

# Top 10 best instant camera in 2019

Taking dozens of high-quality photos every minute with a smartphone is now easier than ever. But it is even more convenient to have an instant camera for parties and vacations.

Taking dozens of high-quality photos every minute with a smartphone is now easier than ever. But it is even more convenient to have a camera taken immediately for parties, vacations. Here are the top 10 instant cameras to help you choose the right camera.

1. Top 18 best cheap cameras today
2. Top travel camera for women
3. Top best mirrorless cameras of 2019

**Note:** The price of instant camera taken in this article is for reference only at the time of writing. For the most accurate price, you should contact the seller.

## 1. Polaroid Originals OneStep + (VND 2.9 million)

1. **Film type** : Polaroid 600 & Polaroid i-Type
2. **Image size** : 108 x 88mm
3. **Lens** : 103mm / 89mm
4. **Minimum shooting distance** : 60cm
5. **Focus modes** : Macro, normal and landscape
6. **Flash** : Integrated
7. **Timer** : Yes
8. **Viewfinder** : Optical

### Advantages:

1. Large, beautiful print
2. Wireless trigger shooting mode

### Defect:

1. Photo costs expensive
2. Only built-in battery

Excitement grew in the photography community as soon as The Impossible Project purchased the Polaroid name and announced the launch of Polaroid Originals, a new line of instant camera. OneStep + is the second version, after OneStep 2. It's quite similar to the previous camera, but Polaroid Originals makes reasonable tweaks instead of wasting time doing what was already there. It complements the 89mm portrait lens and built-in Bluetooth connection, allowing remote control of shooting via a smartphone. This instant camera has a number of new shooting modes, such as double exposure, using light painting (using a moving light source to add light to the subject) and even shooting. works with short, loud sounds like applause.

## 2. Fujifilm instax mini 9 (929 thousand VND)

1. **Film type** : Fujifilm instax mini
2. **Image size** : 6.2 x 4.6cm
3. **Lens** : 60mm f / 12.7
4. **Minimum shooting distance** : 35cm
5. **Exposure modes** : Sunny, cloudy, indoor and Hi-key
6. **Flash** : Integrated (cannot be deactivated)
7. **Timer** : No.
8. **Viewfinder** : Optical

### Advantages:

1. Easy to use
2. Many color options

### Defect:

1. The viewfinder is easily obscured
2. Cannot turn off the flash

The Fujifilm instax mini 9 is an instant camera, using two AA batteries. Although made from plastic, the large buttons and bright colors bring the right appeal with the 'simple yet beautiful' style. The camera can print photos the size of a 54 x 86mm credit card (a 10-pack of prints costs about 25,000 VND each). The instant camera has a built-in flash that pops up every time you take a selfie, and supports selfie. Choose the shooting mode by rotating the camera lens and lighting usefully when used. With this camera you can get up close to 35cm away from the subject.

### **3. Fujifilm instax mini 90 NEO CLASSIC (2.7 million VND)**

1. **Film type** : Fujifilm instax mini
2. **Image size** : 6.2 x 4.6cm
3. **Lens** : 60mm f / 12.7
4. **Minimum shooting distance** : 30cm
5. Shooting modes: Party, kids, landscapes, macros, overlay effect, light bulb
6. **Flash** : Integrated
7. **Timer** : Yes
8. **Viewfinder** : Optical

#### **Advantages:**

1. Rechargeable battery
2. LCD screen

#### **Defect:**

1. Lack of handgrip camera handle
2. Small viewfinder

The remarkable Fujifilm instax mini 90 NEO CLASSIC is Fujifilm's only instant camera that comes with a rechargeable battery that the company claims it is capable of shooting 10 film packs (credit card size) with one charge. With retro style, it is suitable for vintage photography enthusiasts. You can manually control the exposure and even turn off the built-in flash if the image is too bright. The overlapping photography mode helps to expand the photographer's creativity even though the results are 'reasonable'. It has a shutter-release button on the lens, which is used as a selfie mirror (the shutter button is usually at the top position). The advantage of this instant camera is that there is an LCD screen at the back showing the selected setting. However, the viewfinder of this camera is very small but still enough to take pictures, while using fake leather helps the camera more stylish.

