## **1. Laptop mini ASUS C100PA**

The first option on this list is Asus Chromebook. If you are looking for a laptop that can use programs, create Office documents, and 'slimy' looks, this is a good choice. As a convertible laptop, Asus C100PA-DB02 is quite simple. Its screen is not completely removable, but you can fold the keyboard in different ways. The body of this Chromebook is relatively strong and has a silver finish that brings aesthetics.

### **Specifications:**

1. Quad-core processor from Rockchip
2. Chromebook operating system
3. DDR3 RAM integrates 4GB
4. Optional 16 / 32GB memory
5. Multi-touch touch screen

### **Advantages:**

1. Ability to connect to SmartTV or HDTV.
2. Weighs only 2 pounds, suitable for students and professionals.
3. Its battery life is impressive with up to 9 hours of use.
4. Ability to connect to HDMI, USB, Micro-SD card reader and 802.11ac Wi-Fi radio.

**Defect:**

1. There is only 16GB of storage (for the basic version), so it has few storage options. Although eMMC hard drives are technically solid, they perform poorly compared to traditional SATA and modern SSDs.
2. A slightly lower resolution with a screen of 1280 x 800 pixels.

## 2. Samsung Chromebook 3 mini laptop

This is also another Chromebook but from tech giant Samsung. XE500C13-K02US is a great small notebook for those who do not need to do much work outside for web surfing, entertainment.

The XE500C13-K02US has the shape of a traditional laptop, so you won't be able to fold it like a tablet. In addition, this Chromebook does not have a touch screen. In return, this laptop has a high battery life of up to 11 hours, suitable for watching videos and movies on long flights.

Although the XE500C13-K02US is larger in size, it is still easy to hold and convenient to move. With an 11.6-inch screen, you'll be able to see most clear images at a resolution of 1366 x 768.

**Specifications:**

1. Celeron N3050 processor
2. 4GB RAM
3. Chromebook operating system
4. 16GB solid-state hard drive
5. Matte display is not dazzling

**Advantages:**

1. Features such as spill-resistant keys, good durability, and family-friendly use make this Samsung Chromebook the choice of many people.
2. It is thin, only 0.7 inches thick suitable for moving.
3. It is also very light, weighs just over 3 pounds.

4. There is an HDMI port for quick connection to HDTV to watch videos and movies.

**Defect:**

1. Although using solid state drives, only about 16GB of storage is available.
2. This laptop camera is a very low megapixel model.

### **3. Laptop mini Microsoft Surface Pro 4**

No one thought that Microsoft would start creating their own hardware until the world surprised with the Surface Pro. The latest version of the Surface Pro series comes with a pressure-sensitive stylus so you can work with art programs like ArtRage and Artflow. This laptop has a HD resolution screen of 1920 x 1080.

In addition, the Surface Pro 4 also has an Intel Skylake i5 processor. This is a relatively powerful processor for such a small machine. Portable keyboard can be detached and bent to some extent. If you make presentations or watch TV on the big screen, the Surface Pro has a wireless monitor adapter that can connect to most HDTVs.

**Specifications:**

1. There are many colors for screen / keyboard covers
2. Powerful Skylake i5 processor
3. 4GB RAM
4. 128GB SSD hard drive
5. HD resolution in 12.6-inch screen

**Advantages:**

1. This is the perfect computer for art students who need a system that can support a stylus.
2. It is very light, only 1.69 pounds.
3. Time to use up to 9 hours.
4. Since it runs on Windows 8 and 10, the Surface Pro has many software options to install.
5. This mini laptop comes with a 128GB hard drive.

6. Ability to integrate to run Microsoft Office 365.

**Defect:**

1. If you want to use a stylus and keyboard cover, you must buy it because it is not included in the device.

## **4. ASUS Transformer Book mini Laptop T100HA-C4-GR**

The Transformer series for laptops is known for the ability to quickly and seamlessly convert from a full-power laptop into a tablet. It manages this conversion process while maintaining good performance thanks to its powerful feature set and 12 hours of battery life.

A light weight of 2.28 pounds and a 10-inch screen are also part of the Transformer's great choice for those looking for 2-in-1 laptops. In addition, the processor on the Transformer Book is quite impressive. Although it's not as powerful as the Intel i5 and i7 models, its Cherry Trail architecture offers four cores for good computing power.

