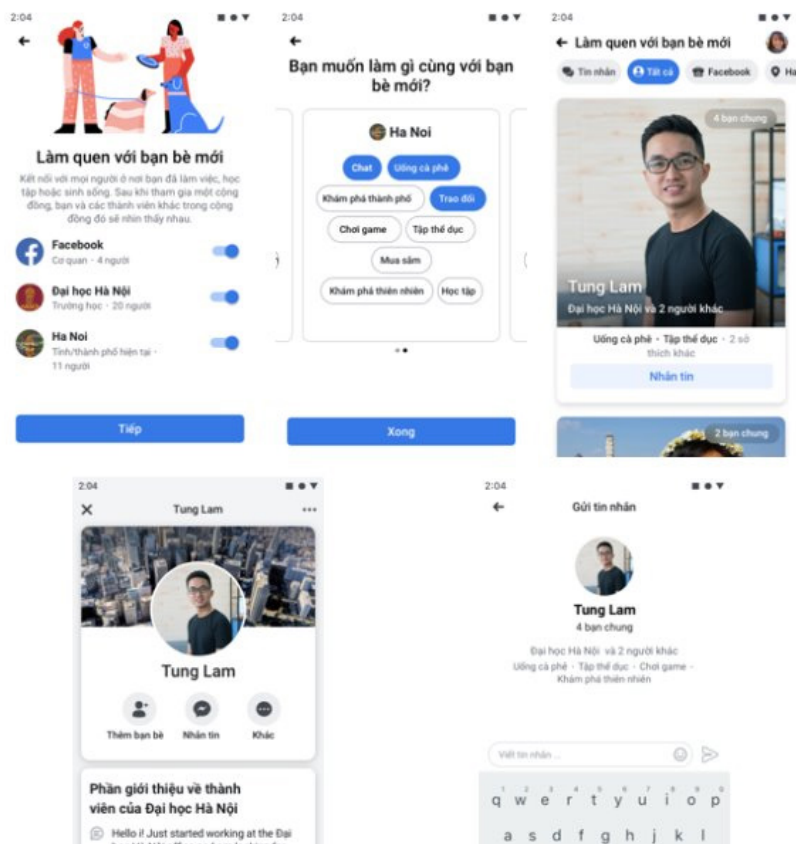

According to information from Facebook, Vietnam and Colombia are the first two countries in the world to be tested by the social network for the 'Meet new friends - Meet new friends' feature, allowing users to choose whether to make friends with those who do not have any common friends but share a common interest, same city, workplace . or not.

The 'New Meetings' feature will be launched on 23rd March 26th on both Android and iOS platforms. Facebook representative said that Vietnam is an open and quick access country with new technology, so it is a great choice to test this feature.

The new feature allows users to create a new profile, visible only to others who also use this feature.

Users can choose whether or not to use this new feature or may refuse to use this feature at any time.

Facebook expects, the 'New Meetings' feature will be useful for people who have just moved to a new city, school or job.

Will Facebook's new features be accepted in Vietnam, let's wait and see?
