

Top 10 best VPN services today

Choosing a good and suitable VPN service is very difficult. In this article, Software Tips will introduce to you the Top 10 best VPN services today for you to choose more easily.

In recent years, VPN services have been indispensable for those who need data security and information concealed when connecting to the network. VPN services in the world today are very diverse and have many different types of activities. However, choosing a good and suitable VPN service is very difficult. In this article, Software Tips will introduce to you the Top 10 best VPN services today for you to choose more easily.

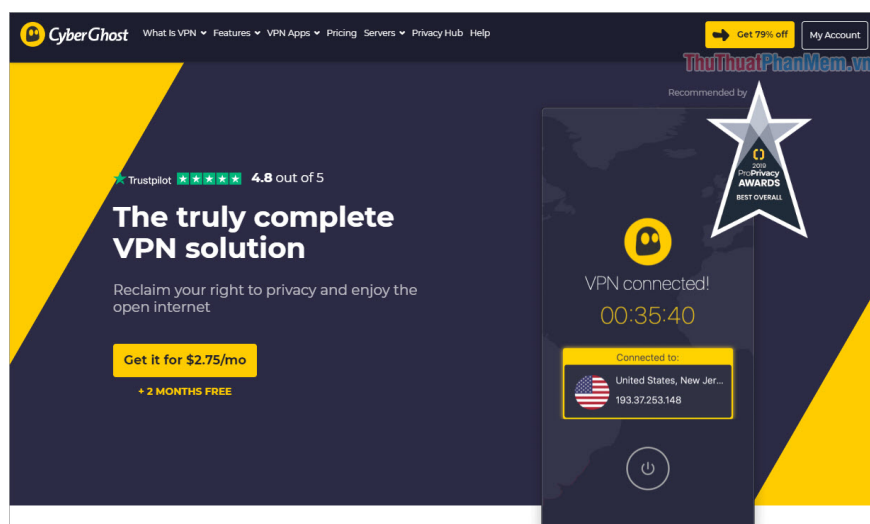

1. NordVPN

NordVPN is a highly regarded VPN service and is always the first choice of users who need a stable speed. When we use VPN, the connection speed is very important, it will decide the user experience. For NordVPN, their system has 5400 servers located in 60 different countries and this number is growing strongly. Because of that, NordVPN has fast, stable access speeds and very little congestion. The NordVPN VPN platform works on most networks such as Netflix, Hulu, BBC, Showtime, . In the world.

2. CyberGhost

CyberGhost is a beautiful VPN software with nice interface, fast access speed and server system spread all over the world. CyberGhost comes from a Romanian-based provider, so they have a strong encryption policy, especially that users' data will not be copied and stored. CyberGhost's current system is also very powerful as they have 5600 servers in 89 different countries so the speed is very stable and has high bandwidth. CyberGhost's interface is highly appreciated as it is intuitive and easy to use. However, if you are in China, CyberGhost is useless because the Chinese network policy is too strict.

3. ExpressVPN

If you need to find a VPN with the fastest speed, ExpressVPN will definitely be the first choice. The speed of ExpressVPN is currently being rated as the fastest in the paid VPN services on the market today. However, to get high speed, you need to trade with the price, the price of ExpressVPN is currently relatively high, on average it is double that of other VPN services. However, with the price you spend to hire ExpressVPN really very worthy and reasonable.

4. PrivateVPN

PrivateVPN is the best VPN software for many people because it is cheap and relatively comfortable. However, the PrivateVPN system has only 150 servers located in 59 countries around the world so there are still many limitations. PrivateVPN is based in Thuy Dien, so they have to follow a lot of European data security policies so you can safely use it without worrying about personal data exploitation.

6. UltraVPN

UltraVPN is one of the good VPN services in the low-cost segment. Often, we see that the low price will often come with bad customer service. But UltraVPN does not do so, customer service of UltraVPN is extremely fast and attentive to customers. Currently, UltraVPN has more than 100 servers located in 50 different countries around the world, so the connection speed of UltraVPN is at an average level - quite. This is a reasonable VPN service for those who have a tight budget and still want a good VPN.
