Criteria for choosing the best graphic mouse

To choose a **graphic mouse** that suits the needs and nature of the work, designers need to pay attention to the following criteria:

Criteria	Content
Shape	Because design work requires high sensitivity and accuracy, designers when choosing a mouse specializing in graphics need to pay attention to a compact, sturdy, easy-to-use and easy-to-control form. Especially when you have to manipulate and move the mouse with great frequency, a compact mouse will be the top choice for you.

Criteria	Content
Sensitivity (DPI)	DPI is an important factor that any designer cannot ignore when choosing a mouse. The higher the DPI index, the better the mouse sensitivity. Only then can you easily control the mouse on large high-resolution screens and complete your work in the best way. A DPI of 1000 or higher is the minimum requirement when choosing sensitivity for a graphic mouse.
Connection type	Nowadays, wired mice are much cheaper than wireless mice. But in return, the wireless mouse is more flexible, you can also easily carry it and use it conveniently. However, sometimes wired mice bring better inspiration to those who are used to using this type.
Function keys	The next factor you need to consider when choosing a mouse for designers is the support function keys. Shortcuts equipped in a mouse can help you work quickly, increasing efficiency and productivity. However, there are also many troublesome cases that occur just because of pressing the wrong function button. Therefore, you can choose the most suitable product based on your needs and preferences.

Frequently asked questions when buying a graphic mouse

Below are some questions sent to TipsMake by many readers:

Which graphic design mouse is suitable for left-handed users?

- This ergonomic mouse for left-handed people also has a design that hugs the palm of the hand, minimizing the impact on the user's health when used for a long time.
- Some ergonomic mouse models for left-handed people that you can refer to include: Logitech M337 Bluetooth mouse, Zadez G151M, Rapoo GT-613M, Corsair M55 RGB Pro, Logitech G102 Gen2 Lightsync.

Are ergonomic mice suitable for graphic design?

- For designers who often have to use a mouse to work, it is even more advisable to buy and use an ergonomic mouse. – Because the ergonomic mouse possesses a unique design, it brings convenience to use and minimizes possible harmful effects on the user's health.

Epilogue

Above are **the top 10 graphic mouse models** that you can refer to. In general, depending on preferences, needs and purposes of use, we will have different selection criteria. As for design, you should choose a mouse that brings convenience, accuracy and smoothness in operation. This will help you work faster and more efficiently.