A popular technology for many new tablets and smartphones is Qualcomm's fast charging. This laptop has the same analog in Fast Charge technology, with the ability to fill the battery up to 80% in just two hours.

**Specifications:**

1. Intel Quad Core Cherry Trail processor can overclock
2. DDR3 4GB RAM
3. 64GB SSD hard drive
4. Use Windows 10 operating system

**Advantages:**

1. This laptop has enough power to run relatively heavy applications.
2. Unlike Surface Pro 4, the keyboard comes with a laptop.
3. It has a removable screen, has a resolution of 1280 x 800.
4. It has an extremely slim design that is only 0.75 inches thick.

**Defect:**

1. This laptop has only 64GB of storage, and after installing the operating system, you only have about 40GB of space to work.
2. Although this is a 2 in 1 design, you cannot use the keyboard to put the laptop in tent mode (tent mode).
3. The keyboard is a bit small, so you may get tired of your hands for long periods of time.

## **5. Mini Laptop Lenovo Ideapad Miix310**

This is another 2-in-1 convertible laptop, this version of Lenovo is a moderate-speed mini laptop, works well, has some features to work while on the move. Weighing less than 1.5 pounds, this laptop is actually lighter than some tablets on the market today.

Although light, but this product does not use Intel Atom processor with quad-core designed specifically for tablets. The main screen of Ideapad is an IPS (in-plane switching screen) screen. Time to use laptop up to 10 hours when watching videos. This is considered an impressive 'achievement' when watching videos as the fastest battery drain.

**Specifications:**

1. This mini laptop runs on Windows 10.
2. It has a removable keyboard for you to use as a tablet.
3. The screen of this laptop uses IPS technology.
4. It has a front and rear webcam.

### **Advantages:**

1. IPS screens are great for displaying and creating art because of their color depth. As a result, this Ideapad version has some amazing colors and sharpness.
2. This is a laptop with high mobility. It is designed to be lighter and easier to use than tablets.
3. It has an ultra-small HDMI connection, allowing you to transfer media, games and applications to larger HDTVs.
4. Because this laptop uses Windows, you can install programs like Office 365 to increase productivity.

### **Defect:**

1. The webcam on this laptop is relatively weak. 5 MP camera on the back and 2 MP camera on the front.
2. Ideapad's screen is plastic.
3. It uses an 64GB eMMC hard drive, which can sometimes be slow.

## **6. ASUS T100 10-Inch mini Laptop**

Asus Transformer Book T100 is one of the first fully convertible laptops when it was first released in 2014. Although the computer industry has grown constantly since its inception. but this laptop still works well.

Since this laptop uses Atom processor, you can use it for more than 10 hours. As a convertible laptop, this keyboard is completely removable, although its biggest drawback is its cramped feel and very flexible keys.

This version of the Transformer laptop has a USB 3.0 port so you can get fast transfer speeds when needed. In addition, the T100 also has a micro-HDMI slot so you can quickly connect your device to an HDTV.

### **Specifications:**

1. Intel Atom 1.33 GHz processor
2. Windows 10 operating system
3. DDR3L RAM 2GB

4. It can charge via micro-USB

**Advantages:**

1. This laptop is easy to open and use quickly when needed.
2. It has a battery life of up to 11 hours.
3. Comes with Microsoft Office: The student version is preinstalled.
4. It has a quad-core Intel Atom processor.

**Defect:**

1. The keyboard is uncomfortable, although this makes it lighter.
2. The touchpad is very small and difficult to use correctly.

## 7. Lenovo IdeaPad 100s mini laptop

Another model Ideapad, 100s is another cheap mini laptop. This laptop uses Intel Atom Z3735F, the Atom processor helps this laptop to run more than eight hours. From a design standpoint, this IdeaPad version looks very attractive. In addition, it has high mobility, weighs only 2.2 pounds, measures 11.5 x 7.97 and is only 0.69 inches thick.

The product also uses an eMMC hard drive and only has about 32GB of storage, but Lenovo also offers 1TB of free cloud storage when buying equipment. As a traditional laptop, its keyboard does not do anything special like removable or foldable but the keyboard has more space to use.