#### **4. Fujifilm instax WIDE 300 (2.3 million VND)**

1. **Film type** : Fujifilm instax WIDE film
2. **Image size** : 99 x 62mm
3. **Lens** : 95mm f / 14
4. **Minimum shooting distance** : 40cm
5. **Exposure mode** : Dark, normal, light
6. **Flash** : Integrated
7. **Timer** : No.
8. **Viewfinder**: Optical

##### **Advantages:**

1. Easy to use
2. Photo printed is larger than expected

##### **Defect:**

1. Bulky design
2. Small viewfinder

The Fujifilm instax WIDE 300 has up to four AA batteries, not two as with other cameras. It is considered the 'big father' in the line of instant cameras. It can take large pictures (using the instax WIDE film pack instead of the mini instax), close to the standard print size. Its bulky appearance is not suitable for selfies but the camera is made of plastic so it's relatively light. It has an adjustment lever that surrounds the shutter button on the bridge-camera control handle, which increases the power of the 95mm lens, while the built-in flash is a bit large. Photos are printed from the slot at the top of the camera. The only thing small on this instant camera is the viewfinder in the center on the left. Although it is limited to adjust the light and flash, but if you want to print photos that are closer to the standard, this is the right choice for you.

## 5. Leica Sofort (5.8 million VND)

1. **Film type** : Fujifilm instax mini format
2. **Image size** : 6.2 x 4.6cm
3. **Lens** : 60mm f / 12.7
4. **Minimum shooting distance** : 60cm
5. **Shooting modes** : Macro, light bulb, auto, party and people, sports and action, photo taking, selfie
6. **Flash** : Integrated
7. **Timer** : Yes
8. **Viewfinder** : Optical

### Advantages:

1. Fashionable design

### Defect:

1. Expensive
2. Leica-branded films are more expensive

The Leica Sofort instant camera features a boxy design with the famous red dot logo. It costs twice as much as the Fujifilm instax mini 90 camera above, uses the same rechargeable battery and the same film. However this is the cheapest Leica you can own. Ergonomically designed, the single top button is used to control the shutter, while the on / off button is used to prevent accidental activation on the backplate. It also has a narrow, high LCD display setting via simple icons. This instant camera has a selfie mirror, optical viewfinder and built-in flash with a 60mm lens with f / 12.7 aperture that provides 35mm focal length.

## 6. Fujifilm instax SQUARE SQ6 (2.3 million VND)

1. **Film type** : Fujifilm instax SQUARE film
2. **Image size** : 6.2x6.2cm
3. **Lens** : 65.75mm f / 12.6
4. **Minimum shooting distance** : 30cm
5. **Shooting modes** : Auto, macro, normal, landscape, overlay effect, lighten, darken
6. **Flash** : Integrated (with flash suppression mode)
7. **Timer** : Yes
8. **Viewfinder** : Optical

### Advantages:

1. Easy to use
2. Photo printed in square format

### Defect:

1. Small viewfinder
2. Lack of handle

Fujifilm instax SQUARE SQ6 uses two lithium CR2 batteries that the manufacturers claim can be used until all 30 film packs have been taken, 10 each. This instant camera prints photos in square format 1: 1 suitable for users who like to take photos with smartphones posted on Instagram. You can select the body color, use the selfie mode and three color filters attached to the flash along with superimposed effects, macro mode and landscape. Not surprisingly, this camera uses the special Fujifilm SQUARE film, which provides an image size of 6.2 x 6.2cm.

