

# Top 10 best network cable testers

Whether you are responsible for corporate LAN or some simple peer-to-peer (P2P) connection, ensuring network integrity and especially its cabling is essential. The following is a list of the best network cable testers available today,

Whether you are responsible for corporate LAN or some simple peer-to-peer (P2P) connection, ensuring network integrity and especially its cabling is essential.

This diverse list of network cable testers will assist any technician in checking faulty lines or broken USB cables.

## 10. Docooler 4-in-1 Meter

The cheap 4-in-1 Meter Docooler (about \$ 15 - 350,000 VND) will be a practical addition to any family toolkit. It is capable of finding faults in 4 types of cables. The simple screen allows for non-tech savvy users to keep track of issues.

Docooler 4-in-1 Meter is compatible with USB Type A / B and has no built-in memory.

## 9. Trendnet TC-NT3

Pass / Fail mode allows Trendnet TC-NT3 (cost about \$ 65 - 1.5 million) to handle 'heavy' tasks quickly. The USB test feature is one of the things this machine can do.

## 8. Klein Tools Parent

Voice, data and video issues can all be solved with Klein Tools Parent (cost about \$ 74 - 1.7 million VND). This compact device performs fault detection and has a series of connectors to identify multiple cables in one step.

Klein Tools Parent

## 7. Noyafa AT278 Multi-Functional

Noyafa AT278 Multi-Functional (priced at \$ 135 - 3.1 million VND) offers a number of surprising features at relatively low prices, the most prominent of which is a colorful screen. However, it is only designed for use with metal wires.

## 6. NetAlly LinkSprinter

NetAlly LinkSprinter (about \$ 371 - 8.6 million VND) is a smart choice. Just press the button, you can check the whole, from beginning to end and then the results are sent to the cloud-based reporting system that you can access by mobile devices.

NetAlly LinkSprinter

## 5. Netscout 2000 LinkRunner

Netscout 2000 LinkRunner (about \$ 2200 - 51.1 million VND) offers a variety of discovery protocols, can find the nearest switch and provide detailed information, including Vlan ID, port speed and connection type. Netscout 2000 LinkRunner comes with a handy carrying case that increases product mobility.

## 4. T3 Net Prowler

T3 Net Prowler (nearly \$ 1213 - 28 million VND) is a reliable handheld tester that will find problematic DHCP servers, check Internet connection and point out all IP devices without your knowledge. Simple graphical interface makes information easily accessible.

## 3. Fluke CableIQ

The rugged, lightweight design makes Fluke CableIQ (approximately \$ 1149 - VND 26.7 million) a good choice for tough and harsh environments. Fluke CableIQ can do many things, from identifying noise locations to complex infrastructure mappings.

Fluke CableIQ

## 2. Tripp Lite Fiber

With dual wavelength source settings, Tripp Lite Fiber (cost about \$ 305 - 7 million) works in both single and multi-mode optical networks. It is equipped with threaded FC connectors, which keeps it tight even during high vibrations and micro-USB ports to keep the battery charged.

## 1. Fluke MicroScanner2

Fluke MicroScanner2 (nearly \$ 2525 - 59 million VND) includes everything you expect from the company with these highly rated products. Whether you're looking to test indoor phone lines or develop complex cable diagrams for your business, this comprehensive set of tools will help you accomplish the task.