**Specifications:**

1. Intel Atom Z3735F CPU effectively
2. 2GB RAM
3. 32GB hard drive
4. Windows 10 Home Edition

**Advantages:**

1. This laptop has a very reasonable battery life for nearly 9 hours, suitable for working on a long day or doing a lecture.
2. Aesthetically, this is the most beautiful mini laptop on this list.
3. You get a free subscription to Office 365 with this laptop and 1TB of cloud storage.
4. While its screen is not IPS, but it has some great viewing angles.

**Defect:**

1. The display is slightly reflective, which makes you feel dazzling when using it.
2. The keyboard is very thin so it tends to bend during use.
3. No USB 3.0 port.

## **8. Lenovo S21e mini laptop 80M4002DUS**

If you're looking for a budget laptop, Lenovo S21 is a great choice for light work, fast web browsing and media playback. Because this is a mini laptop so you think it has a high battery life but not so you only get about 4 hours of use after fully charged.

This laptop weighs 2.75 pounds and is 0.74 inches thick. With its size, it can fit into a handbag so you can take it easy. The screen displayed on S21e has a reasonable performance level, with a resolution of 1366 x 768. This is not the maximum pixel per inch, but it is large enough to watch HD movies and YouTube videos.

S21e has a curved design in the jack area, which makes it more attractive and unique. It has both USB 2.0 and USB 3.0 ports so you can plug in peripherals easily. Its touchpad is also very large for a mini laptop, making it easier to control without a mouse.

### **Specifications:**

1. Intel Celeron N2840 CPU
2. DDR3 2GB RAM
3. 32GB SSD memory
4. Windows 8.1 operating system

### **Advantages:**

1. High aesthetics with curved design.
2. It has a wide trackpad, although you won't be able to use gestures.
3. The display has anti-glare coating, which is very useful for this small notebook.
4. This laptop has a webcam, suitable for making Skype calls.

### **Defect:**

1. This processor is not strong enough for anything too complicated.
2. RAM and hard drive cannot be upgraded; You only get 32GB of storage and when you make the required settings like the operating system, you will only be able to use 20GB to work.
3. It only comes with Windows 8.1 operating system, so you'll have to upgrade once you get it.

## **9. Acer Aspire Switch 10 mini laptop SW5-012-16AA**

This mini laptop is a convertible device from Acer. It is foldable and the screen can be separated from the keyboard. In fact, when separated, you can re-mount the screen with the keyboard in the opposite direction to use it at different angles. In addition, this small laptop can be used in "tent mode".

Switch 10 has a 10-inch screen, standard HD or 1920 x 1080 resolution and weighs about 2.6 pounds. One of the most innovative features of this mini laptop design is its magnetic hinge. It is quite strong and will keep the two components firmly attached.

**Specifications:**

1. Intel Atom Z3735F CPU
2. 2GB RAM
3. 32GB hard drive
4. Windows 8.1 Home Edition operating system
5. Sign up for one year for Office 365

**Advantages:**

1. This is a very versatile small laptop.
2. It has a high battery life of 8 hours.

**Defect:**

1. The screen is glossy so users will see glare.
2. The top half of the system is obviously much heavier than the keyboard and touchpad, making the relatively light device have a heavy head.

## 10. Dell Laptop Inspiron 11 3000 mini laptop

The final product on this list is Dell. Interestingly, this laptop and Surface Pro are the two most efficient mini laptops on the list. Dell offers a large storage capacity. Although it doesn't have a solid state drive, an internal half-TB hard drive can accommodate basic tasks at 5400 RPM.

This laptop is also a convertible. It can be folded in many ways and capable of being used in 'tent mode'. The screen, as you can imagine, is a touchscreen and is very responsive, although it has a weaker resolution of 1366 x 768. However, because of its powerful i3 4030U processor, this laptop makes it Has the least battery life on the list, only 4 hours of use.

**Specifications:**

1. I3 4030U processor
2. DDR3L 4GB RAM memory
3. 500GB hard drive
4. Windows 8.1 Home Edition operating system
5. Key to try Microsoft Office

**Advantages:**

1. As one of the best mini laptops for overall performance on this list, you can run more powerful programs on this laptop.
2. It has very good MaxxAudio speakers that provide some great sound.
3. Large storage capacity.
4. It can be folded into a tablet-like shape.

**Defect:**

1. Low battery life.