## 7. Lomo'Instant Wide (3.5 million VND)

1. **Film type** : Fujifilm instax WIDE film
2. **Image size** : 99 x 62mm
3. **Lens** : 35mm f / 8
4. **Minimum shooting distance** : 35cm
5. **Exposure mode** : Auto, light bulb, 1/30 fixed shutter speed mode
6. **Flash** : Integrated (can turn off flash)
7. **Timer** : Yes
8. **Viewfinder** : Optical

### Advantages:

1. Use Fujifilm instax WIDE film
2. Simple controls

### Defect:

1. Small optical viewfinder
2. Bulky

Lomo's Instant Wide Camera is the closest competitor to the Fujifilm instax WIDE 300. Photos printed with this camera are in a wider format and use 4 AA batteries. This instant camera is heavier than Fujifilm. Its design reminds you of the 1970s or 1980s. Pictures printed from this camera are great with well-adjusted exposure and flash off. It has a selfie mirror at the front and a large lever for shutter button with a lens ring that allows adjusting the focusing distance between 0.6m and infinity.

## **8. Polaroid Originals OneStep 2 Stranger Things Edition (2.3 million VND)**

1. **Film type** : Polaroid 600 & Polaroid i-Type
2. **Image size** : 108 x 88mm
3. **Lens** : 106mm
4. **Minimum shooting distance** : 60cm
5. **Flash** : Integrated
6. **Timer** : Yes
7. **Viewfinder** : Optical

### **Advantages:**

1. Large and beautiful prints
2. Retro style design

### **Defect:**

1. Photo prints are expensive
2. Only built-in battery

Despite the lack of modern functions such as OneStep +'s portrait and Bluetooth lenses, this OneStep 2 special edition has something its sibling lacks in is the Stranger Things style and retro colors. With a blue and red design of the 80s, Polaroid Originals OneStep 2 Stranger Things Edition is Hawkins-style. It is even more evident in the Upside Down version when all logos are upside down. Even the instructions at the bottom of the camera show you how to use it to fight Demogorgons. You can even buy special-edition Stranger Things i-Type movies. Of course, below all this prosperity is the regular OneStep 2 camera, a great Polaroid camera that produces stunning photos.

## 9. Kodak Smile Instant Print Camera (3.1 million VND)

1. **Film type** : Zero Ink (ZINK)
2. **Image size** : 2 x 3in
3. **Lens** : 32mm f / 2.8
4. **Shooting mode** : Color, B&W
5. **Flash** : Integrated
6. **Timer** : Yes
7. **Viewfinder** : LCD screen

### Advantages:

1. Slim, beautiful design
2. MicroSD card slot (internal memory three panels)

### Defect:

1. ZINK printout is not good
2. Limited battery capacity

Kodak Smile Instant Print is a smartphone-like instant camera with beautiful design and uses ZINK technology (ink-free). It is really a miniature printer with a lens, printed 2x3 anti-stick image. Inside the camera is a relatively modest 5MP sensor (up to 10MP through interpolation). The photos it creates look more like photos from a printer than instant pictures. With the ability to add up to 256GB of microSD memory, you can take multiple photos, then select the images you want to print. The built-in battery only prints about 40 photos per charge, a modest amount compared to the 120-160 photos you get from Polaroids. The LCD screen is basic so don't expect the same honesty as in a traditional DSLR or mirrorless display.

## **10. Lomo'instax Automat Glass (Magellan Edition) (VND 4.4 million)**

1. **Film type:** Fujifilm Instax Mini
2. **Lens :** 38mm f / 4.5
3. **Minimum shooting distance :** 30cm
4. **Exposure mode :** Automatic, Bulb
5. **Flash :** Integrated
6. **Timer :** No.
7. **Viewfinder :** Optical

### **Advantages:**

1. Super wide lens
2. The surface is covered with rubber

### **Defect:**

1. Small optical viewfinder
2. Use CR2 battery

Automat Glass Lomo'Instant's Magellan version has an appearance similar to its regular Automat camera, made of rubber. It has a 38mm lens that offers an ultra-wide 21mm angle. Lomography claims this is the first instant camera with a wide-angle lens, suitable for landscape or group portraits, along with a brighter f / 4.5 lens. Theoretically, this also results in superior image quality over instant point-and-shoot cameras, even though the image size is equal to a credit card.
