

Top 10 best DJ software 2020

Currently there are many different DJ - music mixing software and each software has its own strengths.

In this article, I will introduce to you the Top 10 best DJ software 2020.

1. DJ Serato software

Serato is considered one of the best DJ-mixing applications in the world today and they are being used by many famous DJs in the world. The software not only has a beautiful interface, the main areas are made of large sizes to help users grasp important information.

Especially Serato is compatible with all popular DJ table models today such as Pioneer, Demon .

2. Virtual DJ software

In Vietnam, Virtual DJ software is probably the most widely used DJ software, from amateurs to professionals. The popularity of Virtual DJ in Vietnam is probably that they are 'free' and simple, not too complicated like other software.

However, you will have to trade a lot of features on Virtual DJ software and in the future you want to be professional DJs, maybe Virtual DJ will not be the perfect choice because they are relatively fluttering.

3. DJ MixVibes Cross software

DJ MixVibes Cross software is highly appreciated on the professional DJ playground thanks to its good resource management and powerful expansion features thanks to Plugins.

With the available features, MixVibes Cross will give users a beautiful interface, full of operations from basic to professional such as: CUE, Reply, Reback .

In addition to being full of features, MixVibes Cross also has an eye-catching interface and they are constantly updated to not be outdated.

4. DJ UltraMixer software

We can not DJ without only the software, the support accessories like the DJ table will be a great assistant for complicated operations. However, not all software has good compatibility with DJ tables on the market today.

DJ UltraMixer software has good compatibility with all popular DJ table models today and they work stably on both Windows / MacOS platforms.

5. DJ software PCDJ DEX 3

The PCDJ DEX 3 software provides a professional interface with the ability to support up to 4 tracks at once (equivalent to a 4-disc DJ desk). Surely when you hear about supporting up to 4 tracks, you will immediately think that PCDJ DEX 3 is a software for professional people, right?

This is absolutely correct, the PCDJ DEX 3 is often used by masters to show off the ultimate skills of a creative mixer.

6. MAGIX Digital DJ software

MAGIX Digital DJ is suitable for those who are just starting to learn about mixing and want to become a DJ, beginner lessons on MAGIX Digital DJ will help you understand a summary of the work of a DJ.

MAGIX Digital DJ software is not strong in terms of features or effects, they are only strong on the basics of a music maker, mix music, .

7. DJ Rekordbox software

Rekordbox is Pioneer's darling and you probably know that Pioneer is the most famous DJ equipment vendor in the world. In addition to providing professional DJ equipment for DJs, Pioneer also has its own product for mixers called Rekordbox.

Rekordbox software is highly rated in terms of performance and they are 100% compatible with DJ equipment from Pioneer. Most of the users of Pioneer DJ equipment and desks use Rekordbox software as they are included in the products.

8. DJ Mixxx Software

Similar to other software, DJ Mixxx has a lot of features to assist the user to become a professional DJ. DJ Mixxx software is capable of mixing up to 4 tracks and this is a relatively rare thing on DJ support software.

Managing multiple tracks at the same time will require the software to optimize the hardware well to avoid lag, delay when adding effects, CUE, .

9. Ableton Live

Unlike other DJ software on the market, Ableton Live favors the ability to mix music directly with MIDI electromagnetic instruments. If you regularly follow the shows of professional DJs, you will see them bring Drums MIDI, Piano MIDI, LaunchPad on stage to record live songs instead of using an existing track.

Recording from MIDI devices will require software and Ableton Live is one of those.

10. FL Studio

Undoubtedly, FL Studio is not only a music mixing tool for DJs, but also a music making software for professional Producers. Up to 80% of DJs in the world today use FL Studio to make music, beats, and record MIDI devices.

FL Studio software has a set of super powerful tools to support recording, making music and especially professional music composition.

In this article, I have sent to you the Top 10 best DJ software in the world today.
